* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorised form of age-classification.

RED SEA—WEST COAST.

COAST OF ABYSSINIA.

Bank southward of S. E. Jezirat Kudd'Ali.

THE British Admiralty, London, has given notice—on the authority of the Commander of the Italian gun-boat *Scilla*—of the existence of a bank lying about two miles S. ½ E. from South-East Jezirat Kudd'Ali, and nearly one mile from the shore.

This bank *(Scilla bank)* extends about 9 cables in a N. N. E and S. S. W. direction with a breadth of 2½ cables; on the northern end there is a patch of 19 feet at low-water (the shoalest spot found), and on the southern end a patch of 21 feet; on other parts of the bank, the depths range from 23 to 33 feet.

The *Scilla* anchored near the southern edge of this bank in 21 feet with the following bearings :—

South-West summit of Saddle island ...	S. 89° E.
Jezirat Kudd'Ali summit	N. 37° W.
South-East Jezirat Kudd'Ali summit	N. 5° W.

Position—Latitude 13° 53′ 15″ N., longitude 41° 51′ 30″ E.

Note.—From the shoalest spot, Barn rock is shut in by South-East Jezirat Kudd'Ali, and the North-East extreme of Saddle Island is in line with the highest peak of Jebel 'Abáyil.

The Commander of the *Scilla* reports that Haycock hill and the islands in the vicinity are not well charted.

CALCUTTA SMALL CAUSE COURT.

NOTICE.

IN accordance with suggestions contained in a report to the High Court, signed by Mr. Justice Wilson and Mr. Justice Trevelyan, on their inspection of the Calcutta Small Cause Court, a new system will, *on and after the 28th October* 1886, be tried for the purpose of revising the list of cases which come daily into the court.

All summons cases will, on the returnable date of the summons, come before one only of the Judges, who will revise the whole list of the court for each day.

He will go through the list, enter "compromises," make decrees in cases in which the defendant does not appear, give fresh summonses in cases where the summons has not been served, grant necessary postponements, ascertain what causes are defended, and dispose of any cases which, in his judgment, can be disposed of summarily.

This would leave the whole time of the other Judges free for the trial of defended causes. The defended causes will be assigned by the Judge revising the list to the lists of the different Judges on the earliest possible days, and will be adjourned by him to those days. The Judge revising the list will have before him the list of each Judge for each day, so far as already filled up, and will arrange that there should always be a sufficient number of cases, say 25 or 30, on each Judge's list. Each of the other Judges will thus have each day his list of defended cases provided for him. When a second summons has been granted, the case will, on the new return day, come again before the Judge who revises the list for that day.

If under this system a Judge should at any time find his list becoming clogged, he will communicate with the revising Judge, and inform the latter that he must have a day or days left clear to enable him to pull up. Thus if on the first of the month a Judge finds that his lists were getting blocked, and that it will take a day to get them clear, he will tell the revising Judge that this is the case. The latter, when revising the lists of the Judge in question, may see that they are already filled, say up to the 9th: he will leave the 10th blank. The Judge who had found himself blocked, knowing that the 10th would be a clear day, will use his discretion: he will either go on as usual up to the 10th, trusting to clear himself on that day, or will adjourn a sufficient number of cases to that day to enable him to take the other cases as nearly as possible on their proper dates.

ADJOURNMENTS.

No "cost of the day" will be allowed on adjournments.

Nor will adjournments be allowed, even by consent, except upon good cause shown.

By order of the Court,
C. Y. C. BOLST,
Clerk of the Court.

Calcutta, the 1st November 1886. (1827—3)

Revised Bye-laws on the subject of Burials and Cremation.

36. All graves must be at least six feet deep, but no masonry grave constructed after the 1st of September 1886 shall be used for a second interment, unless there is space for five feet of earth between the top of the second coffin and the surface of the ground. For masonry graves constructed before that date, three feet of earth shall suffice as heretofore.

Second interments prohibited, except under certain conditions.

27. No person shall build or dig, or cause to be built or dug, a grave in any burial-ground at a less distance than two feet from any other existing grave.

Intervening space between graves.

28. No person shall build or dig, or cause to be built or dug, a grave in any burial places in any other line than that specially marked out by the Superintendent to the Burial Board for the purpose, or, in the case of cemeteries not under the Board, by the Commissioners.

Graves to be dug in regular line.

29. No grave other than a masonry grave shall be opened for a second interment within a period of 10 years, without the special permission of the Burial Board, or, in the case of cemeteries not under the Board, by the Commissioners.

Graves not of masonry shall not be opened within 10 years without permission.

30. No one shall carry a corpse, or part of a corpse, through any highway, unless it be decently covered and concealed from public view.

Corpse to be carried decently covered.

31. The Commissioner of Police shall have power to order the exhumation of bodies whenever such exhumation is deemed necessary by him for police purposes, informing the Burial Board when the disinterment is in any cemetery under their control. In all other cases the sanction shall be given by the Burial Board, or, in the case of cemeteries not under the Board, by the Commissioners.

Exhumation of bodies prohibited without permission of proper authorities.

32. No person, while carrying any corpse, or part of a corpse, through the precincts falling within municipal limits, shall deposit it on or near any public highway, except for the purpose of ordinary relief.

Depositing corpses on roadsides, except for ordinary relief, prohibited.

33. No person shall cause to be removed any corpse, or part of a corpse, that has been kept or used for purposes of dissection otherwise than in a closed vehicle, and in such manner as may prevent any offensive odour, and at such hours as may be fixed by the Commissioners in meeting. Nothing contained in this section shall apply to the removal of a body by the relatives of a deceased person after a Coroner's inquest.

Corpses used for dissection to be removed in covered carts.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 21st October, 1886:—

NO. 26 OF 1886.

A Bill to regulate the supply of electricity for lighting and other purposes.

WHEREAS it is expedient to regulate the supply of electricity for lighting and other purposes; It is hereby enacted as follows:—

Short title, extent and commencement.

1. (*1*) This Act may be called the Electricity Supply Act, 1887.

(*2*) It shall extend to the whole of British India; and

(*3*) It shall come into force at once.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

(*1*) "electricity" includes galvanism, magnetism, magneto-electricity and electro-magnetism:

(*2*) "telegraph", "message", "telegraph line", "post", "telegraph authority" and "local authority" have the meanings respectively assigned to those expressions in the Indian Telegraph Act, 1885: and 1885.

(*3*) "purpose" includes any purpose except the transmission of a message or the use of electricity in medical treatment.

Prohibition of supply of electricity without license.

3. Save as provided in this Act, electricity shall not be supplied for a price by any person for any purpose without a license from the Governor-General in Council authorizing the person in that behalf.

Grant and contents of license.

4. (*1*) The Governor-General in Council may from time to time license any person to supply electricity for any purpose, and in any local area, specified in the license.

(*2*) The license may prescribe the duties of the licensee and provide for the revocation of the license on his failure to perform any of those duties, and generally may contain such regulations and conditions as the Governor-General in Council thinks expedient.

(*3*) By a license granted under this section the Governor-General in Council may, subject to such conditions as he thinks fit to impose, confer on the licensee, with respect to the placing of appliances and apparatus for the supply of electricity, any of the powers which the telegraph authority possesses under the Indian Telegraph Act, 1885, with respect to the placing of telegraph lines and posts for the purposes of a telegraph established or maintained by the Government or to be so established or maintained. XIII of 1885.

(*4*) The Governor-General in Council may from time to time amend, add to or cancel any of the regulations and conditions contained in a license, and withdraw any of the powers conferred by a license or impose amended or additional conditions with respect to the exercise of those powers.

Supply of electricity by certain persons without license.

5. (*1*) Section 3 shall not apply to any person supplying electricity for any purpose in any local area at the time of the passing of this Act so far as regards the supply of electricity for that purpose within that area.

(*2*) If any question arises with respect to the purpose or the local area for or in which electricity was being supplied at that time, it shall be decided by an authority to be appointed by the Governor-General in Council in that behalf, and the decision of that authority on the question shall be final.

Grant of licenses to those persons

6. (*1*) Notwithstanding anything in the last foregoing section, the Governor-General in Council may, on the application of any person supplying electricity for any purpose in any local area at the time of the passing of this Act, grant to the person a license for that purpose in that area under the provisions of section 4.

(*2*) Where a license is granted under sub-section (*1*), it shall supersede any engagement between the person to whom it is granted and any local authority with respect to the conditions on which electricity may be supplied by that person for the purpose, and in the local area, specified in the license.

Penalty for supplying electricity without license or contravening license.

7. If a person does either of the following things, namely,—

(*a*) being a person to whom section 3 is applicable, supplies electricity for a price without a license, or,

(*b*) having a license under this Act, commits or suffers to be committed a breach of any duty prescribed in the license or of any regulation or condition contained therein,

he shall be punished with fine which may extend to one thousand rupees, and, in the case of a continuing offence, with a further fine which may extend to two hundred rupees for every day during which the electricity is supplied or the breach of the duty, regulation or condition continues.

Power to make rules.

8. (*1*) The Governor-General in Council may from time to time make such rules as he thinks expedient for protecting the public in person and property from injury by reason of contact with, or the proximity of, appliances or apparatus used in the supply of electricity, and for preventing telegraph lines from being injuriously affected by any of those appliances or apparatus.

(*2*) A rule under this section may apply to the appliances and apparatus of a person not having a license under this Act as well as to those of a person having a license thereunder.

(*3*) In making a rule under this section, the Governor-General in Council may direct that a breach of it shall be punishable with fine which may extend to one thousand rupees and, in the case of a continuing breach, with a further fine which may extend to two hundred rupees for every day during which the breach continues.

Procedure for making rules.

9. (*1*) The Governor-General in Council shall, before making rules under the last foregoing section, publish, in such manner as he deems sufficient, a draft of the proposed rules for the information of persons likely to be affected thereby.

(*2*) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(*3*) The Governor-General in Council shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*4*) The publication in the *Gazette of India* of a rule purporting to be made under the last foregoing section shall be conclusive proof that it has been duly made.

(*5*) Rules under that section may from time to time be amended, added to or cancelled by the Governor-General in Council.

Saving of prosecutions under other laws.

10. Nothing in this Act shall prevent any person from being prosecuted under any other law for any act or omission which constitutes an offence under section 7 or against a rule under section 8, or from being liable under that other law to any other or higher punishment or penalty than that provided by section 7 or a rule under section 8 :

Provided that a person shall not be punished twice for the same offence.

STATEMENT OF OBJECTS AND REASONS.

THE primary object of this Bill is to empower the Governor-General in Council to make rules (*a*) for protecting the public in person and property from injury by reason of contact with, or the proximity of, appliances or apparatus used in the supply of electricity for lighting, and (*b*) for preventing telegraph-lines from being injuriously affected by any of those appliances or apparatus.

2. The danger to the public from electric light connections arises from the fact that currents of great strength are used in the production of the light, the currents being powerful enough to cause death to any person, or set fire to any inflammable material, coming in contact with the wires while the currents are passing, that is to say, while the lamps are being used. Protection may be afforded either by placing these wires or connections in such a position that contact with them is impossible, or by so covering them with insulating material that contact with them is innocuous.

Interference with telegraph and telephone signals is caused by obstructive currents being induced in the telegraph and telephone wires when the electric light wires pass within a certain distance of them. The remedy is to arrange that the electric light wires shall be placed sufficiently far off. It is impossible of course to determine what the safe distance is without knowing the strength of the current employed for the electric light, which again varies with the number of lamps in circuit, but the distance can be determined from time to time with reference to the maximum current to be used in any particular local area.

3. A company desiring to supply electricity in any local area for any purpose must, if the company was not supplying it in that area for that purpose at the time of the passing of the Act, obtain a license from the Governor-General in Council. By this license the

Governor-General in Council may impose such regulations and conditions as he thinks expedient, and confer on the licensee, with respect to the placing of appliances and apparatus for the supply of electricity, any of the powers which the telegraph-authority possesses under the Indian Telegraph Act, 1885, with respect to the placing of telegraph lines and posts for the purposes of a telegraph established or maintained by the Government or to be so established or maintained.

Companies which were supplying electricity in any local area for any purpose at the time of the passing of the Act may elect to continue supplying it without a license, and therefore without the obligations which may be imposed, or the privileges which may be conferred, by a license.

The 21st October, 1886. T. C. HOPE.

S. HARVEY JAMES,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Report of the Select Committee on the Bill to amend the law relating to Civil Courts in Bengal, the North-Western Provinces and Assam was presented to the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 21st October, 1886 :—

Preliminary Report on the Bengal Civil Courts Bill, 1881.

THE Bill to amend the law relating to Civil Courts in Bengal, the North-Western Provinces and Assam was introduced into the Council of the Governor-General by the Hon'ble Mr. Stokes in 1881, was referred to a Select Committee and was circulated for opinion, but its further progress was suspended in consequence of a proposal to establish appellate benches in Bengal. That proposal having been abandoned for the present, the opinions on the Bill of 1881 have been examined, and most of the recommendations in them incorporated in the amended copy of the Bill which accompanies this Report.

The few recommendations which have not been adopted have reference to the relation of Courts of Small Causes to District Courts, and will be best considered in connection with the Provincial Small Cause Courts Bill, 1885. I propose therefore to move at the next meeting of Council that all members of the Select Committee appointed to consider and report on that Bill who are residents of, or are or have been officially connected with, Bengal, the North-Western Provinces or Assam be added to the Select Committee on the Courts Bill to which this Preliminary Report relates.

2. The following portions of the amended Bill seem to call for remark :—

(*a*) *Section 5.*—A sub-section has been added on the advice of the Government of the North-Western Provinces and Oudh for the purpose of removing any doubt there may be as to the competence of a Local Government to appoint a Judge of a Court of Small Causes to be a Subordinate Judge, or to appoint a District Judge or Subordinate Judge to discharge temporarily the functions of another District Judge or Subordinate Judge, as the case may be, in addition to the performance of his own duties.

(*b*) *Section 7.*—The powers vested in the High Courts at Fort William and Allahabad by the Statute 24 & 25 Vic., cap. 104, section 15, seem to render it unnecessary to provide in this and other sections of the Bill that a District Judge is in all matters connected with the administration of the Courts to act under the control of the High Court, the District Judge being already in those matters under the obligation of obeying any instructions which the High Court may be pleased to issue.

(*c*) *Section 8.*—It has been objected that the provision of the Act of 1871 which requires an Additional Judge or Subordinate Judge in charge of the office of a District Judge to discharge "such of the current duties thereof as are connected with the filing of suits and appeals, the issue of processes and the like functions," is too indefinite, and has in practice resulted in inconvenience and loss to parties. An attempt is made in sub-section (*2*) of section 8 of the revised Bill to define more particularly the powers which an Additional Judge or Subordinate Judge in charge of the office of a District Judge may exercise.

(*d*) *Section 9.*—Objection has been taken by the High Court for the North-Western Provinces to the words "on leave" in section 9 of the Act of 1871, and to the words in the same section which empower the District Judge to transfer cases only to his own Court or to the Court of a Subordinate Judge. The High Court points out that a Subordinate Judge may be absent from his district otherwise than on leave, as, for instance, on deputation to another district, and that, where, as occasionally happens, the Court of a Subordinate Judge is for any tract of country the Court of lowest jurisdiction, it may be convenient to transfer cases from his Court to that of a Munsif. The section has in these respects been amended, and two sub-sections (*3*) and (*4*) have been added, the former being supplementary to the amendment of sub-section (*1*), and the latter designed to remove a difficulty which has been felt in the North-Western Provinces.

(*e*) *Section 10.*—The expression of this section, which was inaccurate in the Act of 1871, has been amended in the manner proposed by Mr. Justice Prinsep.

(*f*) *Section 11.*—This section has been modified in accordance with the recommendations of the Lieutenant-Governor of Bengal, the Chief Commissioner of Assam and Mr. Justice Prinsep.

(*g*) *Section 16.*—A sub-section has, on the suggestion of Mr. Justice Prinsep, been added to meet the case of officers in the territories referred to in section 11 who dispose of civil business while on tour at any place within the local limits of their jurisdiction.

(*h*) *Section 17.*—On the suggestion of Mr. Justice Field, a sub-section has been added to the effect that a judicial act shall not be invalid by reason only of its having been done on a holiday.

(*i*) *Section 18.*—This section has been so drawn as to remove difficulties experienced in Bengal, the North-Western Provinces and Assam in the working of the corresponding section of the Act of 1871.

(*j*) *Section 21.*—A sub-section has been added with reference to the cases at 13 B. L. R. 376; 10 B. L. R., App., 30; 19 W. R. 201; and 8 C. L. R. 6.

(*k*) *Section 22.*—Sub-section (*2*) of this section has been re-drawn with advertence to the cases at 18 W. R. (F. B.) 261; 18 W. R. 316; and 19 W. R. 131.

Sub-section (*3*) has been added on the suggestion of Mr. Justice Prinsep.

(*l*) *Section 23.*—The case at I. L. R. 7 All. 775 suggests an expansion of this section.

(*m*) *Section 25.*—Sub-section (*1*) will empower the District Judge to transfer appeals from orders of Munsifs, as well as from their decrees, to Subordinate Judges.

Sub-section (*2*) has, on the suggestion of Mr. Justice Prinsep, been so drawn as to enable the District Judge to transfer to any other competent Court under his control an appeal withdrawn from the Court of a Subordinate Judge.

Sub-section (*3*) is suggested by the cases at 16 W. R. 235 and 18 W. R. 292.

(*n*) *Section 26.*—This section has been amended in several particulars. It is proposed, on the suggestion of Mr. Justice Field, that the order of the High Court may be either general or special; on the suggestion of Mr. Justice Prinsep, that the High Court may authorise a Subordinate Judge or Munsif to take cognizance of the proceedings mentioned in the section; on the suggestion of the Government of the North-Western Provinces and Oudh, that references by Collectors under section 322C of the Code of Civil Procedure should be added to the list of proceedings; and on the suggestion of the same Government and of Mr. Justice Field and Mr. Justice Maclean, that several of the proceedings specified in section 26 of the Bill of 1881 should be excluded therefrom.

(*o*) *Section 27.*—On the suggestion of Mr. Justice Prinsep, it is proposed that appeals from orders passed by Subordinate Judges in proceedings mentioned in section 26 shall, when appeals are permitted, lie to the High Court.

(*p*) *Section 34.*—With respect to section 35 of the Bill of 1881, Mr. C. J. Daniell, District Judge of Moradabad, recorded the following remarks:—

"I consider it essential to the efficiency of the ministerial officers of the subordinate Civil Courts in a judgeship that a stream of promotion should be maintained from the lowest to the highest grade of these officials throughout the judgeship. If this is secured, every hard-working man knows that there are several appointments to which he can aspire, the field for his promotion is widened, and he is more encouraged to do his work well than if he had only to look to the rare vacancies in a single munsifi for advancement. On the other hand, the Judge can promote any man from any one of several situations to any other that he may be qualified for in the whole judgeship, and a stimulus is provided to efficient and industrious work which is entirely absent if the Judge can promote no one but the officials of his own office, or if, in order to promote a deserving man in a munsifi, he is obliged to place him over the heads of other men in his own office, without being at the same time able to provide any of his own officials with a step on promotion in any of the munsifis subordinate to him.

"There can, I think, be no doubt that better men are obtainable and better work done in a wide than in a narrow field of work; but this section (35), as it stands, reduces the area over which a subordinate official's career extends within the most confined limits.

* * * * * * * * * *

"In former times, when the subordinate Civil Courts were never inspected, something might be said in favour of allowing Munsifs to nominate and promote the officials of their own Courts; but in these days Munsifs are frequently changed, while Judges are seldom changed, and a judgeship is becoming more and more the unit of judicial administration. It is as well that this should be so, for such a condition is an incentive to a more careful supervision on the part of a Judge over his subordinates, and consequently to better work on the part of all below him. This incentive, however, will fail to act if the area of nomination and selection in a judgeship is confined to single munsifis instead of extending to all the Courts in the judgeship."

The Government of the North-Western Provinces expressed concurrence in Mr. Daniell's remarks, as the Government of Bengal did in similar remarks recorded by Mr. Justice Field.

(*q*) *Section 35.*—This section provides for the case of Civil Court amins and the joint process-serving establishments now maintained throughout Bengal and the North-Western Provinces under the superintendence of central nazirs and the control of the District Judge.

(*r*) *Section 38.*—The addition to this section was suggested by Mr. Justice Oldfield.

(*s*) *Section 40.*—This section seems to be required for the purposes of applications under section 108 of the Code of Civil Procedure and other proceedings not referred to in sections 623 and 649 of that Code.

No. II.

A Bill to consolidate and amend the law relating to Civil Courts in Bengal, the North-Western Provinces and Assam.

WHEREAS it is expedient to consolidate and amend the law relating to Civil Courts in Bengal, the North-Western Provinces and Assam; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

[Act VI of 1871, s. 1.] Short title, local extent, commencement and application.

1. (*1*) This Act may be called the Bengal Civil Courts Act, 1887.

(*2*) It extends to the territories for the time being respectively administered by the Lieutenant-Governor of Bengal, the Lieutenant-Governor of the North-Western Provinces and the Chief Commissioner of Assam, except such portions of those territories as for the time being are not subject to the ordinary civil jurisdiction of the High Courts and except the Jhánsí Division; and

(*3*) It shall come into force on the first day of April, 1887.

(*4*) Except this section and sections 17, 23, 28, 40 and 41, nothing in this Act applies to Courts of Small Causes established under the Provincial Small Cause Courts Act, 1887.

VI of 1871. Repeal.

2. (*1*) The Bengal Civil Courts Act, 1871, and Act No. XIX of 1877 (*to enable certain District Judges to suspend and remove certain ministerial officers, and for other purposes*), section 1, are hereby repealed:

(*2*) But all appointments, nominations, rules and orders made, jurisdiction and powers conferred, and lists published under the Bengal Civil Courts Act, 1871, or any enactment thereby repealed, shall be deemed to be respectively made, conferred and published under this Act; and

(*3*) Any enactment or document referring to the Bengal Civil Courts Act, 1871, or to any enactment thereby repealed, shall be construed to refer to this Act or to the corresponding portion thereof.

CHAPTER II.

CONSTITUTION OF CIVIL COURTS.

[Act VI of 1871, ss. 3 & 4.] Number of District Judges and Subordinate Judges.

3. The Local Government may reduce, and, with the previous sanction of the Governor-General in Council, increase, the number of District Judges and Subordinate Judges now fixed.

[Act VI of 1871, s. 4.] Number of Munsifs.

4. The Local Government may, subject to the control of the Governor-General in Council, alter the number of Munsifs now fixed:

Provided that, except in the case of Munsifs of a grade the salary of which does not exceed two hundred and fifty rupees per mensem, an increase of the number of Munsifs now fixed shall not be made by the Local Government without the previous sanction of the Governor General in Council.

[Act VI of 1871, s. 5.] Vacancies in District or Subordinate Judgeships.

5. (*1*) Whenever the office of District Judge or Subordinate Judge is vacant by reason of the death, resignation or removal of the Judge or other cause, or whenever the Governor General in Council has sanctioned an increase of the number of District Judges or Subordinate Judges, the Local Government shall fill up the vacancy or appoint the additional District Judges or Subordinate Judges, as the case may be.

(*2*) Nothing in this section shall be construed to prevent a Local Government from appointing any Judge of a Court of Small Causes to be also a Subordinate Judge, or from appointing a District Judge or Subordinate Judge to discharge, for such period as it thinks fit, in addition to the functions devolving on him as such District Judge or Subordinate Judge, all or any of the functions of another District Judge or Subordinate Judge, as the case may be.

[Act VI of 1871, s. 6.] Vacancies in Munsifships.

6. (*1*) Whenever the office of Munsif is vacant, or whenever the Local Government increases the number of Munsifs, the High Court shall nominate such person as it thinks fit to be a Munsif, and the Local Government shall appoint him accordingly.

(*2*) The Local Government may, with the previous sanction of the Governor General in Council, make rules as to the qualifications of persons to be appointed to the office of Munsif.

(*3*) When rules have been made under sub-section (*2*), a person shall not be nominated under sub-section (*1*) unless he possesses the qualifications required by the rules.

[Act VI of 1871, s. 7.] Additional Judges.

7. (*1*) When the business pending before any District Judge requires the aid of Additional Judges for its speedy disposal, the Local Government may, upon the recommendation of the High Court, and with the previous sanction of the Governor General in Council, appoint such Additional Judges as may be requisite.

(*2*) Additional Judges so appointed shall discharge any of the functions of a District Judge which the District Judge may assign to them, and, in the discharge of those functions, they shall exercise the same powers and be subject to the same control as the District Judge.

[Act VI of 1871, s. 8.] Temporary charge of District Judgeship.

8. (*1*) In the event of the death, resignation or removal of the District Judge, or of his being incapacitated by illness or otherwise for the performance of his duties, or of his absence from the place at which his Court is held, the Additional Judge, or, if an Additional Judge is not attached to the Court, the senior Subordinate Judge present at the place where the office of the District Judge is situate, shall, without relinquishing his ordinary duties, assume charge of that office, and shall continue in charge thereof until the office is resumed by the District Judge or assumed by an officer duly appointed thereto.

(*2*) While in charge of the office of the District Judge, the Additional Judge or Subordinate Judge, as the case may be, may, subject to any rules which the High Court may make in this behalf, exercise any of the powers of the District

(Chapter III.—Ordinary Jurisdiction.—Section 18.)

Judge with respect to the admission of plaints, applications and appeals, the issue and stay of process before judgment or in execution of a decree or order, and the transfer of suits and other proceedings.

[Act VI of 1871, s. 9.]

Transfer of proceedings on vacation of office of Subordinate Judge.

9. (*1*) In the event of the death, resignation or removal of a Subordinate Judge, or of his being incapacitated by illness or otherwise for the performance of his duties, or of his absence from the place at which his Court is held, the District Judge may transfer all or any of the proceedings pending in the Court of the Subordinate Judge either to his own Court or to any Court under his control competent to dispose of them.

(*2*) Proceedings transferred under this section shall be disposed of as if they had been instituted in the Court to which they are so transferred.

(*3*) Notwithstanding anything in section 25 of the Code of Civil Procedure, if a suit of which the amount or value of the subject-matter exceeds fifty rupees is transferred to the Court of a Munsif under this section from the Court of a Subordinate Judge exercising with respect thereto the jurisdiction of a Judge of a Court of Small Causes, the Court of the Munsif shall not, for the purposes of the suit, be deemed to be a Court of Small Causes. XIV of 1882.

(*4*) For the purposes of applications which are not pending in the Court of the Subordinate Judge on the occurrence of an event referred to in sub-section (*1*), and with respect to which that Court has exclusive jurisdiction, the District Judge may exercise all or any of the jurisdiction of that Court.

[Act VI of 1871, s. 9.]

Temporary charge of Munsifship.

10. (*1*) A District Judge, on the occurrence within the local limits of his jurisdiction of any vacancy in the office of Munsif, may appoint such person as he thinks fit to act in the office until that person is relieved by a Munsif appointed under section 6 or his appointment is cancelled by the District Judge.

(*2*) The District Judge shall forthwith report to the High Court the occurrence of every such vacancy and the making and cancelling of every such appointment.

[Act VI of 1871, s. 10.]

Power to confer judicial powers on officers in Chutiá Nágpur, Jalpaigori, Darjiling and Assam.

11. (*1*) The Local Government may invest with the powers of any Court under this Act any officer in the Chutiá Nágpur Division, or in the Jalpaigori or Darjiling Division, or in any part of the territories administered by the Chief Commissioner of Assam except the district of Silhat, or in any other part of the territories to which this Act extends, and to which the Governor-General in Council has, by notification in the official Gazette, declared this section to apply.

(*2*) Nothing in sections 3 to 10 (both inclusive) or sections 30 to 39 (both inclusive) applies to any officer so invested, but all the other provisions of this Act shall apply to him so far as those provisions can be made applicable.

[Act VI of 1871, s. 11.]

Control of Civil Courts

12. Subject to the superintendence of the High Court, the District Judge shall control all the Civil Courts within the local limits of his jurisdiction.

[Act VI of 1871, s. 12.]

Present Judges to be deemed duly appointed.

13. Appointments of District Judges, Additional Judges, Subordinate Judges and Munsifs made before the commencement of this Act shall be deemed to have been made in accordance with law.

[Act VI of 1871, s. 14.]

Seals of Courts.

14. Every Court under this Act shall use a seal of such form and dimensions as are for the time being prescribed by the Local Government.

[Act VI of 1871, s. 15.

District Judges, Additional Judges, Subordinate Judges and Munsifs to be deemed Civil Courts.

15. Every District Judge, Additional Judge, Subordinate Judge and Munsif under this Act shall be deemed to be a Civil Court within the meaning of the Code of Civil Procedure and of this Act. XIV of 1882.

[Act VI of 1871, s. 16.]

Place of sitting of Courts.

16. (*1*) The Local Government may, by notification in the official Gazette, fix and alter the place or places at which any Court under this Act is to be held.

(*2*) All such places now fixed shall be deemed to be fixed under this Act.

(*3*) Where the place at which a Court under this Act is to be held has not been fixed, the Court may be held at any place within the local limits of its jurisdiction.

[Act VI of 1871, s. 17.]

Vacation.

17. (*1*) Subject to such orders as may be issued by the Governor General in Council, the High Court shall prepare a list of days to be observed in each year as close holidays in the Courts subordinate thereto.

(*2*) The list shall be published in the local official Gazette.

(*3*) A judicial act done by a Civil Court on a day specified in the list shall not be invalid by reason only of its having been done on that day.

CHAPTER III.

ORDINARY JURISDICTION.

[Act VI of 1871, s. 18.

Power to fix local limits of jurisdiction.

18. (*1*) The Local Government shall fix, and may vary, the local limits of the jurisdiction of any Court under this Act.

(*2*) If the same local jurisdiction is assigned to two or more Subordinate Judges or to two or more Munsifs, the District Judge may assign to each of them such civil business cognizable by the Subordinate Judge or Munsif, as the case may be, as he thinks fit.

(*3*) Where, in the territories mentioned in section 11, the same local jurisdiction is assigned to two or more officers invested with the powers of a Munsif, the officer invested with the powers of a District Judge may, with the previous sanction of the Local Government, delegate his functions under sub-section (*2*) to an officer invested with the powers of a Subordinate Judge or to one of the officers invested with the powers of a Munsif.

The Bengal Civil Courts Bill, 1886.
(Chapter III.—Ordinary Jurisdiction.—Sections 19-24.)
(Chapter IV.—Special Jurisdiction.—Sections 25-26.)

(4) A Judge of a Court of Small Causes appointed to be also a Subordinate Judge or Munsif is a Subordinate Judge or Munsif, as the case may be, within the meaning of this section.

(5) The present local limits of the jurisdiction of every Civil Court (other than the High Court) shall be deemed to be fixed under this Act.

[Act VI of 1871, s. 19.]

Extent of original jurisdiction of District Judge or Subordinate Judge.

19. The jurisdiction of a District Judge or Subordinate Judge extends, subject to the provisions of section 15 of the Code of Civil Procedure, to all original suits for the time being cognizable by the Civil Courts.

XIV of 1882.

[Act VI of 1871, s. 20.]

Extent of jurisdiction of Munsif.

20. The jurisdiction of a Munsif extends to all like suits in which the amount or value of the subject-matter in dispute does not exceed one thousand rupees.

[Act VI of 1871, s. 21.]

Appeals from District Judges and Additional Judges.

21. (1) Save as provided by the Code of Civil Procedure or by any other enactment for the time being in force, an appeal from a decree or order of a District Judge or Additional Judge shall lie to the High Court.

XIV of 1882.

(2) An appeal shall not lie to the High Court from a decree or order of an Additional Judge in any case in which, if the decree or order had been made by a District Judge, an appeal would not lie to that Court.

[Act VI of 1871, s. 22.]

Appeals from Subordinate Judges and Munsifs.

22. (1) Save as otherwise provided by the Code of Civil Procedure or by any other enactment for the time being in force, an appeal from a decree or order of a Munsif shall lie to the District Judge.

XIV of 1882.

(2) Save as aforesaid, an appeal from a decree or order of a Subordinate Judge shall lie—

(a) to the District Judge where the amount or value of the subject-matter in dispute in the original suit in which or in any proceeding arising out of which the decree or order was made did not exceed five thousand rupees, and

(b) to the High Court in any other case.

(3) Where the function of receiving any appeals which lie to the District Judge under sub-section (1) or sub-section (2) has been assigned to an Additional Judge, the appeals may be preferred to the Additional Judge.

(4) The High Court may, with the previous sanction of the Local Government, order, by notification in the official Gazette, that appeals lying to the District Judge under sub-section (1) from the decrees and orders of any Munsif shall be preferred to the Court of such Subordinate Judge as may be mentioned in the notification, and the appeals shall thereupon be preferred accordingly.

[Act VI of 1871, s. 24.]

Certain decisions to be according to Native law.

23. (1) Where in any suit or other proceeding it is necessary for any Court under this Act to decide any question regarding succession, inheritance, marriage or caste or any religious usage or institution, the Muhammadan law in cases where the parties are Muhammadans, and the Hindu law in cases where the parties are Hindus, shall form the rule of decision, except in so far as that law has by legislative enactment been altered or abolished.

(2) In cases not provided for by sub-section (1) or by any other law for the time being in force, the Court shall act according to justice, equity and good conscience.

[Act VI of 1871, s. 25.]

Judges not to try suits in which they are interested.

24. (1) A Munsif, Subordinate Judge, Additional Judge or District Judge shall not try any suit to which he is a party or in which he is personally interested, or adjudicate upon any proceeding connected with or arising out of any such suit.

(2) A Subordinate Judge, Additional Judge or District Judge shall not try an appeal against a decree or order passed by himself in another capacity.

(3) When any such suit, proceeding or appeal as is referred to in sub-section (1) or sub-section (2) comes before any such Munsif, Subordinate Judge, Additional Judge or District Judge, he shall forthwith transmit the record of the case to the Court to which he is immediately subordinate, with a report of the circumstances attending the reference

(4) The superior Court shall thereupon dispose of the case under section 25 of the Code of Civil Procedure. XIV of 1882.

(5) Nothing in this section shall be deemed to affect the extraordinary original civil jurisdiction of the High Court.

(6) For the purposes of this section the Munsif and Subordinate Judge shall be deemed to be immediately subordinate to the District Judge, and the Additional Judge and District Judge to the High Court.

CHAPTER IV.

SPECIAL JURISDICTION.

[Act VI of 1871, ss. 26 & 27.]

Power to transfer to Subordinate Judges appeals from Munsifs.

25. (1) A District Judge may transfer to any Subordinate Judge under his control any appeals pending before him from decrees or orders of Munsifs.

(2) The District Judge may withdraw any appeal so transferred, and either hear and dispose of it himself or transfer it for disposal to another competent Court under his control.

(3) Appeals transferred under this section shall be disposed of subject to the rules applicable to like appeals when disposed of by the District Judge.

[Act VI of 1871, s. 27.]

Exercise by Subordinate Judge or Munsif of jurisdiction of District Court in certain proceedings.

26. (1) The High Court may, by general or special order, authorise any Subordinate Judge or Munsif to take cognizance of, and any District Judge to transfer to a Subordinate Judge or Munsif under his control, any of the proceedings next hereinafter mentioned or any class of those proceedings specified in the order.

(2) The proceedings referred to in sub-section (1) are the following, namely :—

(a) proceedings under Bengal Regulation V 1799 (*to limit the Interference of the Zillah*

(Chapter IV.—Special Jurisdiction.—Sections 27-28.—Chapter V.—Misfeazance.—Sections 29-32.—Chapter VI.—Ministerial Officers.—Sections 33-36.)

and City Courts of Dewanny Adawlut in the Execution of Wills and Administration to the Estates of Persons dying intestate);

(*b*) applications for certificates under Act No. XXVII of 1860 (*for facilitating the collection of debts on successions, and for the security of parties paying debts to the representatives of deceased persons*); and

(*c*) references by Collectors under section 322C of the Code of Civil Procedure. XIV of 1882.

(*3*) The District Judge may withdraw any such proceedings taken cognizance of by, or transferred to, a Subordinate Judge or Munsif, and may either himself dispose of them, or transfer them for disposal to any other competent Court under his control.

[Act VI of 1871, s. 28.] Disposal of proceedings referred to in last foregoing section.

27. (*1*) Proceedings taken cognizance of by, or transferred to, a Subordinate Judge or Munsif, as the case may be, under the last foregoing section shall be disposed of by him subject to the rules applicable to like proceedings when disposed of by the District Judge:

Provided that an appeal from an order of a Munsif in any such proceeding shall lie to the District Judge.

(*2*) An appeal from the order of the District Judge on the appeal from the order of the Munsif under this section shall lie to the High Court if a further appeal from the order of the District Judge is allowed by the law for the time being in force.

[Act VI of 1871, s. 29.] Power to invest Subordinate Judges and Munsifs with Small Cause Court jurisdiction.

28. The Local Government may, by notification in the official Gazette, confer, within such local limits as it thinks fit, upon any Subordinate Judge or Munsif the jurisdiction of a Judge of a Court of Small Causes under the Provincial Small Cause Courts Act, 1887, for the trial of suits cognizable by such Courts, up to such value not exceeding five hundred rupees in the case of a Subordinate Judge or fifty rupees in the case of a Munsif, as it thinks fit, and may withdraw any jurisdiction so conferred.

CHAPTER V.

MISFEAZANCE.

[Act VI of 1871, s. 31.] Suspension or removal of Judges by Local Government.

29. Any District Judge, Additional Judge, Subordinate Judge or Munsif may, for any misconduct, be suspended or removed by the Local Government.

[Act VI of 1871, s. 32.] Suspension of Subordinate Judge by High Court.

30. (*1*) The High Court may, whenever it sees urgent necessity for so doing, suspend any Subordinate Judge under its control.

(*2*) Whenever the High Court suspends a Subordinate Judge under sub-section (*1*), it shall forthwith report to the Local Government the circumstances of the suspension, and the Local Government shall make such order with respect thereto as it thinks fit.

[Act VI of 1871, s. 33.] Suspension or removal of Munsif by High Court.

31. (*1*) The High Court may appoint a Commission for inquiring into the alleged misconduct of any Munsif.

(*2*) On receiving the report of the result of any such inquiry, the High Court may, if it thinks fit, remove the Munsif from office, or suspend him, or reduce him to a lower grade.

(*3*) The provisions of Act No. XXXVII of 1850 (*for regulating Inquiries into the behaviour of Public Servants*) shall apply to inquiries under this section, the powers conferred by that Act on the Government being exercised by the High Court.

(*4*) The High Court may, previous to the appointment of a Commission under this section, suspend any Munsif pending the result of the inquiry.

(*5*) The High Court may, without appointing any such Commission, remove or suspend any Munsif, or reduce him to a lower grade.

[Act VI of 1871, s. 34.] Suspension of Munsif by District Judge.

32. (*1*) Any District Judge may, whenever he sees urgent necessity for so doing, suspend any Munsif under his control.

(*2*) Whenever a District Judge suspends a Munsif under sub-section (*1*), he shall forthwith report to the High Court the circumstances of the suspension, and the High Court shall make such order with respect thereto as it thinks fit.

CHAPTER VI.

MINISTERIAL OFFICERS.

[Act VI of 1871, s. 35.] Appointment and removal of ministerial officers of District Judges and Additional Judges.

33. District Judges and Additional Judges shall appoint the ministerial officers of their respective Courts, and, subject only to the control of the Local Government, may remove or suspend those officers or fine them in an amount not exceeding one month's salary.

[Act VI of 1871, s. 36.] Appointment and removal of ministerial officers of Subordinate Judges and Munsifs.

34. (*1*) The ministerial officers of the Courts of Subordinate Judges and Munsifs shall be appointed—

(*a*) in the case of a vacancy not likely to last, and not lasting, longer than one month, by those Courts respectively, and

(*b*) in any other case, by the District Judge.

(*2*) A Subordinate Judge or Munsif may, by order, remove or suspend or fine in an amount not exceeding one month's salary, any of the ministerial officers of his Court who is guilty of any misconduct or neglect in the performance of the duties of his office.

[New.] Appointment and removal of ministerial officers on joint establishments.

35. Ministerial officers ordinarily employed in the service or execution of the processes of more than one Court shall be appointed, and may be removed or suspended, by the Court of highest grade by which they are employed; and any Court by which they are employed may, by order, fine them in an amount not exceeding one month's salary.

[Act XIX 1871, s. 1.] General powers of District Judge.

36. (*1*) The District Judge may, by order, suspend or remove any ministerial officer to whom section 34 or section 35 applies,

The Bengal Civil Courts Bill, 1886.

(Chapter VI.—Ministerial Officers.—Sections 37-39.)

(Chapter VII.—Supplemental Provisions.—Sections 40-41.)

and may, on appeal or otherwise, reverse or modify any order made under either of those sections by any Court under his control.

(2) The District Judge shall himself be subject to the control of the Local Government in the exercise of the powers conferred on him by sub-section (1).

37. Nothing in the foregoing sections of this Chapter shall exempt any officer from any penal or other consequences to which he may be liable under any other law for the time being in force.

Saving of penal and other consequences under other laws

[Act VI of 1871, s. 37.]

38. (1) The Local Government may, at the instance of the High Court or of the District Judge, transfer from any Court in the territories under its administration to any other Court in those territories all or any of the ministerial officers of any District Judge, Additional Judge, Subordinate Judge or Munsif.

Transfer of ministerial officers.

(2) The District Judge may transfer all or any of the ministerial officers of any Court under his control to any other such Court.

39. Any fine imposed under this Chapter shall, if the order imposing it so directs, be recovered by deduction from the salary of the person fined.

[Act VI of 1871, s. 39.]

Recovery of fines.

CHAPTER VII.

SUPPLEMENTAL PROVISIONS.

40. (1) Where a Court has from any cause ceased to have jurisdiction with respect to any case, any proceeding in relation to that case which, if that Court had not ceased to have jurisdiction, might have been had therein may be had in the Court to which the business of the former Court has been transferred.

[New]

Continuance of proceedings of abolished Courts.

(2) Nothing in this section applies to cases for which provision is made in section 623 or section 649 of the Code of Civil Procedure or in any other enactment for the time being in force.

XIV of 1882.

41. All powers conferred by this Act may be exercised from time to time as occasion requires.

PROHIBITION AGAINST THE INTRODUCTION INTO WESTERN AUSTRALIA OF HORNED CATTLE, SHEEP AND SWINE FROM PLACES BEYOND THE LIMITS OF THE AUSTRALIAN COLONIES.

No. 3308—86, dated Perth, the 13th August 1886.

From—M. S. SMITH, Esq., Acting Colonial Secretary, Western Australia,
To—The Hon'ble the Home Secretary to the Government of India, Calcutta.

I HAVE the honour, by direction of His Excellency Governor Sir F. N. Broome, to enclose six copies of a Proclamation, issued on the 26th ultimo, prohibiting the introduction into Western Australia from any place beyond the limits of the Australasian Colonies of all horned cattle, sheep, and swine, and to request that you will kindly give due publicity to the same.

No. 2676.—C.S.O.

PROCLAMATION

Western Australia, to wit.

(L. S.)
F. NAPIER BROOME,
Governor.

BY His Excellency SIR FREDERICK NAPIER BROOME, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief in and over the Territory of Western Australia and its Dependencies, &c., &c., &c.

WHEREAS under the provisions of an Act of the Legislative Council, passed in the 43rd year of the reign of Her present Majesty, numbered 23, intituled "An Act for the prevention of the Importation of Diseased Stock," the Governor, with the advice of the Executive Council, is empowered by Proclamation to prohibit the introduction into the Colony, either by land or sea, of any cattle within the meaning of the said Act and of "The Cattle Diseases Ordinance, 1865," and "The Imported Stock Act, 1876," or either of them: Now THEREFORE I, the said Governor, in exercise of such power and of all other powers enabling me in this behalf, do by this Proclamation, with the advice of the Executive Council, prohibit the importation into, and landing in, Western Australia, either by land or sea, from Great Britain or Ireland, or from any other place beyond the limits of the Australasian Colonies, of all horned cattle, sheep, and swine.

Given under my hand and under the Public Seal of the said Colony, this twenty-sixth day of July 1886.

By His Excellency's Command,

M. S. SMITH,
Acting Colonial Secretary.

GOD SAVE THE QUEEN!!!

RESOLUTION ON THE BENGAL FOREST ADMINISTRATION REPORT FOR 1885-86.

REVENUE DEPARTMENT—FORESTS.

Darjeeling, the 5th November 1886.

RESOLUTION.

READ—

The Progress Report of Forest Administration in Bengal for 1885-86.

Mr. Home was in charge of the Department throughout the year, but the report is submitted by Mr. Chester, who officiated as Conservator of Forests during the months of July and August 1886. The Lieutenant-Governor is glad to notice that, in accordance with the view expressed in last year's Resolution, the dimensions of the report have been considerably curtailed, though, owing doubtless to the fact that it was not compiled by the officer who had actually administered the Department during the year, it is still open to the objection that it is rather a summary of details than a review of the broad facts of the year's administration.

Area of forests.

2. The forests of Bengal under the superintendence of the Department covered, at the close of the year under review, an area of 7,332,616 acres, or 11,457 square miles, classified as follows:—

		Acres.
Reserved forests		3,182,123
Protected ,, ...		1,419,845
District ,, ...		2,581,420
	Total ...	7,183,388
Proposed reserves not yet finally gazetted	...	149,228
	Total ...	7,332,616

There was an increase of 57,856 acres in the area of reserved forests, owing to additions in the Orissa and Jalpaiguri Divisions. The area of protected forests has remained very much as before, while the Department has been relieved of the superintendence of a wide extent of district forest. On the whole, the area watched has diminished by 171,818 acres. Describing the forests, according to their geographical distribution, it may be noticed that 2,254,750 acres are included in the swampy wastes of the Sunderbuns in the 24-Pergunnahs and Khulna, while the 2,581,420 acres of "district forests" and 886,740 acres of the reserves comprise the whole of the unleased portion of the Chittagong Hill Tracts. The Sunderbuns reserves with 75 square miles of protected forests cover more than two-fifths of the area of the district of Khulna, and the protected forests spread over the greater portions of the sub-divisions of Baseerhat and Diamond Harbour in the 24-Pergunnahs, their extent in that district being 1,867 square miles out of the total district area of 3,964 square miles. Of the rest, the most important forest areas are on the Himalayan slopes in the district of Darjeeling, in the rich Terai of Jalpaiguri, and in the wild country of Singbhoom. The Khorda sub-division of Orissa contributes an area of 227,459 acres of forests, and Angul 179,200 acres. The list is closed with the smaller forests of Lohardugga and Hazaribagh.

Demarcation. Surveys.

3. Information has for the first time been collected during the year under review regarding the length of the boundaries of all Bengal forests, except those in Orissa. The Conservator reports that the statements recorded will be of great use to divisional officers in the annual work of clearing boundaries and keeping boundary posts in repair. Nine hundred and twelve miles of boundaries were recleared during the year, and 593 miles were kept clear as firetraces. Two hundred and three miles also were newly demarcated. The average cost per mile of the new demarcation was unusually high, Rs. 14-5, as compared with Rs. 6-13 in the previous year and Rs. 7-11 in 1883-84. Some explanation of this circumstance should have been furnished. Satisfactory progress was made in the surveys of boundaries in Darjeeling, Jalpaiguri, Chota Nagpore, and Singbhoom.

Working plans.

4. The provision of detailed working plans for all forests, to guide the controlling officers in their management for a long series of years, is a point on which much stress has been laid by the Government of India; and it is clear that without such plans no thoroughly systematic administration can be expected. Little could be done in this direction during the year, owing to want of the proper establishment. It was found necessary to trust the work to an officer already in charge not only of a forest division, but also of two of its sub-divisions, and it was naturally impossible for him to find much time for the extra duties thus imposed on him. Since the close of the year, a special working plans division has been created, in charge of an officer who can devote the greater part of his time to the work, and better progress may now be expected.

Establishments.

5. The list of the Bengal controlling staff continued to be combined with that of Assam during the year under review. Since the commencement of the current year, a separation has been mutually agreed on and carried out

6. Prosecutions were instituted during the year against one forest ranger and six forest guards, the charges being either criminal breach of trust or misappropriation of Government money. Three of the cases resulted in conviction; the other four accused persons were discharged. An officiating forester, against whom a warrant was out at the close of the previous year, was arrested in January last, and convicted of criminal breach of trust. Seven other subordinates, who had been dismissed the service on various charges, were reinstated during the year either by the Conservator himself, or by the orders of Government; and, from the cases which came before him on appeal, the Lieutenant-Governor was compelled to arrive at the conclusion that divisional forest officers do not observe with sufficient strictness the procedure prescribed for the disposal of charges brought against subordinates, with the result that the conclusions arrived at cannot always be supported. No officer can be dismissed from the service of Government without a full opportunity being given to him of explaining clearly specified charges alleged against him

Breaches of forest law.

7. Six hundred and twenty-four new cases of breaches of forest law and offences under the Penal Code were taken into court, and 739 cases were compounded, against 443 and 800 cases, respectively, in the previous year; 222 of the prosecutions actually proceeded with were instituted in the Darjeeling Division, chiefly cases of unauthorized felling and grazing, and 215 convictions were obtained; and 127 cases occurred in the Sunderbuns, of which the large majority were prosecutions of permit-holders for not returning their permits. Most of the Sunderbuns cases appear to have been instituted towards the close of the year, for no less than 88 remained pending at its close. In the Khorda sub-division of Orissa, 199 cases were prosecuted under the Penal Code, 163 of which resulted in conviction. The Sunderbuns division, as usual, shows the largest number of cases compounded, 317, the whole amount realised as compensation to Government in the division being Rs 5,886, of which one case of cutting *sundri* wood, east of the Pussar river, accounts for no less than Rs. 4,035. The percentage of convictions to cases tried was 73·9,* a lower figure than that shown in either of the two preceding years. This falling off in convictions, taken with the increase in the number of prosecutions, will remind the Conservator of the necessity of very closely supervising the conduct of such cases.

* The Conservator gives 86·4 as the percentage, which seems to be a mistake.

Forest fires.

8. The area of forest which it has been attempted to protect from fire has been largely extended during the past two years. In 1883-84, action was confined to 530,071 acres, in 1884-85 the Department sought to protect 806,209 acres, and in the year under review the area placed under protection rose to 829,253 acres. The additional areas taken in hand are in the Angul and Singbhoom forests, where great difficulties have to be encountered, arising in Angul from the impossibility of properly clearing the boundary at the numerous points where its exact position is a matter of dispute with the adjoining Native States; and, in Singbhoom from the wild character of the aboriginal races inhabiting the forests, who have been accustomed from time immemorial to burn the jungle at certain seasons, and do not listen readily to any arguments in favour of relinquishing their ancient practice. In Singbhoom, only 20,900 acres out of

101,120 were successfully protected, and the whole of the area in which no measures of protection were attempted, viz. 233,480 acres, was burnt. The results were rather better in Angul, where out of 179,200 acres success was attained in the case of 106,614 acres. In all other forests the measures taken proved unusually successful. Of 548,938 acres taken in hand, only 12,304 were burnt; in other words, the percentage of failure in these forests was only 2·2; but the total percentage was raised, by the inclusion of Singbhôom and Angul, to 20. Although, as regards the ratio of success to failure, Bengal is far behind other provinces in which protective operations on a large scale are attempted, the statistics given in the Inspector-General of Forests' Review of Forest Administration in British India for 1884-85 show that immunity from fire is secured in Bengal at a less cost per acre than in any other province, except the Central Provinces and Berar, and it would certainly be undesirable to contract operations in order to reduce the percentage of failure. The difficulty felt in Angul will probably be solved by the survey of that mehal now in contemplation; and the obstacles which the Sub-divisional Officer of Singbhoom states that he finds in the way of getting the Kols to understand that forests are not to be fired may be overcome by patience and judicious explanations, joined with the necessary coercive measures Excluding Singbhoom, only 667 acres, out of an area of 2,119,390 acres in which no special protective measures were attempted, suffered from fire. In the Jalpaiguri division the persons who had originated the fires were arrested in two cases, and on conviction were sentenced, one to a fine of Rs 25, the other to three months' imprisonment.

Grazing.

9. Grazing rules were finally passed for the Darjeeling sub-division in the course of the year; and it is satisfactory to learn that the graziers observe them willingly and have ceased to agitate for further privileges. The grazing of buffaloes, goats, and sheep has been forbidden in the areas required for the supply of timber and fuel to Darjeeling, Jallapahar, and tea-plantations; and in the Teesta sub-division the monthly fees for buffaloes and goats have been raised to six annas and two annas a head, respectively. In the report for 1884-85 it was stated that the number of cattle grazed had been reduced from 28,276 to 24,649; but it now appears that these figures referred only to the number of permits issued; and as some of these permits were granted monthly and some quarterly, while others again held good for a year, the figures supplied did not indicate the true number of cattle admitted during the year to graze in the forest. In the present report the average number of cattle so admitted has been struck; and if this practice is maintained, a fair comparison can in future be instituted between one year and another. Judging from the amount of fees realised, there appears to have been a slight increase in grazing. The receipts for the past two years have been as follows:—

	1884-85.	1885-86.
	Rs.	Rs.
Fees for grazing	4,842	5,054
Ditto fodder grass	1,395	1,359
Total revenue for grazing ...	6,237	6,413

Plantations and conservancy.

10. One hundred and forty-six acres of regular plantations were added during the year, and the cost of this work, with that of preserving the plantations previously existing, amounted to Rs. 6,110. Seventy-seven acres were planted out in Orissa, but the result of the extension is reported to have been unsatisfactory, and 50 acres of tún were added in the Darjeeling sub-division. The Conservator reports that larger areas would have been planted out had he not received orders under the general financial retrenchments to reduce expenditure. There are now 2,150 acres of regular plantations, and 931 acres more come under the head of "Cultural operations"—a term which includes the filling in of blank spaces in forests in aid of natural reproduction, and the formation of nurseries in connection with these operations. Of the whole area of 3,081 acres, 1,032 are covered by hill trees, mainly oak and tún, and 1,669 acres by plains trees, teak, tún, sâl, &c. The greater portion of the remaining area is planted with bamboos. Special attention was paid to the cutting of creepers in Kurseong, where 2,612 acres were freed from creepers at a cost of 1½ annas

per acre, and in Buxa, where creepers were cut over 7,198 acres, at a cost slightly exceeding half an anna per acre.

11. Experiments with mahogany seed were continued during the year. The seed would not germinate at Darjeeling or Kurseong; but on its removal to the Terai a moderate degree of success was attained. In the Buxa and Chittagong Divisions the seed germinated freely, but in Chota Nagpore it was less successful. In Chittagong, divi-devi and paper mulberry seedlings were successfully planted out, but India-rubber again proved a failure.

Communications and buildings.

12. Thirty-six new lines of export roads and inspection paths were opened, and 191 existing lines repaired during the year at a cost of Rs. 10,154. Of this sum, Rs. 4,637 had been expended in 1881-82 on the Goompahar cart-road in the Darjeeling sub-division, since made over to the Public Works Department, and was finally debited during the year under review. The greater portion of the new work was done in the Kurseong, Hazaribagh, and Singbhoom sub-divisions. Rupees 24,493 were expended during the year in constructing and repairing buildings.

Yield and working.

13. The following statement shows the total amount of produce removed from the forests during the year as compared with the previous year:—

Departmental working, that is to say, the felling, collection and carrying of timber and other forest produce by departmental agency, is little resorted to in Bengal, the greater part, both of timber and fuel, being removed from the forest under the permit system. Under the head of "Timber" direct operations of the Department were almost entirely confined to the removal of sâl logs from the remote parts of the reserved forests in the Buxa and Orissa Divisions. Of the 160,298 cubic feet of fuel removed by departmental agency, the Darjeeling sub-division accounts for 153,617 cubic feet, which is not more than half the quantity dealt with by the Department in the previous year. The reason of this appears to be that the supply of firewood to Darjeeling is now left almost entirely to the dealers, the Department only keeping up a reserve in order to prevent undue enhancement of prices. The increase in the quantity of both timber and fuel removed by permit-holders is accounted for by a revival of the demand for both classes of wood in the Sunderbuns. In the previous year it was reported that the firewood merchants, having large stocks on hand in Calcutta, were holding out against prepayment for produce removed from the forests, and this had caused a considerable falling off in the quantity removed from the Sunderbuns in 1884-85. As their stocks ran out, however, and they saw that it was hopeless to expect an alteration in the rules, the merchants gave up their opposition; and in 1885-86 removals of forest produce from the Sunderbuns were made on the same scale as in 1883-84. There was also a slight increase in the Teesta sub-division, due to larger demands for fuel on tea estates. On the other hand, the quantity of produce removed in the Darjeeling sub division greatly decreased, owing partly to the growing scarcity of trees fit for timber in the forests of this sub-division, and partly to the introduction of a new rule requiring enhanced prices for trees over eight feet in girth. There was a further falling off in removals from the reserves of the Buxa Division, unexplained in the report, but presumed to be due to timber merchants continuing to send their agents into the Bhootan forests, where timber is obtainable at almost nominal rates, in preference

to paying the rates fixed by Government in the Buxa reserves. It is understood that the Bhootan Government levy no fees for extraction of timber, and trees can therefore be brought across the frontier and sold at a profit by charging little more than the actual cost of felling and carrying away. The number of bamboos removed from the forests was 24,389,863 against 21,710,126 in the previous year.

Financial results.

14. The financial results of the year's working compare as follows with those of 1884-85:—

	Receipts.	Charges.	Surplus.
	Rs.	Rs.	Rs.
1884-85	5,71,152	4,11,915	1,59,237
1885-86	5,97,432	3,70,399	2,27,033

The gross revenue is not as large as it was in each of the three years from 1881-82 to 1883-84, and the surplus is not quite up to the amount reached during that period; but the charges have been less during the year under review than in any year since 1880-81; and, as will be seen from the following statement, the proportion of surplus to gross revenue has made a decided advance towards the percentage attained in 1882-83 and 1883-84:—

	Gross revenue.	Surplus.	Proportion of surplus to gross revenue.
	Rs.	Rs.	
1881-82	6,33,734	2,39,122	37·7 per cent.
1882-83 ...	6,93,959	3,11,776	44·9 ,,
1883-84	6,94,334	3,06,521	44·1 ,,
1884-85	5,71,152	1,59,237	28· ,,
1885-86	5,97,432	2,27,033	38· ,,

The Inspector-General's review of forest administration in British India for 1884-85 shows that, as regards proportion of surplus to gross revenue, Bengal in that year stood sixth on the list of the provinces of India; the improvement during the year under review should raise the province to the third place, unless a similar advance has been made in other provinces. The improvement was due almost entirely to increased receipts from the Sunderbuns, where the revenue depends mainly on the Calcutta demand for timber and firewood. There was also some increase in receipts from the Orissa forests, and from the small area under the Department in Chota Nagpore. The only divisions at present worked at a profit are the Sunderbuns, with a surplus of Rs. 2,79,742, and Chittagong with Rs. 66,578; the loss in the other divisions varies from Rs. 10,082 in Orissa to Rs. 54,268 in the new and only partially developed Chota Nagpore forests. In the Darjeeling Division the deficit was less than in the previous year; but owing to slack demand for timber, and the absence of departmental operations, increased deficits are shown against both Julpigoree and Buxa.

15. As a whole, the results must be regarded as creditable to the responsible officers. The falling off in outturn and receipts in the forests of the Himalayan ranges and the Terai is due to causes beyond the control of the Department, and, except as regards the Darjeeling sub-division, which was overworked in previous years, need not be regarded as other than temporary, while steady progress has been made in the other divisions in all branches of forest conservancy.

16. The Conservator, who has since his return from leave submitted a supplementary report on the services rendered by his subordinates, has expressed a favourable opinion of all the officers serving under him, with two exceptions. His remarks will be communicated to the Appointment Department. Mr. Home has, by his careful and efficient administration during the year, once more earned the thanks of the Lieutenant-Governor.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Offg. Secretary to the Government of Bengal.

SCARCITY OF FOOD AND WATER AND OUTBREAK OF CHOLERA ON THE PILGRIM ROUTES THROUGH THE CENTRAL PROVINCES TO POOREE.

THE following paper is published for general information.

COLMAN MACAULAY,

The 4th November 1886. *Secy. to the Govt. of Bengal.*

No. 580, dated Camp Pachmarhi, the 29th October 1886.

From—F. C. ANDERSON, Esq., Offg. Secretary to the Chief Commissioner, Central Provinces,

To—The Secretary to the Government of Bengal, Municipal Department.

I AM directed to inform you that in consequence of an unfavourable monsoon severe scarcity and a dearth of water are anticipated in that portion of the Chattisgarh Division (comprising the Raipur, Sambalpur, and Bilaspur districts) in these provinces through which the pilgrim route to Puri, (Jaganath) from various parts of India situated to the north and north-west of the Central Provinces, lies. Hardly a year passes without the appearance—often in a very severe form—of cholera in the Chattisgarh Division, and during the past hot weather the disease has been very severe. Latterly, it has been dying away, but intelligence has just been received of four fatal cases in the Bilaspur district, and if, as is not unlikely, the disease should spread, its effects will be greatly intensified by the want of water and the anticipated scarcity of food. Those who would suffer most would be the Jaganathi pilgrims who pass every year in one continual stream through the Chattisgarh Division on their way to and from Puri. Acting on the advice of the local authorities, the Officiating Chief Commissioner has decided to prohibit the passage of pilgrims through that portion of the Chattisgarh Division which lies to the north of the road passing from Raj-Nandgaon through Raipur to Sambalpur, as it is in the country to the north of that road that distress will chiefly be felt. I am accordingly to request that it may be made as widely known as possible in the districts of the Lower Provinces that no pilgrims will be allowed to pass through any portion of the Chattisgarh Division lying to the north of the road passing from Raj-Nandgaon through Raipur to Sambalpur; that in consequence of the anticipated dearth of water and scarcity of food in that division pilgrims are advised to postpone the pilgrimage this year altogether; and that if they take the risk of making it, they must proceed by some route which will bring them into the Chattisgarh country by or to the south of the above mentioned road.

The Officiating Chief Commissioner trusts that it will not be necessary to impose any further restriction. District officers in these provinces will be instructed to enforce the limited restriction now imposed, all pilgrims being required to keep clear of the country through which it has been found necessary to at once prohibit their passage.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of former years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·8° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards, is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

Explanation.—Summary.— The normal means of air pressure and temperature are the arithmetical averages or means of the reading during the same period for the past ten
The *humidity* of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number
the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub-divisional stations for the period in question during the past
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell

* Mean for 6 days.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, ▲ dew.

JOHN ELIOT,
For Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE returns received from the principal Municipalities in Bengal during the week ending 16th October 1886 disclose the following results:—

1. That during the week in question births and deaths were recorded in the proportions, respectively, of 25·9 and 40 2 per 1,000 of population, as opposed to 18·3 and 29·4 per 1,000, respectively, during the preceding week ending 9th October, indicating a very considerable advance in the registration of both the events.

2. That these events were recorded in the highest proportions by the following Municipalities:—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Bhagulpore	43·5	Gya	95·0
Chittagong	39·9	Serampore	82·4
Serampore	39·2	Monghyr	60·6
Gya	38 9	Suburbs of Calcutta	55·4
Burdwan	38 1	Chittagong	46·9
Utterpara	37·8	Bhagulpore	43 5
Hughli	37·6	Beauleah	42 0
Howrah	36·1	Hughli	41·6
Durbhanga	35·4	Mozufferpore	40·2

Comillah	30·8	Patna	38·3
		Purneah	38·1
		Utterpara	37·8
		Burdwan	36·6
		Howrah	30·9

3. That the mortality from the specific death-causes stood as follows:—

	Ratio per *mille* during the weeks ending—	
	16th Oct. 1886.	9th Oct. 1886.
Cholera	8 6	6·6
Small-pox	·1	...
Fever	15·3	11·4
Bowel-complaints	5·0	4·0
Injury	·1	·4
Other causes	10·7	7·0

denoting that in comparison with the preceding week there occurred much increase of mortality from all the diseases, excepting small-pox and injury.

4. That cholera, fever and the maladies returned under the head of "Other causes" proved most fatal in the following Municipalities—the rest of the diseases abovenamed not demanding notice:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted inasmuch as the census of the Europeans, above alluded to, cannot be accepted as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

Increase.

	Tons.
Coal	318

This increase is due to silk merchants laying in stock and to steamer service between Cuttwa, Berhampore and Azimgunge.

Oilseeds, mustard and rape	38

This increase is due to high rate.

Salt	56

This increase is due to urgent demand: the salt is ordinarily carried by the river.

Sugar	29

This increase is due to the prosperous condition of the people.

Decrease.

	Tons
Cotton piece-goods	31

This decrease is due to steamer carrying the piece-goods for Berhampore which is more convenient for the merchants there.

Grains	1,495

This decrease is due to abnormal traffic last year for the distress consequent upon the failure of embankment at Laltakuria.

Oilseeds and others	84

This decrease is due to abnormal traffic last year.

GENERAL REMARKS AND EXPLANATIONS.

From the statement given above, it will be seen that there has been an increase of 1,504·23 tons over the traffic carried during the corresponding period of 1885.

INCREASES.

Ginger ... ... 384·20 tons.

Due to a good crop and fair demand.

Gunny-bags ... ... 23·47 tons.

Partly due to increased traffic in rice and paddy, and partly to hand-made gunny having been despatched from Siliguri, Haldibari, and Domar.

Grain and pulses other than rice and paddy ... ... 426·01 tons.

The traffic under this head represents various articles of food, and the increase is a mere trade fluctuation.

Hides ... ... 35·63 tons.

There appears to have been a demand for goats and buffalo skins during the month for export.

Intoxicating drugs other than opium ... ... 24·58 tons.

The traffic under this head chiefly consists of gunja despatched from Sultanpur and Atrai.

Jute ... ... 59·17 tons.

Despatches of new jute commenced and a larger quantity passed over the line during the month under notice than in the corresponding period of the previous year.

Oil ... ... 18·06 tons.

The traffic under this head chiefly consists of kerosine, castor, and cocoanut oils.

Paddy ... ... 1,235·45 tons.

This increase is due to a satisfactory crop and demand in districts where it failed last year owing to floods.

Rice ... ... 1,723·92 tons.

The explanation given against paddy applies to rice also.

Seeds ... ... 52·79 tons.

There appears to have been a fairly good demand for mustard and linseed during the month.

Tea ... ... 262·15 tons.

The market has continued firm.

Timber ... ... 194·01 tons.

A large quantity of sál bullies was despatched from Siliguri locally during the month.

DECREASES.

Coal ... ... 592·32 tons.

Due to less coal being carried for the Locomotive Department.

Cotton ... ... 2·87 tons

Decrease mainly due to no cotton having been booked through from Eastern Bengal State Railway during the month under notice against 106 maunds despatched by that line during the corresponding period of 1885.

Cotton piece-goods ... ... 73·15 tons.

Due to markets being well stocked against the rains.

Liquor ... ... 3·38 tons.

The decrease under this head is very trifling.

Miscellaneous ... ... 391·00 tons.

The falling off has apparently been due to the rains, and will, in all probability, be met by a corresponding increase later on.

Metals ... ... 170·03 tons.

The remark made under the head of Miscellaneous also applies to this traffic.

Railway materials ... ... 258·40 tons.

Decrease due to stoppage of work on the Assam-Behar Railway.

Salt ... ... 1,073·97 tons.

Markets in the interior appear to be well stocked.

Sugar ... ... 52·49 tons.

The increased traffic under this head for some time past will explain the present falling off.

Twist ... ... 41·19 tons.

The demand in the local markets for this article has fallen off.

Tobacco ... ... 276·76 tons.

Despatches to Burmah appear to have been held off by native traders.

F. B. PEACOCK,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 16th November 1886.—With reference to paragraph 5 of the notification, dated the 27th July 1886, it is hereby notified that the number of appointments to be competed for at the examination of candidates for admission into the Subordinate Executive Service to be held in January next will be eight.

F. B. PEACOCK,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 15th November 1886.—The following rules for the admission of Natives of India to the higher grades of the Opium Department are published for general information.

1. Natives of India of unmixed descent will be admitted to the Opium Department by selection.

2. A candidate who wishes to have his name registered for appointment must forward an application in writing, if he be resident in the Lower Provinces, to the Chief Secretary to the Government of Bengal, or, if he reside in the North-Western Provinces, to the Chief Secretary to the Government of the North-Western Provinces.

3. Each candidate must produce (*a*) a certificate of having passed the Entrance examination of the Calcutta University, or satisfactory evidence from competent authority of having received a good education up to the standard at least of the Entrance examination; (*b*) satisfactory certificates of his respectability and good moral character, countersigned by the Magistrate of the district in which the candidate resides, or by the Commissioner of Police if the candidate be a resident of Calcutta; (*c*) a certificate of health and physical fitness from a Government medical officer; (*d*) a certificate from a competent Government officer that he is able to ride and is of active habits.

No person whose age exceeds 25 years will be eligible for admission into the department unless he be already in Government service.

4. A candidate considered eligible for admission into the department, and whose name has been approved by the Lieutenant-Governor of Bengal or of the North-Western Provinces, will receive an intimation to that effect.

5. The registration of any applicant's name as an approved candidate will not give him a claim to an appointment.

6. A candidate appointed to the department will be considered as a probationer for the first two years of his service. His confirmation in the department will depend on the report which may be submitted by the Opium Agents as to the industry and intelligence with which he discharges his duties, and as to his fitness for service in the department.

7. Persons appointed under these rules will be liable to pass the usual departmental examinations.

N. B.—The above rules will, however, not be brought into practical effect until the candidates who have successfully passed the competition examination have been provided with permanent appointments.

F. B. PEACOCK,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

KAMARÁN BAY.

Shoal N. E. of Kamarán harbour.

THE British Admiralty, London, has notified on further information received from Mr. T. H. Franks, Master of the steam-ship *Anglo Indian*, of the position of the outermost shoal mentioned in the Red Sea supplement for 1886, page 31, lying in the anchorage ground on the West side of Kamarán harbour entrance:—that,

This shoal, composed of sand and marked by discoloured water, is about 50 yards in extent, with depths of 12 to 28 feet at low-water spring tides; it lies with the following bearings:—

North-East entrance point of Kamarán harbour ...	S. 39° W.
Salah Mosque	N 62° W.

Note.—Mariners should use caution in taking up an anchorage in this part of Kamarán Bay, as other shoals may exist. In August 1886, the *red* buoy at the southern entrance to Kamarán Bay was not in position.

Bank southward of S. E. Jezirat Kudd'Ali.

THE British Admiralty, London, has given notice—on the authority of the Commander of the Italian gun-boat *Scilla*—of the existence of a bank lying about two miles S. ¼ E. from South-East Jezirat Kudd'Ali, and nearly one mile from the shore.

This bank *(Scilla bank)* extends about 9 cables in a N. N. E. and S. S. W. direction with a breadth of 2½ cables; on the northern end there is a patch of 19 feet at low-water (the shoalest spot found), and on the southern end a patch of 21 feet; on other parts of the bank, the depths range from 23 to 33 feet.

The *Scilla* anchored near the southern edge of this bank in 21 feet with the following bearings:—

South-West summit of Saddle island	...	...	S. 89° E.
Jezirat Kudd'Ali summit	...	...	N. 37° W.
South-East Jezirat Kudd'Ali summit	...	...	N. 5° W.

Position—Latitude 13° 53′ 15″ N., longitude 41° 51′ 30″ E.

Note.—From the shoalest spot, Barn rock is shut in by South-East Jezirat Kudd'Ali, and the North-East extreme of Saddle Island is in line with the highest peak of Jebel 'Abáyil.

The Commander of the *Scilla* reports that Haycock hill and the islands in the vicinity are not well charted.

Hooghly Collectorate, the 11th November 1886.

G. TOYNBEE, Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the district of Mymensingh, will be put up to sale at the Mymensingh Collectorate on 12th January 1887, corresponding with 29th Poush 1293 B.S., Wednesday.

The purchase will be subject to the following conditions of sale.

Conditions of Sale.

1st.—The estates to be sold to the highest bidders above the upset price. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them, with revenue fixed in perpetuity at the amount of the present revenue.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issuing of advertisement as in the case of original sale:—

ADMINISTRATION OF THE TRIBUTARY AND POLITICAL STATES OF THE CHOTA NAGPORE DIVISION.

RESOLUTION.

POLITICAL.

Darjeeling, the 30th October 1886

READ—

The Report on the Administration of the Tributary and Political States of the Chota Nagpore Division for the year 1885-86.

Read also—

The Reports for 1884-85 and 1883-84, and the orders of Government recorded thereon.

MR. C. C STEVENS was in charge of the division throughout the year, with the exception of the first ten days of it, and has submitted the Annual Report. The Commissioner made a long and useful tour through the Tributary States. He was well satisfied with the inspection he made at Jushpore, which State he entered on the 9th December. Everywhere there was evidence of good order and efficient management, and the Commissioner remarks that the favourable impressions which he had formed of the Rajah's rule were only heightened afterwards, when he had seen some of the other Tributary States. On the 22nd December Mr. Stevens entered Sirgooja. The Korwars, who were only a year ago in a turbulent and disaffected condition, are now said to be leading a quiet life and to be extending their cultivation. Travelling with the Rajahs of Sirgooja and Udaipore, the Commissioner passed through Lerna, Makandpore,

and Pertabpore. At Lerna he decided the dispute between the Rajah of Sirgooja and the surviving lady maintenance holder of Kundri, regarding a readjustment of the maintenance allowance. The Commissioner permitted the Rajah to resume certain villages and to make other arrangements for the maintenance of the surviving widow. His decision has since been upheld by this Government. The Commissioner then passed on into Korea with the Rajah of that State, who had in the meantime joined him. Here matters were not found to be in such a satisfactory state owing to the bad feeling between the Rajah and his Dewan Bhairo Singh. The latter has since resigned in favour of his son, an arrangement that has been sanctioned by Government. The Commissioner has been asked to report after his next cold weather tour how the new Dewan has been performing his duties, and on the general position of affairs in Korea, especially as regards any interference by outsiders On the 8th January the Commissioner entered Bisrampore with the Rajah, and inspected the offices, jail, dispensary, and school; all are said to be in a satisfactory state, "though certainly below the standard of similar institutions in a British district" At Rabcob Mr. Stevens found that the Rajah of Udaipore was building a new Rajbari, and he thinks that this place will be better for a head-quarters than Pertaboore. Mr. Stevens then visited the Raigurh frontier and decided a boundary dispute between Udaipore and Raigurh in favour of the latter State. On the 25th January he entered the Gangpore State, and reached Suadi three days later. Here he saw the process of gold-washing in the Eeb; the earnings of the washers are said not to exceed the ordinary wages of labour. Throughout Gangpore the Commissioner was struck with the extended and extending cultivation; many complaints were made of oppressions and exactions by the Rajah, which in most cases were found to be unjustified. It appears that the *assul* rent is very low, and any special expenditure is met by a special cess, levied with the consent of the ryots or in accordance with custom. The most important question between the Rajah and the zemindars had reference to the right to receive excise dues, which, in accordance with all the evidence in the case, the Commissioner decided in favour of the Rajah, advising him at the same time to make, if possible, a settlement with each zemindar of the abkari revenues of their respective zemindaries. In this State the Commissioner decided two sessions cases: the notorious dacoit Runjeet Singh, who was accused in a third case, escaped from the Suadi jail. On the 8th February the Commissioner arrived at the head-quarters of the Bonai State, where he inspected the offices, jail, and school. He was not favourably impressed with the administration of this State. The Rajah is said to be on bad terms with his own relatives, and not friendly with the Bhuinyas, who form an important and powerful class of his subjects. The Commissioner thinks that both Bonai and Gangpore are difficult to manage, and require to be governed with far more firmness and tact than their present rulers have hitherto displayed. From the Koira pergunnah the Commissioner passed across a corner of the Keonjhur State to Lapong, where there is a boundary dispute between the Keonjhur State and the Kolhan. As one of the States is a Tributary State of Orissa, the Commissioner of that division has been directed to settle the dispute under Act XX of 1850, and as far as possible to restore the boundary laid down in 1866 by Dr. Hayes, the then Deputy Commissioner of Singbhoom. After passing through the district of Singbhoom, the Commissioner reached Seraikella on the 25th February. He made the acquaintance of the Rajah and his son, and inspected the offices, which were found to be in a fairly good condition. After visiting Khursawan, the Commissioner reached Ranchi on the 6th March, after an absence of three months and four days, having travelled 700 miles.

The Commissioner brings to notice two matters which he says have impressed him much, the first being the affectionate remembrance in which the late Colonel Dalton is held throughout the Tributary States, and the second the very valuable services which Mr. Hewitt has rendered in discouraging the wasteful destruction of forests, and in leading the Chiefs to see their true interests in this important matter. Mr. Stevens will no doubt do his utmost in support of this policy. The general result of the Commissioner's tour was to satisfy him that all, or nearly all, the States are gradually improving in their condition and increasing in their population and resources. Mr. Renny and

Colonel Samuells also visited the Seraikella and Khursawan Political States, and did some good work in the way of inspection, disposal of complaints, and enquiries regarding the outturn of crops and the condition of the ryots.

2. *Crops, health, and vaccination.*—The rainfall was sufficient and the crops good in all the States, except Udaipore, Gangpore, Korea, and Jushpore. The general health is said to have been better than in the previous year. Vaccination operations were carried on in the Sirgooja, Udaipore, Jushpore, Gangpore, and Korea Tributary States, as well as in the Political States of Khursawan and Seraikella. 91·8 per cent. of the operations were successful. In Sirgooja there were as many as 8,848 operations in 242 villages. No complaints were made against any of the vaccinators.

3. *Education and Roads.*—In the several States there are 38 schools with 1,072 pupils. In Seraikella the middle English school has been abolished, as the Rajah would no longer continue his grant. No new roads have been opened in most of the States In Sirgooja the road from the borders of Palamow to the Matrunga Ghât is under construction. Large portions of the Chyebassa-Purulia, the Chyebassa-Midnapore, and the Chyebassa Khursawan road, which pass through the Political States of Seraikella and Khursawan, were maintained by the Singbhoom Road Cess Committee. The Chiefs of those States should certainly be pressed to contribute something to the maintenance of these means of communication.

4. *Judicial work in connection with the States.*—56 cases were instituted in the Commissioner's office during the year, and 36 were pending from the previous year. Of the total of 92 cases, 76 were disposed of. There were 17 appeals of all kinds from the decisions of the Chiefs. Three decisions were confirmed, six reversed, five cases remanded, and three remained pending at the end of the year. 696 miscellaneous petitions were received and disposed of. Of the cases pending from the previous year, two against Rajah Dharmjit Singh of Udaipore were settled amicably out of court. The claim of Lal Mohessari Persad Singh Deo against the Rajah was decreed for Rs. 1,200. The claim of the Sirgooja Rajah to resume the village of Pemi was finally disallowed. One of the Sirgooja cases was a complaint made by the Sirgooja Rajah against the Chief of Udaipore for having exacted *salamies* from the ryots of certain villages in the Sirgooja territory. The amount realized by the Udaipore Rajah was refunded by him. One of the six cases from Udaipore shows that it is necessary for the Commissioner to keep a constant watch and a firm hand on the various Chiefs, with the view of preventing any petty strifes and jealousies among them. A complaint was made by the Rajah of Udaipore against a *sowar* of the Sirgooja Chief, charging him with insult and criminal intimidation. The charge of criminal intimidation was not proved, but the Sirgooja Rajah has been requested to reprimand the *sowar* for not paying the respect properly due to the Rajah of Udaipore. The cases from Gangpore, Bonai, and Changbhakar do not present any noticeable features. The case from Jushpore was a complaint made by the Jushpore Chief against the Chief of Udaipore and his amla, charging them with encroachment on the Jushpore boundary, and with plundering his *bhandar* at Dumaria. The case ended in the conviction of the peshkar of the Udaipore Rajah and of five other ringleaders. The prisoners appealed to this Government, but the appeal has not yet been decided owing to the non-receipt of a memorial on the case which the prisoners wish to have considered.

5. *Judicial Statistics of the States.*—Of 14 persons committed for trial by the Rajahs of Sirgooja, Gangpore, and Bonai, nine were convicted, three acquitted, and two were pending trial at the end of the year. Rupees 2,209 were imposed as fines in the Tributary States against Rs. 2,313 in 1884-85. On the last day of the previous year there were 193 prisoners in the jails. The number of new admissions during the year was 400 against 517 in the previous year. Out of a total of 593 prisoners, 424 were released, one died, and six escaped, leaving 162 prisoners in the jails on the 31st March last. The general health of the prisoners was very good. There were altogether 648 cases of cognizable and non-cognizable crime, in which 1,242 persons (against 1,117 in 1884-85) were concerned; 697 persons were convicted, and 406 discharged or acquitted. There were 15 cases of bribery against 10 in the previous year,

but only 14 cases of false evidence and offences against public justice against 37 in the previous year. There were seven cases of murder four of which occurred in Sirgooja) against two in 1884-85; 76 cases of hurt against 49; 20 cases of wrongful confinement against seven; 21 cases of enticing away married women against 14: there are no particular variations under other heads. The crime return of the Udaipore State is marked by a total absence of any serious offences against the person. There was a total of 665 civil suits for disposal against 492 in the previous year Of these 547 were disposed of during the year, and 118 were pending at its close. About half these suits were for the recovery of bond or verbal debts, 56 were for possession of land, and 54 were for arrears of rent. The civil powers of the Chiefs are exercised under the appellate control of the Commissioner of the division. No explanation is furnished of the increase of institutions in the court of the Rajah of Jushpore; the increase in Seraikella and Khursawan is attributed to the exemption of suitors from liability to pay stamp fees. It appears that they previously used stamped papers, but the Chiefs were informed by the Deputy Commissioner of Singbhoom that it was not obligatory to do so. The Commissioner should report further on this matter, and generally on the question of the introduction of non-judicial and court-fee stamps. In the Tributary Mehals of Orissa a very low scale of court fees on the institution of cases has recently been tentatively introduced. The number of accidental deaths was 413 against 346 in the previous year; 161 deaths were caused by snake-bite, 69 by drowning, 69 by wild animals, 22 by burning, and there were 25 suicides.

6. *The Chiefs of the States.*—The following statement shows the area and population of the different States:—

State.	Area in square miles.	Population.
Sirgooja	6,103	270.336
Udaipore	1,051	33,955
Jushpore	1,947	90,240
Gangpore	2,484	107,985
Korea	1,631	29,846
Bonai	1,297	24,026
Seraikella	459	77,097
Khursawan	149	31,051
Total ...	15,121	664,536

Rajah Raghunath Saran Singh Deo. the Chief of Sirgooja, and his Dewan, are again favourably spoken of. Mr. Hewitt reported of this Chief that he was most anxious to do what was right, and Mr. Stevens says he has found him just and moderate in cases in which his own personal interests have been concerned.

Rajah Dharmjeet Singh Deo is the Chief of Udaipore. The Commissioner is disposed to think that he has bad servants, and remarks that in the two most important cases which have come under his notice he found that the Rajah's original proceedings were perfectly legitimate and regular, but that eventually over-zealous amla put him seriously in the wrong. The Lieutenant-Governor is glad to hear that the Commissioner is trying his best to obtain influence over the Rajah, and to show him that he has a personal interest in his welfare.

Rajah Pratap Narain Singh Deo Bahadoor of Jushpore is alleged to be an able, energetic, and conscientious ruler. Owing to a partial failure of his eyesight, the judicial work is done by his son, acting under his advice.

Rajah Raghunath Sikhur Deo of Gangpore is alleged to be too fond of money and disposed to worry his subjects much for special pecuniary contributions It, however, appears that he has a difficult State to manage, the inhabitants possessing a large share of the cunning which is attributed generally to the Ooriya character, and in the disputes between the Rajah and his subjects, the Commissioner found the latter to be principally in the wrong.

The state of affairs in Korea has been alluded to in paragraph 1 of this Resolution. The only hope for the good government of this State lies in the Rajah's being well advised, as he is said to be unfit to govern without help. The Rajah of Bonai is said to be on bad terms with his relatives and with

important classes of his subjects. The Commissioner should endeavour in the ensuing cold weather to ascertain more accurately the causes of these differences, and to bring about more satisfactory relations. As regards Changbhakar, the Commissioner says he has seen nothing of the management of the State, except from the cases that came before him, and from these he thinks that the main object of the Bhya's rule is his own benefit, and that he holds extreme views regarding his rights over his subjects. The Political State of Seraikella is said to have been well managed. The Thakoor of Khursawan being a minor, his property is now under the control of Government, and managed by the Deputy Commissioner of Singbhoom with the assistance of a duly appointed manager. It is said that a good deal of dissatisfaction prevails amongst the pradhans and subordinate tenure-holders regarding the imposition of police and dâk cesses, and that the charges have not been fairly distributed on the jumma of each man's village. The Deputy Commissioner of Singbhoom should, during the ensuing cold weather, ascertain the real cause of complaint and provide a remedy. It is satisfactory that a quarter of the debt due by the State should have been paid during the year. The minor Thakoor is now in his 18th year, and Colonel Samuells has been taking steps to instruct him in law and zemindari management. He is said to be a manly youth and is fond of sport, but inclined to be over-bearing and extravagant. The tribute payable by the several States amounts to Rs 4,686-2-9

7. From the Commissioner's lengthened tour through the States, and the opportunity thus afforded him of becoming personally acquainted with the various Chiefs, much benefit may be expected to result. Indeed, it is evident from the report that the Commissioner's tour has already been productive of much good, and the personal experience thereby gained cannot fail to enable him to deal more confidently with the various matters of executive and judicial administration that come before him.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner of Chota Nagpore for information and guidance.

Ordered also that a copy of the Resolution, together with a copy of the report, be submitted to the Government of India in the Foreign Department for information.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Chief Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1885

RESOLUTION.

POLICE.

Darjeeling, the 4th November 1886.

READ—

The Report on the Administration of the Police Department for the year 1885.

Read also—

The Reports for the years 1883 and 1884, and the orders of Government recorded thereon.

Cost, numbers, and distribution of police force.—Excluding the Chittagong Hill Tracts, the police budget grant for the Lower Provinces was Rs. 43,81,553. The actual expenditure for the financial year 1885-86 was Rs. 41,95,793. There was a saving, amounting to Rs. 1,82,209, under the head of Pay of Executive Police. The total sanctioned force consisted of 160 Inspectors, 899 Sub-Inspectors, 2,369 Head-constables, and 19,594 Constables. The cost of the force employed on purely police work is approximately estimated at Rs. 26.22,486, or 7·6 pies per head of the population. The cost in England and Wales is 2*s.* 8·11*d.* per head of the population.

The proportion of police to area and population is shown in the following table:—

PROVINCES.	Number of police	Area in square miles	Population.	Proportion of police to square mile	Proportion of police to population
Bengal	12,122	70,956	34,821,373	1 to 5 8	1 to 2,872
Behar	6,121	44,139	23,127,104	1 to 7,2	1 to 3,778
Orissa	1,418	9,762	3,789,694	1 to 6·8	1 to 2,672
Chota Nagpore	1,456	26,966	4,225,989	1 to 18 5	1 to 2,902
Total ...	21,117	151,·23	65,964,160	1 to 7 1	1 to 3,123

In England and Wales there was one constable for every 775 of the estimated population for 1884 (one for 751 in boroughs, one for 1,218 in counties, and one for every 404 in the Metropolitan Police district). These widely divergent proportions must be borne in mind when considering questions such as suppression of crime, supervision of bad characters, and results of police investigations in Bengal.

2. *Town Police.*—The reports regarding the town police are not altogether favourable. It is said that night patrol work is more strictly enforced, and is very unpopular. In parts of the Burdwan and Presidency Divisions, the pay of a man working in a mill or manufactory is far superior to that of a constable in the lower grades. Moreover, it is alleged that little trouble is taken to obtain information about bad characters, and that it frequently happens that no sooner is a constable sent to a particular place than he at once begins to try and get transferred again. This of course is fatal to the acquisition of such local knowledge as can alone make a town police efficient. The Inspector-General is of opinion that for town work a force of chowkidars, with a stiffening of regular police, would be just as efficient as the present one, and at the same time cheaper and more contented. A suggestion to this effect has already been made and rejected, but the Lieutenant-Governor will be willing to receive and consider any detailed proposals the Inspector-General may wish to submit. Several towns have put up additional lamps, but of the eight towns mentioned in the report for 1884, a commencement towards lighting has been made only in Rungpore and Furreedpore. A copy of paragraph 13 of the present report, on the subject of street lighting, will be sent to the Municipal Department of this Government

3. *Rural Police.*—The Draft Bill, which was alluded to in the Resolution on last year's report, has since been passed into law as Act I (B.C.) 1886. The status of the punchayet remains practically unchanged; but the Act enables the Magistrate to supersede them, if necessary, and to appoint some other agency for collecting the tax and paying the chowkidars. It is to be hoped that this power will act as an incentive on the punchayets to greater punctuality of collection and payment. In many districts, where individual

officers have devoted special attention to the matter, payments have been fairly regular; but, as is noted in the case of the Patna Division, continuous trouble and energy are necessary to ensure such regularity. The power to appoint special tehsildars, whose remuneration will be levied from defaulters only, should act as an inducement to the villagers to pay up regularly. The chowkidar is the back-bone of the police system of the province, and the Lieutenant-Governor attaches the highest importance to his being punctually and fully paid. It is to the chowkidar that the regular police must look for timely information of offences, of disputes likely to lead to riots, of suspicious or sudden deaths, of the movements of bad characters, and generally for clues in all doubtful or difficult cases: and District Magistrates should regard it as one of their most important duties to see that chowkidars receive their dues. The number of men in arrears for over three months in 1885 was 7,498 against 6,333 in 1884. There were wide diversities as regards the punishment of chowkidars in adjoining districts; but the total number of punishments has not been stated in the report. The number of town and village police, not subject to the rules of the regular police, was 1,70,097. The average annual emoluments of each man was Rs. 31·8 against Rs. 30·5 in the preceding year, and the total annual cost Rs. 54,15,940-7-7 against Rs. 52,22,339. Each man watched on the average 60·9 houses. As regards night duty, the Inspector-General thinks that if the chowkidar can be found when wanted, it is as much as can be expected; and that it is neither necessary nor possible that he should be on the move from sunset to sunrise. This may be so; but that the "nightly rounds" are a reality in many districts is evident from the fact that thieves and house-breakers are often caught by chowkidars while on their rounds. No doubt the chowkidar cannot be expected to be on the move all night; but it is very desirable that he should patrol the village for at least two or three hours; and though no doubt some laxity exists in this respect, it should not be enhanced by teaching the chowkidar to believe that this is not a part of his legitimate functions.

4. *Railway Police.*—The East Indian Railway Police now consists of 253 officers and men. The force on the Tirhoot State Railway numbers 35, and that for the Eastern Bengal Railway system 225. The new scheme for the railways in Eastern and Northern Bengal was introduced in the middle of August 1885, and after a year's experience its working has been favourably reported on.

5. *Punitive and Additional Police.*—There are no punitive police in any district except Backergunge, where a third party had to be quartered during the year at Katadia. The police maintained order at 172 fairs attended by about four and three quarter millions of people. Only 140 cases, none of them of a serious nature, were reported, and convictions were obtained in 106 of these cases. These figures are a striking indication of the peaceable and law-abiding character of the people.

6 *Education, drill, and casualties.*—The percentage of educated Inspectors was 99·4. Among Sub-Inspectors the percentage increased from 98 to 98·4, among Head-constables from 78·6 to 79·1, and among Constables there was a decrease from 27·5 to 26·3. It is said that the drill of the force has not improved, if it has not fallen off. The special reserves are said to be good schools for drill, and the Lieutenant-Governor notices with approval that an attempt is being now made to utilize them as much as possible. The new carbines have been issued, but the Inspector-General states that there has been little difference in the shooting. The total casualties in the police increased from 2,971, or 12·5 per cent. in 1884, to 3,224, or 13·5. There were more retirements, resignations, and discharges, but fewer dismissals. The police service, it is said, is not so popular as it used to be, when the work was lighter, and many men now resign after a short trial. Indeed, it is said that in some of the eastern districts it is practically impossible to keep the force up to its full strength.

7. *Judicial and departmental punishments and rewards.*—The number of judicial punishments under the Penal Code decreased from 385 to 323; those under the Police Act from 243 to 241; and departmental punishments (including dismissals) from 5,815 to 5,482. Judged by figures, the conduct of the police thus appears to be improving. The Lieutenant-Governor is glad to learn

that any tendency to award harsh and inconsiderate punishments is well kept in check. As regards the result of prosecutions under the Police Act, the element of uncertainty, alluded to by the Inspector-General, certainly exists; and, as remarked by him, it is difficult to get some Magistrates to see that when a man has an altercation with and strikes his head-constable, or goes to sleep when on night duty as sentry, he commits a very serious offence. Nevertheless, the Lieutenant-Governor thinks that, in the interests of the Police Force, an occasional and judicious resort to prosecutions under the Police Act is more likely to do good than the frequent infliction of departmental punishment which, in most cases, takes the form of petty fines. The number of men wearing good-conduct stripes was 10,570, an increase of 1,651 on the previous year. The possession of three stripes entitles the wearer to a good-conduct allowance of one rupee per month. With reference to the Inspector-General's remark as to the insufficiency of the budget allotment to meet the expenditure thus incurred, the Lieutenant-Governor can only repeat what was said last year that it is not creditable to the department that money so earned should not be promptly paid: steps to guard against this should be taken by applying for permission to make such transfer as may be necessary from some other heading in the budget where there is a saving. Money rewards were received by 1,657 officers and men against 2,049 in the previous year.

8. *Torture and extortion.*—There were four well-established cases of torture against the Police, three charges having been found to be false. A very gross case occurred in Backergunge. A sub-inspector, three constables, and two chowkidars were concerned in torturing an accused person to death, after which the body was suspended from a mango-tree to make it appear that suicide had been committed. The Judge acquitted the accused, as the principal evidence was that of an approver; but the officers implicated were dismissed. In another case, which occurred in Furreedpore, the principal accused was the village punchayet. It is to be feared that ill-treatment, with the view of extorting a confession, or of compelling the restoration of property, is by no means confined to the police, but is an ingrained habit of the people. In three of the proved cases, adequate punishments were inflicted. There were only six petty cases of extortion by the Police.

9. *Escapes, escorts, and miscellaneous.*—There were 219 escapes against 216 in 1884. Of these, as many as 83 were effected during transit. One hundred and two persons, or 46 per cent., were re captured. The number of prisoners escorted during the year was 15,273, and the total amount of treasure Rs. 10,56 01,131-3-2. Deaths by suicide increased from 2,531 to 2,712. It is noteworthy that in Tipperah nine children committed suicide. Cases of accidental death increased largely from 26,903 to 31,347. Of these, as many as 13,622 were caused by drowning and 9,932 by snake-bite. As regards inspections by District Superintendents, orders have recently been passed by the Lieutenant-Governor, which will somewhat reduce the amount of inspection to be performed by them, and will give them more time to attend to important work in the head-quarters office.

10. *Tests of police work.*—The percentages prescribed as tests of police work relate to cases, persons, or property. If some of these tests may be discontinued without harm, a special report should be submitted. The proportion of cognizable crime to population and police is compared with that of other Provinces in the following table:—

Province.	Police.	Population	Crime (cognizable).	Proportion of police to population.		Proportion of police to crime (cognizable).		Proportion of crime (cognizable) to population.	
				Policeman	Persons	Policeman.	Cases.	Case.	Persons.
North-Western Provinces ..	32 982	43,268,599	152,786	1 to	1,311	1 to	4 6	1 to	283
Punjab ..	20,549	18,812,264	62,510	1 „	914	1 „	3·0	1 „	301
Central Provinces ..	8,658	9 818,791	20,487	1 „	1,136	1 „	2·3	1 „	480
Bombay, including Sind	18,381	15 689 590	41,642	1 „	853	1 „	2 2	1 „	376
Madras	22,146	30,878,504	94,806	1 „	1,393	1 „	4 2	1 „	325
Assam ...	2,004	4,653,065	10,585	1 „	2,321	1 „	5 2	1 „	439
Bengal	23,930	65,964,160	112,365	1 „	2,756	1 „	4 6	1 „	587

The Presidency is apparently the most criminal division, with one cognizable case to 472 of the population; and Dacca the least so, with one to 824. Of districts, Darjeeling stands first with one to 81, and Noakhally last with one to 1,022. In England and Wales in 1884, there was one indictable offence for every 551·60 of the population. If all sorts of offences be taken together, England and Wales show a far larger total than Bengal—

	Population.
England and Wales	25,974,439
Bengal	65,964,160
England and Wales—	
Persons apprehended for indictable offences ...	20,366
Summarily proceeded against	724,708
Total ...	745,074
Bengal—	
Persons actually appearing before Magistrate charged with cognizable offences	99,521
Persons against whom process issued for non-cognizable offences	103,429
Total ...	202,950

Thus in England and Wales one person out of every 34 of the population appeared before the Courts charged with some offence, whereas in Bengal the proportion was only one in every 325 But it must not be inferred that the people in England and Wales are so much more criminal as the total figures seem to show. Many cognizable offences, such as larceny, are tried summarily in England; and many offences, which are tried by indictment in England, are disposed of by Magistrates in India. Moreover, in a civilized country, with a predominant urban population, many acts are offences which are not so in Bengal. Hence the large number of persons proceeded against summarily in England. Out of the total of 724,708, no less than 86,027 were prosecuted for offences against the Education Acts, about 212,000 under the Licensing Act of 1872, 47,000 under Local Acts and Borough bye-laws, about 20,000 under the Highway Act, and no fewer than 50,000 under the Vagrant Act. Excluding *mala prohibita* under local and special Acts, there appears to be more cognizable crime in Bengal in proportion to population than in England and Wales, though of late years there has been a tendency to underrate the importance of the police in criminal administration on the ground that there is little or no crime in Bengal as compared with other countries. It should be remembered that there are some kinds of crime, such as riots, concerning land, which in Bengal are common, but which hardly exist in other countries.

11. *Crime of the Province.*—The following figures show the decrease in cognizable and non-cognizable crime as compared with the previous year:—

	1884	1885
Cognizable	112,365	107,410
Non-cognizable	107,368	105,996
Total ...	219,733	213,406
Decrease in cognizable cases	.....	4,955
Ditto in non-cognizable cases	... ..	1,372
Total decrease ...	.....	6,327

The Dacca Division alone shows a decrease of 2,738. Only two divisions (Chittagong and Orissa) show an increase, mainly in non-cognizable crime. In Behar the percentage of non-cognizable crime is only 41·4, while in Bengal it is 54·9. In the Dacca Division it is 59·2, in the Patna Division only 38·8. The Inspector-General points out that among the well-to-do residents of Eastern Bengal, the percentage in Noakhally is as high as 83·4; in Gya it falls as low as 26·6; and in Chota Nagpore, where litigation, for its own sake, is even less practised, to 22·1 in Lohardugga. With reference to the decrease

in the number of cognizable cases, considerably more than one-half is accounted for by a decrease of 2,700 in nuisances, of 400 in salt prosecutions, and of 200 in excise prosecutions.

12. *False cases.*—The percentage of cases declared false decreased from 6·8 to 6·0. There cannot be the slightest doubt that the actual percentage is very much higher In the *first* place, under Government orders, the Magistrate is to give the complainant the benefit of any doubt; *secondly*, it appears from the Inspector-General's remarks that numbers of direct petitions, summarily dismissed under section 203 of the Code of Criminal Procedure, are excluded from the returns altogether; *thirdly*, there is said to be an increasing tendency to exclude cases as false by mistake of law or fact; *fourthly*, the Inspector General is of opinion that many subordinate Magistrates declare false cases true in order to save themselves trouble, and to avoid the necessity for a prosecution under section 211 of the Penal Code. The number of cases excluded from the returns as false through mistake of law or fact was no less than 9,183, and different divisions show great variations in this respect. The Lieutenant-Governor believes that many cases, involving disputed title or possession, are excluded, when they should be shown as false. The mere fact that a dispute exists is too readily accepted as an indication of *bona fides*, whereas it often happens that one party tries to gain some undue advantage over the other by the institution of a false charge, or actually commits a criminal offence, relying on the mere assertion of a claim for his escape from any criminal consequences.

13. *Prosecutions for false charges* —Out of a total of 6,462 cases declared false, prosecutions were instituted in only 1,404 cases and convictions obtained in only 353. The subject of prosecutions for false charges is one on which there is much difference of opinion, and there is still considerable diversity of practice as regards the institution of such prosecutions. In the district of Nuddea the percentage of prosecutions was 46·0 and of convictions 40·4; while in the adjoining district of Jessore only one conviction was obtained in 35 cases. And even in the same district there is extreme divergence of procedure, as in two sub-divisions of the 24 Pergunnahs prosecutions were instituted in every instance, whereas in a third there were only 7 prosecutions to 69 false cases. In Chittagong only two prosecutions were instituted, though a hundred cases were declared false, and the Commissioner explains that this disregard of orders was due to the weakness of the staff. In this, as in some other districts, there appears to have been too great a tendency to note on C. false forms that there is not sufficient evidence for a prosecution. In Monghyr the results were extremely bad, there having been 246 false cases, 36 prosecutions, and only 4 convictions. As the Inspector-General remarks, figures such as these mean delay in instituting a prosecution, and dilatory procedure after institution, until the cases become thoroughly stale. The Magistrate of Gya's remarks regarding cases under section 211 of the Penal Code have been dealt with in a separate circular recently issued. Mr. Manson, Magistrate of Chittagong, enumerates all the undoubted obstacles to the administration of justice under this section, and concludes by saying that, when a certain class of crime is hedged about with such a growth of difficulties, it is not of much use ordering Magistrates to prosecute. There is much truth in these remarks, and the uncertainty and difficulties must continue until the Calcutta High Court declare, by a Full Bench ruling, what they consider to be the law and the correct procedure. At present there is such a mass of contradictory rulings under section 211 of the Penal Code, that it is impossible to educe therefrom any sound *ratio decidendi*. An attempt to follow these rulings, or some of them, has caused a bewildering variety of procedure in different districts. When a man is made an accused under section 211, or knows he is likely to be, he at once presents a petition asking to have his witnesses heard. Then commences a course of chicanery and crafty attempts to frustrate and delay justice. An impression prevails that *all* witnesses cited must be examined before a complainant can be prosecuted under section 211. Therefore, a complainant files a long list of witnesses and *instructs some of them not to appear.* The Magistrate sees through the trick, but what is he to do? It may

be a waste of time to proceed with the prosecution under section 211, as, owing to the uncertainty of the case-law, it cannot be predicted what view may be taken by the appellate or revisional court, convictions having sometimes been upset because some or *even one* of the witnesses named in the list filed had not been examined. A Magistrate therefore feels compelled to get the witnesses in somehow, and so valuable time is wasted. It is hardly to be wondered at that some Magistrates should give up section 211 prosecutions in despair, as they have not a sufficient staff to cope with such chicanery and to make the preliminary enquiries. The fact, however, remains, as has been repeatedly insisted on in Government Resolutions, that until persons are made to feel that they cannot bring deliberately false charges with impunity, so long will these charges continue to be the blot they are on our criminal administration.

14. *Refusal of enquiry.*—Out of a grand total of 107,410 cases reported, only 792 or ·7 per cent. were not enquired into under the provisoes to section 157 of the Criminal Procedure Code against 3·6 in 1882. The Dacca Division shows a percentage of 3, which is said to be due to 286 refusals in Mymensingh. On the other hand, some districts have no refusals. The Lieutenant-Governor agrees with the Inspector-General that attempts to commit house-breaking are often cases of some importance, but he does not think that all cases should be enquired into; the police must use their judgment in the exercise of the discretion which section 157 gives them. Private persons are not bound to give information in cases of theft or attempts to commit house-breaking, and to make enquiry in very petty cases may cause much harassment and hardship to individuals, as well as occupy time which might be more advantageously used by the police in other directions. The law clearly enacts that an officer *need* not investigate on the spot, if the case is not of a serious nature and some particular person is named; and that he *shall* not investigate if, in his opinion, there is no sufficient ground for entering on an investigation. Abstention from investigation in very petty cases admits of more attention being given to more important cases, and enquiry might properly be refused in cases of petty theft of grain or of some unidentifiable article of little value. Moreover, there are other sorts of petty cognizable crime, in which the people are quite ready enough to resort to the police, and such tendency should not be unduly encouraged. In Nuddea there were 58 refusals, and in this connection the Magistrate remarks that enquiry is often refused in cases which are compoundable under section 345 of the Criminal Procedure Code. He thinks that the action of the police is not to be wondered at, whilst the unreasonable practice continues of entering discharges on compromise in the same category with acquittals, and points out that another disadvantage of the classification is that it is a strong temptation to an officer to exaggerate true compoundable cases into semi-false non-compoundable cases. The fact that compositions of offences are reckoned as acquittals appears to affect the police administration prejudicially in many ways. In Rajshahye there were no refusals to enquire, and the Magistrate remarks that the people are afraid to leave attempts unreported, as the police take them up to make money. It is doubtless advantageous that chowkidars should be encouraged to report all cognizable crime occurring in their villages, but care should be taken to see that no inconvenience or hardship is inflicted on individuals. There must be numerous cases in which no advantage can possibly accrue from enquiry, and the procedure as laid down in section 157 of the Criminal Procedure Code should be strictly followed. The extremely low percentage of refusals for the whole Province appears to indicate that the provisions of that section have not been strictly adhered to. Having regard to the large number of cognizable offences under the Penal Code, to the very petty character of some of them, to the fact that in numerous cases no advantage can accrue from enquiry into petty thefts or attempted house-breakings, and that there is no legal obligation on private persons to give information of such offences, the Lieutenant-Governor does not consider that the percentage of refusals in the Dacca Division as a whole (3) is so abnormal or excessive as to call for any condemnatory remarks. At the same time he notices that in Mymensingh and Backergunge refusal to enquire into cognizable cases seems to have been carried too far In the former

district the investigating staff may be insufficient to cope adequately with the work it is called on to perform; and under these circumstances some petty cases may and, indeed, must, be refused, or the more important ones must be neglected. But this is not altog ther the case in Backergunge; and it would seem obvious that when 9 cases of hurt, in which *daos* were used, were not enquired into owing to "the general sense of indifference to bloodshed" prevalent in the district, the discretion allowed under section 157 has been too fully exercised.

15. *Convictions and arrests.*—The percentage of convictions in cases enquired into by the police was 38·3 against 39·8 in 1884 and 41·9 in 1883. The number of persons arrested by the police was 76,831, of whom 52,919 were convicted, the percentage being 68·8 against 67·7 in the previous year. The highest percentage is shown by Darjeeling, Howrah, and Patna, and the lowest by Pubna, Khulna, and Backergunge The results in Pubna were extremely bad, and though various causes are assigned, the Magistrate cannot be altogether absolved from responsibility. The criminal work in this district is heavy, and the normal number of officers will probably have to be increased by one.

16. *Percentage of Convictions and Sessions trials.*—The percentage of convictions to arrests, of convictions to persons brought to trial, and of convictions to persons actually tried, show an increase on the previous year under all classes of crime. The percentage of convictions in offences against the person continued to be low. The percentage of convictions to the number of persons tried at Sessions trials was only 56·3, a lower average than any during the last five years. In three of the jury districts (Patna, Dacca, and Hooghly), there were more acquittals than convictions. In Burdwan (also a jury district) results were better, the percentage of acquittals being 39·1; but in the adjoining district of Midnapore, where trials are held with the aid of assessors, the percentage of acquittals was only 17·7. In the Dacca Division the percentage of acquittals fell from 60·0 to 31·1, but no reason is assigned for this marked improvement. In Behar (excluding Patna, the only jury district), the results of Sessions trials were satisfactory, the acquittals varying from 14·2 per cent. in Chumparun to 24·3 in Shahabad. In Dacca five and in Burdwan two verdicts of juries were referred and set aside under section 307 of the Code of Criminal Procedure. In two cases out of three referred in Hooghly, unanimous verdicts of not guilty were set aside, and in a fourth case the Judge accepted a verdict with which he disagreed. This subject will be further alluded to in a subsequent paragraph of this Resolution.

17. *Property stolen and recovered.*—The number of cases in which property was stolen increased from 40,683 to 41,117, while property was recovered in 18,075 cases against 18,582 in 1884. The amount stolen increased from Rs. 9,92,560 to Rs. 10,30,005, and the amount recovered from Rs. 2,67,092 to Rs. 3,00,158. The percentage of cases in which property was recovered to those in which property was lost declined from 45·6 to 43·7, whilst the percentage of property recovered to property lost increased from 26 9 to 29·1. The latter percentage was as high as 56·1 in Palamow and Noakhally, whilst in Mymensingh and Rungpore, where the police are said to be overworked, it was as low as 11·8 and 14·9 respectively. In Gya, too, the results were very bad, and the Magistrate alleges as the reason the large number of professional receivers of stolen property, many of whom are persons of outward respectability and of some influence, against whom evidence can very seldom be obtained. With reference to such persons, if reliable information is received that they are habitual receivers of stolen property, proceedings should be instituted against them under section 110 of the Criminal Procedure Code, and the issue of a search-warrant under section 98 would also be justifiable. It does not appear to the Lieutenant-Governor to be of any use to discuss the percentages of different districts. As remarked by the Commissioner of Dacca, the recovery of stolen property is to a great extent a matter of chance, and seldom the result of police action, or, it would be more correct to say, of police detective ability. High or low percentages afford but a very uncertain criterion of police efficiency and exertion.

18. *Analysis of crime by classes*—The annexed statement shows the number of true cognizable cases in 1878 and during the past five years—

	1878.	1881.	1883	1883.	1884.	1885
Class I.—Offences against the State and public tranquillity.	2,785	2,427	2,508	2,639	2,769	2,802
„ II.—Serious offences against the person.	4,267	4,301	4,267	4,684	4,618	4,484
„ III.—Serious offences against the person and property or against property only.	23,887	19,051	18,520	19,609	24,221	24,103
„ IV.—Minor offences against the person.	9,534	11,096	12,450	2,813	2,580	2,533
„ V.—Minor offences against property.	45,849	35,673	36,301	37,690	42,630	42,206
„ VI.—Other offences not specified above.	14 996	24,056	27,181	29,554	28,477	24,819

The figures for 1885 are very much the same as those for 1884, except that there is a considerable decrease under class VI.

19. *Class I.—Offences against the State and public tranquillity.*—Under this class there is a small increase of 33, due solely to an increase of 103 under rioting, as all the other heads exhibit a decrease. The percentage of convictions in rioting cases was only 43·7 against 41·1 in 1884. This percentage is very low, and, in the Lieutenant-Governor's opinion, is probably due to the fact that the police are inclined to send up many cases as riot, which might be more appropriately disposed of under the sections relating to theft, mischief, criminal trespass, hurt, and hurt with dangerous weapons. No doubt when a riot has actually occurred, the police are often justified in sending up both parties with cross A. Forms, leaving the Magistrate to adjudicate on any pleas of justification urged by either side, such as actual possession, or the exercise of the right of private defence. But it is to be feared that in such cases counter-charges are too readily accepted, when a little patient enquiry would demonstrate the absolute falsity or untenability of one of them. Moreover, compositions being reckoned in the returns as acquittals, cases of hurt under sections 323 or 324 of the Penal Code are converted into cases under section 147 (non-compoundable) by the unjustifiable addition of persons who have taken no active part in the occurrence. The Burdwan Division shows an increase of 60 cases, of which there was an increase of 26 in Midnapore. "One of the Hooghly cases," remarks the Inspector-General, "was a pitched fight about a hât at Seoraphuli, only fourteen miles from Calcutta, between the adherents of two rival zemindars, conducted in a manner worthy of the worst days of Dacca or Mymensingh." There are grounds for believing that two Honorary Magistrates abetted the riot, and their names have been removed from the list of such Magistrates. There was a serious case in the Midnapore district, in which some four or five hundred people, said to have been headed by one of the Moyna zemindars, forcibly cut the Government embankment near Ghanpore, thereby flooding a large tract of country and destroying the crops. The Inspector-General remarks that the case broke down owing to the appearance of a native Barrister, who is said to have examined and cross examined the witnesses for 38 days, "until the record became a ponderous volume, and the real facts were buried in irrelevant matter." The case was tried by the Sub-divisional Officer of Tumlook, and the Judge of Midnapore brought the conduct of the Barrister to the notice of the High Court. This Government has also addressed the High Court on the subject. The most serious feature connected with the rioting in the Presidency Division was the fact that as many as 13 were attended with loss of life. The Inspector-General remarks that agrarian disputes can be generally nipped in the bud. "A riot of any dimensions is the outcome of preparation and cannot possibly be organized and carried through off-hand; if then, as soon as the symptoms of coming disturbance are observed, the fomentors and instigators are made marked men

by being bound over to keep the peace, they will invariably be found to lose heart and to become discredited in the eyes of their followers. There is no other mode of prevention, and the only cure consists in hunting down the rank and file to the last man, and in impressing on the country side the wholesome lesson that no case will be dropped until every man concerned has been accounted for." As regards the principal instigators and ringleaders, the Lieutenant-Governor entirely agrees with these remarks. A serious riot may often be prevented by a judicious resort to the provisions of section 107 of the Criminal Procedure Code. Where the zemindar resides outside the district, and organizes and instigates the riot from a distance, it is no doubt somewhat difficult to get at him owing to the rulings (I. L. R., 11 Cal., 737; 12 Cal., 133, following I. L. R., 6 All. 26) that a Magistrate has no power to take proceedings under this section against a person not personally within his jurisdiction. The Judges appear to have rejected the wider and more natural construction, because "it would empower any Magistrate in any part of India to require on *ex parte* information the attendance of any person from any part of India" But if a zemindar instigates a disturbance in Jessore from Calcutta or elsewhere, there appears to be no good reason why he should not be summoned by the Magistrate of whose district the peace is imperilled, provided there be sufficient *primâ facie* evidence of the instigation. There is no hardship in enforcing the attendance of an absconding offender, and it is of the essence of criminal law that process should be issued on *ex parte* information. Supposing a riot has actually been committed, and a Magistrate thinks there are grounds for believing that an absentee zemindar has been guilty under sections 154, 155, or 156 of the Penal Code, he can at once issue process under those sections; and, subject to the above remarks, there appears to be no reason why process should not be issued for prevention in the same way as for punishment. The above rulings were brought to the notice of the Legal Member by more than one Local Administration when Act X of 1886 was before the Legislative Council, but, as the Code was not being generally revised, no action was taken. Under these circumstances, it would be desirable to have the matter set at rest by a Full Bench ruling. But putting aside the provisions in the Criminal Procedure Code, when riots have actually taken place, and there are *primâ facie* grounds for believing that absentee owners or agents have committed offences under sections 154, 155, and 156 of the Penal Code, those sections should be rigorously enforced; this is rendered all the more necessary by the disability of issuing process for purposes of prevention. Of course the sections should be equally enforced against resident owners and agents, and if this be done, the Lieutenant-Governor has no doubt that serious and homicidal riots will considerably diminish in number. The Cuttack district shows 45 rioting cases against 18 in 1884—a rise of exactly 60 per cent.—due to the disputes in connection with killa Koojung, the property of the Burdwan Raj. Out of 70 cases in the Chota Nagpore Division, 32 occurred in Manbhoom, in a portion of which (pergunnah Burrabhoom) there are disputes relating to the cultivation of indigo, and the relations between Messrs. Watson and Company's Manager and the ryots are in consequence very strained. The Dacca Division shows 443 rioting cases against 438 in 1884. A decrease in Chumparun is attributed to the people being more than ordinarily comfortable; but, as the Inspector-General points out, it is in Eastern Bengal where the ryots are well off and the pressure of poverty is least felt that the offence of rioting is most ingrained and prevalent. In the Sonthal Pergunnahs occurred the so-called "gola-kata" case, an occurrence on the Ganges near Rajmehal, in which the Sub-divisional Officer of Rajmehal and some other Europeans in a boat were attacked by the boatmen of some other boats, who were under the impression that the Sahibs were, at the instance of Government, in search of human heads to be thrown into the river at the site of some bridge about to be constructed. The offences relating to coin do not call for any particular remark. There were 119 cases against 101 in 1884. Seventy-one persons were convicted and 44 discharged or acquitted.

20. *Class II.—Serious offences against the person.*—The following statement shows the number of reported cases and the number of persons

convicted in the different divisions of the province during the past two years :—

Division.	Cases reported.		Persons convicted.	
	1884.	1885	1884	1885.
Burdwan	644	635	344	322
Presidency	879	823	456	484
Rajshahye	671	607	303	297
Dacca	914	926	467	506
Chittagong	308	323	209	191
Patna	888	846	487	519
Bhagulpore	360	354	203	208
Orissa	228	196	96	80
Chota Nagpore	248	234	144	138
Total ...	5,140	4,944	2,709	2,745

There were 288 murders against 266 in 1884. Of these, five were by dacoits, 10 by robbers, 16 by poison, and 257 were murders of other kinds. It is noticeable that the number of murders by poison has exactly doubled, whilst the number of drugging cases has increased from 8 to 19. The Bengal figures show one murder for every 229,042 of the population, while in England in 1883-84 there were 170 murders, or 1 to every 159,602 of the population. But there can be no doubt that a certain number of murders are not brought to light in Bengal. Suppression is more easy owing to certain facts and customs, such as the desire to prevent disgrace falling on a family, the absence of any restriction on the sale of poisons in the mofussil, defective rules and arrangements for reporting and registering deaths, and the habit of burning the body almost immediately after death.

The annexed statement shows the number of cases under the principal heads of class II during the past two years :—

Description of crime.	1884.	1885.
Attempts at murder	49	55
Culpable homicide	191	203
Rape	145	133
Unnatural offences	63	42
Exposure of infants or concealment of birth ...	116	109
Attempt at abetment of suicide	376	370
Grievous hurt	791	775
Hurt by dangerous weapon	1,064	1,075
Kidnapping or abduction	198	246
Criminal force to public servant or woman, or in attempt to commit theft or wrongfully confine	1,106	941

In 1884 abduction showed 66 cases fewer than in 1883, while it now has an increase of 48. The Lieutenant-Governor is inclined to agree with the opinion of the Inspector-General that the fluctuations under this head are not so much in crime committed as in crime reported. Cases of kidnapping female children for purposes of marriage are frequently compounded without coming into court at all, while caste considerations keep out of court many cases of the abduction of women. The variations under the other heads do not call for any notice There was a very bad case of rape in the Burdwan Division, in which the victim, a child of eight or nine, was gagged before the crime was committed. The sentence of two years' rigorous imprisonment passed by the Sessions Court was, in the Lieutenant-Governor's opinion, quite inadequate. The exposure of infants continued to be unusually prevalent in the Patna Division, which shows 61 cases to the provincial total of 109. The Inspector-General thinks that the explanation may be looked for in the general poverty

of the population. The density of population to the square mile is greater than that of any other division except the Presidency, while the population is almost one-fourth of the total population of the Province.

21. *Cases of murder in different divisions.*—Of four poisoning cases in the Burdwan Division, one was instigated by a kobiraj to get rid of the husband of a woman with whom he had an intrigue; in another a woman poisoned the child of her former paramour out of revenge. In both cases the jury acquitted. In Beerbhoom a man who killed his child by dashing it on the ground, in order to be able to bring a false charge of murder against a man who had given evidence against him, was transported for life. *Primâ facie* the case appears to have been one for a capital sentence. There were several cases, as usual, of the murder of children for the sake of their ornaments of trifling value. These cases are not likely to decrease so long as children are loaded with ornaments and allowed to play about the villages. In Dinagepore a man caught by his neighbours in an intrigue with their relative, a widow, was punished by them in a manner not unusual in such cases by having a stick forced up his person. He was then left out all night, and eventually died of peritonitis. The case resulted in an acquittal. The number of murders in the Dacca Division was 58, which exceeds the total of any year since 1877. In Backergunge only 4 cases out of 22 decided, and in Mymensingh only 4 out of 14, ended in conviction. In one case a Hindoo, who had seduced his employer's daughter, a widow, killed with a *dhao* a rival whom he had found with her, and was, on conviction, sentenced to death. The High Court acquitted him, though he had never made any secret about his commission of the deed A man cleft his child's head with a *dhao*, in order to be able to bring a false charge of murder against some people who had cut his paddy. The Inspector-General states that the case was proved to the hilt, and the assessors were for a conviction, but the Judge acquitted on the ground that such a case was exceedingly improbable. A similar case, however, occurred in Beerbhoom, and other cases of the same kind are mentioned in paragraphs 163 and 192 of the report for 1884. A man killed his mistress, his mother-in-law, because she objected to his giving her up in order to live with his wife, her daughter, on the latter attaining the age of puberty. He absconded and has not since been heard of. That such illicit or incestuous intimacies are not uncommon is unhappily too manifest from the records of our criminal courts. In Chittagong five boys were charged with murdering a girl by filling her mouth with mud during an attempt to rape her. The case against them broke down, as it rested solely on their own statements, which were withdrawn before the Sessions Court. A case in which a woman was murdered by her husband, who absconded before the crime became known, is instanced by the Commissioner as showing what little value is attached by the native mind to circumstantial evidence. The Government Pleader recommended the withdrawal of the prosecution because there were no eye-witnesses, and for the same reason the assessors were for an acquittal. The Judge, however, convicted, and the accused was sentenced to transportation for life. In a Sarun case quarrels between rival wives led to one of them being murdered. Her body was found lying naked in an indigo field; blood was oozing from the mouth and nostrils, and the private parts had been lacerated by the insertion of pieces of wood. The surviving wife was sent up and committed, but in the absence of eye-witnesses was acquitted. A woman of the Chamar caste was deliberately murdered by a man whom she had refused to treat for a venereal disease. The man was convicted of culpable homicide, and got off somewhat lightly with four years' rigorous imprisonment. In Patna a widow who had become pregnant was murdered by her seducer with the approval of the relations on both sides, in order that he might not be put out of caste. The jury acquitted him. In the Sonthal Pergunnahs a chowkidar murdered an old woman whom he suspected of having bewitched his son, and was sentenced to transportation for life. In Monghyr, after a fight about the possession of some land, the aggressors got hold of the village idiot and murdered him in order to get up a case. The Judge sentenced three men to be hanged, but they were all released by the High Court. In Maldah, two men murdered a boy of eight for the sake of his ornaments; they were convicted and sentenced to death, but released on appeal by the High Court.

Darjeeling with 11 each, and Moorshedabad, Manbhoom, and Pubna with 9. each. The Inspector-General remarks that it is only in the Rajshahye, Midnapore, and Gya circles that organised dacoity has been found to exist. Of the 164 dacoities of the year, 85 are returned as "professional," as opposed to "local" or "technical," but the Inspector-General doubts if the classification has been properly understood and applied, and thinks that, until any particular gang is detected, local officers would return its work as technical. The Inspector-General thinks it would be better to call a dacoity professional when the guiding motive is the intention to plunder, and technical when it is simply terrorism, as when a zemindar uses it as a short way of getting rid of a troublesome ryot, or a debtor of settling his accounts. But if there is simply terrorism without any attempt to commit robbery, the offence would not be dacoity; while other cases, in which the intention is to plunder, such as the forcible carrying away of a crop by five or more persons, fall within the technical definition of dacoity. In the Lieutenant-Governor's opinion a Magistrate should have no difficulty in practice in distinguishing between professional or regular and other technical dacoities, though it is not easy to define the distinction in words. For instance, where the object is simply a demonstration of hostility (as is common in Western Bengal) the infliction of insult or outrage, intimidation, or the gratification of revenge, the acts would more properly fall under other sections of the Penal Code, such as section 147 or sections 454—458. Even the semblance of a claim, such as exists in most paddy-cutting cases, should remove the offence from the category of dacoity. If property were taken in the cases abovementioned, the dacoity would be merely local or technical. But where the object is plunder, pure and simple, whether the robbery takes place in a house or on the high road, the offence amounts to regular dacoity, and should be shown as such. The Lieutenant-Governor does not consider it so necessary to distinguish between professional and local dacoity as between regular and technical dacoity. The object is to ascertain the number of cases of real dacoity, and for this purpose it does not signify whether the dacoits are professional men, who habitually commit dacoity, or whether they are local men, who have been driven to it by distress, or commit the offence for the sake of gain Impunity in one case may lead to the commission of further offences; so that it would be difficult to draw a line between so-called local offenders and professional dacoits. The nature of the offence, its object, and the acts committed must be looked to rather than the antecedents and residence of the actual perpetrators. The results of trials for dacoity were, as usual, unsatisfactory. In Bankoora they were extremely bad, as only one man was convicted out of 34 sent up. The Inspector-General remarks that the Beerbhoom cases were undoubtedly the work of men driven to crime by distress, and occurred only in those parts of the district in which charitable relief and relief works were not in operation. Out of 10 cases decided, 6 ended in conviction, but the number of persons convicted (14) was small considering that 61 were sent up. The Moorshedabad Police sent up 74 men, of whom 28 were convicted in 11 cases One case, in which the women of the house were stripped and burnt with torches, was extremely peculiar, as the dacoits were a mixed gang of Brahmans and Mahomedans. One of the Pubna cases, in which no property was taken, is believed to have been the work of an unsuccessful decree-holder to frighten his debtor into showing where his money was hidden. Two mail-robberies, which occurred near Serajgunge, appear to have been technical dacoities, the object of the offenders being to procure the dismissal of the runners or of the overseer in charge of the line. In the Bhagulpore Division there were 16 cases of dacoity against nine in 1884, and of these six occurred in Purneah and three in Maldah. Detection and results were alike very bad, as but five cases were brought to trial, and of these only one ended in a conviction. Results were equally bad in the Chota Nagpore Division, where dacoity cases exhibited a further rise from 17 to 20, while only two cases ended in conviction. There were 11 cases in Hazaribagh, of which the police succeeded in working out only one. Eight persons were convicted at the Sessions, but six of them were afterwards released by the High Court.

25. *Class IV.—Minor offences against the person.*—This class shows an unimportant decrease of 47 cases, 2,533 against 2,580 in 1884. The percentage of

persons convicted to persons tried was 32 4, the low percentage being partly due to the fact that some offences under this class are compoundable under section 345 of the Criminal Procedure Code, and that compositions are reckoned as acquittals. There were 2,197 cases of wrongful restraint and confinement against 2,539 in 1884. The Dacca Division shows almost twice as many cases (648) as any other division, Burdwan coming next with 377. There can be no doubt that the large number of cases in the Dacca Division has some connection with the greater prevalence of unsatisfactory relations between landlords and tenants, attempts to enhance rent, combinations to resist enhancement or to withhold even just dues, and generally with agrarian disputes of various sorts. The Inspector-General remarks: "any sudden and considerable increase in a given district may generally be attributed to an attempt to resist an enhancement of rent, a charge of this nature being usually the first step taken by the ryot after an unsatisfactory visit to the zemindari cutcherry. From a police point of view, the crime is not one of any importance, nor is it one with which subordinate officers can safely be trusted, since both sides are usually ready and willing to bribe. The large proportion of cases returned by the Dacca Division may, in this way, be taken merely as an indication of the favour with which a charge of this nature is regarded as a weapon of offence by the well-to-do and litigious inhabitants of Eastern Bengal." The proportion of false cases to cases reported in the Dacca Division is shown as nearly 8 per cent., but this figure probably falls short of the actual percentage. The percentage shewn hardly bears out the above remarks of the Inspector-General; nevertheless, the Lieutenant-Governor feels sure that cases of wrongful confinement or restraint of ryots by zemindars, to compel payment of rent, or as a punishment for opposition, are gradually disappearing, and the few true cases that occur are generally so overlaid with exaggeration as to render conviction a difficult matter, only 33 per cent. of the cases decided having ended in conviction..

26. *Class V.—Minor offences against property.*—There were 42,206 offences under this class against 42,630 in 1884. The following table shows the increase or decrease under the principal heads:—

Description of offence.	1884.	1885.
Lurking house-trespass or house-breaking ...	855	692
Theft of cattle	2,129	2,055
Ordinary theft	27,625	27,376
Criminal breach of trust	1,587	1,614
Receiving stolen property	2,074	1,874
Criminal or house trespass	8,836	8,562

The percentage of persons convicted in police cases to persons sent up for trial was 61·8 to 60·2 in 1884. The district of Moorshedabad shows a large increase of 538 cases, which is attributed to the scarcity prevailing in the western portion of the district, and to the employment of the police in relief measures, more particularly after the bursting of the Laltakuri bund, which gave bad characters greater freedom of movement. The Rajshahye Division shows a net decrease of 532 cases, Rungpore having 322 fewer, and Bogra 468 fewer. The decrease in Rungpore is attributed to general prosperity, while the Inspector-General thinks that ill-judged action on the part of the assistant in charge led to the concealment of crime in Bogra. Mymensingh which showed 424 fewer cases in 1884, now shows an increase of 532, a result which the Inspector-General considers to be due to a more honest system of keeping the returns. Taking together all sorts of housebreaking (serial Nos. 36, 37, and 43 of Statement A, part I), Sarun shows a decrease of 161, and Chumparun of 125 cases. Mozufferpore and Sarun have now shewn fewer cases for four years running, and the latter district had only 346 cases in 1885 against 1,219 in 1880. Gya on the other hand, has nearly 1,200 more than any other district, and continues to show by far the worst judicial results. The District Superintendents of Patna and Shahabad complain that their districts being easily accessible are considered a good field of operation by criminals from elsewhere, and that the natural difficulty of detecting these cases is increased by the social status of the receivers. The decrease in Sarun and Chumparun is no doubt partly due to the success of measures

22. *Sessions trials.*—Results before the Court of Sessions, though still far from good, were better than in any previous year since 1881, and the convictions exceed the acquittals for the first time since that year—

	Acquitted by Sessions.	Convicted by Sessions.	Percentage of convictions to total tried.
1881 ...	564	616	52·2
1882 ...	634	524	45·2
1883 ...	619	473	43·3
1884 ...	576	481	45·5
1885 ...	491	524	51·6

The results in jury districts continue to be very bad. In Burdwan, out of 19 persons committed for murder, only 1 was convicted and 16 acquitted. In Dacca out of 298 persons tried, only 94 were convicted, and in Patna only 59 out of 179. On the whole, excluding jury districts, the Lieutenant-Governor is inclined to think that where commitments are carefully made, acquittals are the exception rather than the rule. It is to be feared that some Magistrates send meagre, ill-prepared, and ill-sifted cases to the Sessions, either to save themselves trouble, or because they are under the impression that all responsibility in the matter must be thrown on the Judge. In 14 W.R. Cr. 16 (see also case of Moha Singh, 3 All. 27) it was ruled by Kemp and Jackson, JJ., that if the result of the enquiry into the defence leaves the matter in doubt, it is the duty of the Magistrate to commit and leave the Sessions Court to decide which is the true story. But these rulings are hardly in accord with the wording of the present law. Section 210 of the Code of 1882 has substituted the words "*sufficient* grounds for committing the accused for trial" for the words in section 196 of the former Code, namely, "evidence which *appears to justify* a Magistrate in sending the accused person to take his trial." The requirements of the present Code are thus stronger, and a ruling of the Allahabad High Court appears to be more in accord with the present law. This ruling is that a Magistrate is not bound to commit where the evidence, *if believed*, would support a conviction: if he discredits such evidence, he is competent to discharge the accused (I. L. R., 5 All. 161). Sections 436, 437, *seq.*, of the Code of Criminal Procedure, provide ample remedies for hasty and improper discharges, and, in the Lieutenant-Governor's opinion, it is hardly right and can seldom be productive of any good result for Magistrates to commit in cases in which, if they had jurisdiction, they would not themselves convict. As regards erroneous or unsustainable verdicts of juries, Sessions Judges are *bound*, under section 307 of the Criminal Procedure Code, to submit the case to the High Court, when they disagree with the verdict so completely as to consider such a step necessary for the ends of justice; the law leaves them no option in the matter. And it is all the more necessary that they should strictly comply with the law, as it has been decided that no appeal by the Local Government lies under section 417, where the case has been tried by a jury and the questions involved are purely questions of fact. For such an appeal to lie it must be supported on a ground which is covered by section 418 (I. L R., 10 Cal., 1029). In the Resolution on the Report for 1884, the Sessions Judge of Hooghly was asked to explain the reason of the large proportion of acquittals in cases tried by him. The Judge dealt with the cases *seriatim*, and from his reply it appears that, though he entirely dissented from the verdict in certain cases, yet he *did not think it worthwhile* to refer them to the High Court on the ground that the juries were unanimous His report shows that, though he dissented from eight verdicts of acquittal, he only referred two, which both resulted in convictions. By not referring the other six cases, the Judge assumed a responsibility which properly belongs to the High Court. He was bound by law to refer, and having done so, he becomes *functus officio*; it is for the High Court to decide whether they will follow the opinion of the Judge, or will uphold the verdict of the jury. The Lieutenant-Governor trusts that in future Sessions Judges will not refrain from references for no other ground than that they think a conviction by the High Court improbable. If a Judge considered an accused had been wrongly convicted by a jury, he would certainly refer the case; and the law should be equally observed when a wrong verdict is given in a prisoner's favour. In this connection the Lieutenant-Governor would quote some very apposite remarks made by West, J., in a Bombay case:—"When

juries know that their verdicts are liable to the scrutiny and supervision of this Court, they will feel the necessity of exercising conscientious deliberation in arriving at their verdict. The same check will prevent temptations to a wilfully wrong verdict from being held out to them. It is our duty, in the present case, to satisfy ourselves that the verdict of acquittal is proper or at least sustainable; and if we find that it is not, the law enjoins on us to set it aside and pass the right judgment ourselves." As regards failure or success at the Sessions, much also is in the hands of the committing Magistrates. They should not fail to sift the evidence offered to them; they should test confessions as far as possible, and they should endeavour to supply essential links in the chain of proof which the police have left wanting. Failure is sometimes due to the neglect of a Magistrate to study the police diaries before or while enquiring into a case. Magistrates should always remember that, in heinous cases, which they do not try but commit, they are not Judges deciding a case, but officers holding an enquiry analogous to a police enquiry, and that it is their bounden duty to get at the truth by every means that the law allows, to assist the police by suggestions, and to supplement defects themselves, instead of shutting their eyes and ears, and delegating the whole of their duties to pleaders and police officers.

23. *Class III.—Serious offences against person and property, or against property only.*—There were 24,103 true cases against 24,221 in 1884. The annexed statement shows the number of cases under the principal heads of this class during the past two years:—

Description of crime.	1884.	1885.
Dacoity	165	164
Robbery with hurt	13	26
„ in dwelling house	18	19
„ on highway between sunset and sunrise ...	22	20
Other robberies	114	111
Serious mischief and cognate offences	639	703
Mischief by killing, &c., any animal	815	794
Lurking house-trespass or house-breaking with intent to commit an offence or having made preparation for hurt	22,173	22,023
House-trespass ditto	248	235

The variations hardly call for any notice. The Inspector-General thinks that, but for a certain amount of agricultural distress in the spring, there would have been a return to the lower figures of the three previous years. An increase of 11 per cent. in the percentage of cases ending in conviction to cases decided is a satisfactory feature. The bulk of the cases of mischief to animals is made up of cases of poisoning cattle for the sake of their hides. This crime is exceedingly difficult of detection; a few pea-leaves covered with arsenic are thrown on the ground in front of a grazing animal, and the deed is complete. The commission of this offence is further facilitated by the absence of any restriction on the sale or possession of poisons outside municipalities. The difficulty of detection renders it all the more necessary to pass adequate sentences when any case is proved. In paragraph 32 of the resolution on the report for 1884, the Inspector-General was asked to notice separately cases of mischief by fire. This has been done, and the judicial results are extremely bad, only 8 persons having been convicted against 156 persons acquitted. Firing of houses is a common method of revenge in this country, and the nature of the houses renders the offence exceedingly easy of commission. At the same time, as the Inspector-General remarks, false charges of arson appear to possess a peculiar attraction as a means of inflicting injury on an enemy, no fewer than 117 cases (out of 384 cases reported) having been declared false. The districts of Nuddea and the 24-Pergunnahs had 18 true cases each and not a single conviction.

24. *Dacoity.*—As regards dacoity, the Rajshayhe, Burdwan, and Chota Nagpore Divisions are the worst in the order named, Rajshayhe having held the first position since 1880. One division, Chittagong, was entirely free from this crime: indeed, during the last six years there have been only eight cases in it. Ten districts exhibit a clean sheet, nine more have only one case each, and twelve have less than five. The seven worst districts are Bankoora with 13 cases, Beerbhoom with 10, Dinagepore and

taken to settle the Mughya Domes. There was a large decrease of 297 cases in Purneah, and a still larger increase of 405 in Monghyr, which is probably due to better reporting by the chowkidars. As regards cattle-theft, a system is said to have been introduced in Nuddea by Major Ramsay, by which the purchase and sale of cattle used to be registered in the chowkidar's note-book and at the thana. It is not stated by whom the entries were made, if the chowkidars were illiterate, and it is to be hoped that the parties to the sale were not subjected to any restraint or inconvenience. The Lieutenant-Governor would like to have further information on these points. In several districts it is the practice for sales of cattle at hâts to be registered or at least brought to the notice of the proprietor or Ijaradar of the hât. In Pubna the police now attend all cattle-markets in the sudder sub-division, and some thefts are said to have been detected in consequence. There seems to be some doubt as to whether reports of the loss of cattle are to be reckoned as cattle-thefts, and probably there is some diversity of practice in this matter. The District Superintendent of Sarun complains that goats and kids are classed as cattle, but the definition in the Cattle Trespass Act must be taken to settle this point. Still, the theft of a kid and that of a bullock are, in point of heinousness, very different sorts of crime. As regards the loss or straying of cattle, the Lieutenant-Governor is of opinion that such cases should be entered as thefts, whenever the complainant alleges or suspects theft, but if he does not do so, and the police officer, on questioning the complainant, can discover no grounds for believing that a theft has been committed, there is no reason why the case should be entered as such, as, even if any offence be subsequently committed in respect of the animal, it might be the non-cognizable one of criminal misappropriation.

27. *Class VI.—Other offences not specified above.*—There were 24,819 cases under this class against 28,477 in 1884, more than two thirds of the decrease being accounted for by the falling off in prosecutions for public and local nusiances. The following table shows the figures for the last two years under the principal heads of this class:—

Description of offence.	1884.	1885.
Vagrancy and bad character	1,122	1,117
Offences against excise laws	2,606	2,404
Ditto Opium Act	537	571
Ditto railway laws	346	348
Ditto salt and custom laws ...	766	353
Ditto Arms Act	1,204	939
Public and local nuisances	20,709	18,053
Other special and local laws cognizable by police	1,045	905

The percentage of persons convicted in police cases to persons sent up for trial was 89·6 againt 88·6 in 1884.

28. *Vagrancy and bad livelihood.*—Out of 1,210 persons called upon to show cause, 750 were required to find security, and 410 were discharged. Proceedings were thus instituted against only one person in every 54,515 of the population, figures which demonstrate the leniency and even sparingness with which the sections of the Criminal Procedure Code relating to this subject have been resorted to. In England, in the year 1883-84, 51,549 persons were proceeded against under the Vagrant laws, and 620 under the Prevention of Crimes Act, 1871. In Bengal 1,078 cases were instituted on the report of the police, and 77 by petition before the Magistrate; of these 695 of the former and 34 of the latter ended in conviction. Some of the cases were delayed for long periods, a fact which was possibly due to the orders that the inquiry should ordinarily be held on the spot. A case in Nuddea occupied more than a year, one in the 24 Pergunnahs 330 days, one in Tipperah 326, one in Backergunge 295, one in Julpigori 223, while ten other cases occupied more than 100 days each. The average duration in Tipperah was 167, in Maldah 112, and in the 24-Pergunnahs 90 days. Explanations will be called for from the district officers. The Inspector-General remarks: "there has been a very satisfactory decrease, from 144 to 77, in the number of cases instituted on petition." The Inspector-General apparently thinks that cases are more likely to be false or frivolous when instituted on petition, but the results hardly

support his opinion, as 44 per cent. of these cases ended in orders for furnishing security. 760 cases were tried in the village of the accused, and 326 in court The Inspector-General thinks that more cases should have been tried on the spot. But, after giving full consideration to the matter, the Lieutenant-Governor is inclined to think that the standing orders of Government on this subject admit of some slight relaxation. It was observed in the resolutions on the Reports for 1883 and 1884 that wandering, homeless thieves should be tried as soon as sent up. But, apart from this class of offenders, there may be many cases in which no advantage can accrue from a visit to the spot, especially where the person charged is an habitual receiver of stolen property or extortioner, many of whom are persons of outward respectibility and considerable influence To this extent there seems no objection to a modification of the existing orders on the subject. But as regards what may be termed the rank and file of *budmashes*, the Lieutenant-Governor still thinks that inquiries should, as far as possible, be conducted on the spot, in the manner repeatedly indicated in the Annual Resolution of Government on the Police report and in other ways. The objections that may be urged against local inquiries are that the police are invariably charged with assembling the witnesses, and that the latter are therefore just as much, if not more, under police influence than they would be if they had to go into the sudder station to give their evidence in the ordinary way. But to this the obvious reply is that when the trial of bad livelihood cases on the spot was insisted on, what was aimed at was a personal inquiry conducted by the magistrate himself, not the mere recording in his tent of such evidence as the police might choose to put before him. If this is to be all that is done, the Lieutenant-Governor would be prepared to agree in the opinion that these trials might just as well be held at the sudder station. But, as above stated, something more than this was aimed at, under the impression that with an intelligent local inquiry there would be less chance of an innocent man being convicted of bad livelihood purely on the evidence of some small village clique to which, in some way or other, he had rendered himself obnoxious. The other objection is that in trials on the spot the accused will have to pay more for legal assistance This, however, is a matter of no great importance. In the cases that would generally be tried on the spot legal assistance would probably not be called in if the trials were held elsewhere. In cases of this kind very much after all must be left to the discretion of the Magistrate.

Increased supervision of bad characters in Bengal will probably show that a far larger proportion of crime than is generally supposed is committed by them. In future reports the Lieutenant-Governor will be glad to have the total numbers of those entered in the *budmash* registers, distinguishing those looked after from those not looked after, and those who have been convicted of some offence from those who are merely suspected. In Dacca, where there was a decrease of 32 cases, released convicts are said to be so perfectly looked after that prosecutions are not so much required as before. As regards Mymensingh, the Inspector-General remarks : "Repeated strictures have at last borne some fruit in Mymensingh, where the number of cases has risen from 23 to 72, a number, however, still out of proportion to the place held by the district in classes III and IV." The Lieutenant-Governor, who has recently had occasion to animadvert on the police and criminal administration of this district, has no doubt that much improvement may be effected by a proper and systematic supervision of bad characters. The Magistrate of Gya states that his district contains "a very large number of notorious and daring bad characters, whom it is very seldom possible to catch in cases which come under investigation, and it is most necessary for the protection of the people that they should be prosecuted under special procedure." He has hardly, however, acted on this opinion, as fewer persons were convicted in 1885 than in any previous year since 1878. The reaction against the excessive number of prosecutions in former years, has probably gone too far, there having been only 25 cases in 1885 against 453 in 1876. Moreover, the varying idiosyncrasies of different officers appear to produce widely divergent figures in adjoining districts. For instance, there were only four cases in Chumparun against 68 in Sarun, 109 cases in Rungpore against 17 in Bogra, one case in Singhbhoom against 27 in Manbhoom, 25 in Bhagulpore

against 54 in Monghyr, two cases in Tipperah against 50 in Backergunge. There were hardly any cases in Orissa.

29. *Offences against Excise, Opium, Railway, Arms and Salt laws.*—The variations under these heads are shown in the table in paragraph 27. It is said that the very large decrease of 402 cases (105 against 507) in the districts of Khulna and the 24-Pergunnahs is due to salt being cheaper, and that it will continue unless sudden raids are made in the Sunderbunds; the Commissioner, however, dissents from this view and considers that there has been an abatement of police vigilance. The increase in Chittagong from 28 to 45 cases is explained by prosecutions against persons taking brine from a spring in the Seetakoond hills, and by smuggling across the Naf at a time during the rains when salt was selling at 8 annas a seer on this side and at only two pice in Arracan. The attention of the Financial Department will be drawn to this paragraph of the Inspector-General's report. Excise cases show a decrease of 202, for which ganja and fermented tari cases are chiefly responsible. Patna, Gya, and Hazaribagh make up between them 211 of the opium cases, and Poorce has 53 of the 307 ganja cases. The number of vendors punished has fallen from 553 to 368. Chittagong returns 22 opium cases, some of which are said to have been of great importance, and to have decidedly affected the illicit trade with Burmah. Cases are said to have decreased in Purneah owing to prosecutions for *cultivating* bhang being discouraged by the District Superintendent. If bhang grows wild, the Lieutenant Governor would certainly deprecate petty prosecutions for possession of small quantities; but cultivation of the plant stands on a very different footing, and cannot be permitted The Collector of the district will be asked to report on this matter. There is a large decrease of 2,656 cases under the head of public and local nuisances. It is possible that the municipal bodies are more lenient or less keen on sanitation than heretofore. Perhaps they feel less sure of their footing owing to their not knowing the law so well as official Chairmen, Joint-Magistrates, and Vice-Chairmen. The Commissioner of Burdwan thinks that the decrease is largely due to diminished activity on the part of the police That suburban districts like Howrah and Hooghly should show such large decreases as 444 and 878 is certainly a noticeable feature ; but it is as yet too early to pronounce an opinion as to whether this is in any way due to the new municipal regime. But no change of policy can be accepted as an excuse for an abatement of police vigilance *quoad* those offences which are cognizable by them, such as those under section 34 of Act V of 1861, and sections 269, 270, 277, 279, 283, 285, 286, 289, 291, 294 of the Penal Code.

30. *Railway Police.*—The jurisdiction of this branch of the force was considerably increased during the year by the organization of police on the Eastern Railway Districts under a separate Assistant Inspector-General, and on the Tirhoot and Bengal and North-Western lines, under the Assistant Inspector-General, East Indian Railway. There were 1,517 cognizable and non-cognizable cases, and 1,121 persons were convicted out of 1,535 brought to trial. Including 23 cases of suicide, there were 214 accidents, and 118 persons were killed, of whom 23 were Railway servants. 26 cases of opium smuggling were detected, and Rs. 2,352-15 paid away in rewards.

31. *Non-cognizable crime.*—Non-cognizable offences have decreased by 1,372, as will be seen from the following table :—

				1884.	1885.
Abetment		...	...	...	2
Class	I	...	...	8,288	7,587
,,	II	...	...	63	60
,,	III	...	...	1,148	1,126
,,	IV	...	...	54,867	54,731
,,	V	...		9,629	10,629
,,	VI		...	10,135	10,017
Special laws				23,238	21,844
				1,07,368	1,05,996

Class I shows a decrease of 701 cases, chiefly made up by offences against public justice (163), false evidence (111), and offences by public servants

(101). Mischief shows a large increase of 1,086 cases, and cheating a decrease of 173. Under "Special laws" there are 1,394 fewer cases, municipal cases having fallen off by 1,003, salt cases by 535, pound cases by 462, excise cases by 118, and breach of contract cases by 107. Railway cases show an increase of 297, stamp cases of 146, vaccination cases of 106, and miscellaneous of 374 The police were employed in 4,814 cases, the percentage being 4·5 against 4·6 in 1884. The Lieutenant-Governor does not think that this percentage is at all too high, and he believes that, generally speaking, all District Magistrates keep a sufficient check on undue references to the police. 3,971 cases were transferred from the head of cognizable to non-cognizable crime. In this connection the Inspector-General brings to notice that Magistrates often say nothing about the sections, or whether the case is to be entered as true or false, but leave the omissions to be supplied by the Court Sub-Inspector. This is a duty which Magistrates should themselves perform. In the Dacca Division there was a large decrease of 2,198 cases, appearing in every district and in every class except class V. The Commissioner considers the low percentage of cases declared false to be very satisfactory; but, as pointed out by the Inspector-General, the figures are quite worthless, the low percentage being due to the fact that a case not declared to be false must be shown to be true, and that in most instances, where a Magistrate dismisses, he does so without expressing any definite opinion one way or the other. Cuttack shows an increase of 565 cases, mostly under classes V and VI. It is suggested that the cyclone was responsible for disputes about land and fallen trees, which eventually terminated in cases of mischief. The Inspector-General thinks that the connection is not very evident. But it is seldom that zemindars and ryots are agreed as to their respective rights to trees; moreover, trees along boundaries being blown down would bring conflicting claims to a head Similarly, there might naturally have been disputes with regard to the cultivation of land, the owners of which had been killed in the cyclone. The Lieutenant-Governor doubts whether the decrease under the head of offences against public justice and false evidence denotes any real decrease, some small districts having more cases than larger districts. Moreover, the number of cases would largely increase if Civil Courts were to take action under section 476 of the Code of Criminal Procedure oftener than is at present the case. The figures under the head "offences relating to marriage" indicate that different Magistrates must have very different views, regarding these prosecutions. There were 3,434 cases, in 2,096 of which process issued. Only 1,609 persons appeared before the Court, of whom 428 were discharged after appearance, 859 acquitted, and only 244 convicted; 3,434 cases and 214 persons convicted, a result which shows that these cases are "frittered away" in different ways without any serious intention of bringing them to trial. The Magistracy cannot exercise too great caution in taking up and dealing with these cases; but the above figures indicate in many cases an unwillingness and even a refusal to administer the law as it stands. No doubt false charges are often instituted by men whose concubines have run away from them, but as evidence of reputation (Evidence Act, section 50) is excluded in prosecutions under sections 494-498 of the Penal Code, and the fact of marriage has to be strictly proved, the falsity of such charges is easily detected Hindoo husbands of good caste are not by any means too ready to institute prosecutions, which cover them with shame, and often cause their degradation from caste. The fact that detected adulterers are often charged with lurking house-trespass *with intent to commit theft*, and the fact that the native police send up the cases *as theft*, though their investigation must have made them aware of the real facts, shows the direction in which native feelings and sympathies lie. But though shame and fear of being outcasted may often be the motive for this *suppressio veri et suggestio falsi*, it is probable that the Courts are in some measure to blame for it in discouraging *bonâ fide* complainants, and that the allegation of theft is partially due to the difficulty of procuring a conviction for the real offence. The Lieutenant-Governor does not intend that these remarks should lead to any sudden revulsion of procedure, which might create much mischief; but he must impress on Magistrates that unwillingness on the part of the judiciary to administer the law as it stands may often tend to the commission of serious and violent crime.

32. *Proceedings under the Code of Criminal Procedure.*—The small number of proceedings under chapters X and XII of the Criminal Procedure Code (629 and 388) is remarkable, considering the area and population of the Province. The number of proceedings under section 107 of the Procedure Code (which are shewn along with bad livelihood proceedings under class VI of cognizable crime) was also remarkably small, and some districts show hardly any cases, whilst Chittagong has none, though the number of riots and unlawful assemblies in that district would seem to indicate that more proceedings ought to have been instituted than in a great many other districts. When a certain state of facts is made out to the Magistrate's satisfaction, procedure under section 145 of the Procedure Code is obligatory and not optional. Action under sections 107 and 133 is no doubt discretional, but it cannot be permitted that Magistrates should altogether get rid of such discretion by ignoring the intention of the Legislature and allowing these sections to become dead letters.

33. *Remands.*—Altogether 38,692 A forms were sent up. They were disposed of as follows:—

		Percentage.
At first hearing	13,793	35·6
Remanded once	8,350	21·6
Ditto twice	5,340	13·8
Ditto thrice	3,537	9·1
Ditto four times	2,381	6·2
Ditto five times	1,430	3·7
Ditto six times	977	2·5
Ditto more than six times	1,868	4·8

There has been a slight change for the worse in the percentage of cases decided at the first or second hearing, 57·2 against 59·7 in 1884. Pubna, Backergunge, Mymensingh, Tipperah, Maldah, Manbhoom, and Balasore are singled out for unfavourable notice; but it appears that those districts which show best owe their position in a considerable degree to the number of petty thefts and conservancy cases. The Commissioner of Burdwan speaks of the delay due to the increased employment of counsel and pleaders, whose chief resort is interminable and irrelevant cross examination.' The Lieutenant-Governor has dealt with this question separately, and he trusts that the average duration of cases may now show a decrease. In Backergunge 123 cases out of 756, and in Mymensingh 172 out of 1,176, were remanded more than six times. The bad figures for Tipperah are attributed to the weakness of the Magisterial staff at head-quarters during the greater part of the year. As the Commissioner remarks, Balasore shows very badly in the matter of remands, and it appears that both there and at Pooree the District Magistrates did little or no criminal work. Their attention will again be drawn to these matters.

34. *Reconvictions.*—The total number of persons reconvicted during the year was 1,577 against 1,482 in 1884, and 1,159 in 1883. This net increase of 95 is satisfactory, as it accompanies a decrease of nearly 5,000 in cognizable crime. No doubt supervision is improving from year to year, but in this respect India is still a very long way behind other civilized countries. In Bengal 1,577 persons have been reconvicted out of a total of 59,859 convicted of cognizable crime by Magistrates or Sessions Courts, or little more than 2½ per cent.; in England 21·9 per cent. of those apprehended for indictable offences or proceeded against summarily were previously convicted persons or of known bad character. The figures of convicted persons actually sent to prison are still more remarkable. Of the total number of males imprisoned in England and Wales in 1883-84, 40·3 had been previously imprisoned, while the same percentage in the case of females was 61·5. In the face of these figures it must be admitted that in Bengal the registers of convictions and reconvictions, and the mode of identifying previously convicted persons leave much to be desired. It is impossible for many reasons to press the analogy between the two countries too closely; still it is clear that much remains to be done here in this direction, and it is satisfactory to find from paragraph 352 of the Inspector-General's report that he is fully alive to the importance of this matter. The Mughya Dome settlements in Sarun and Chumparun have

continued to prosper, and in the latter district it was expected that the Domes would from this year be independent of Government aid. The Sarun Domes appear to be less easy to reclaim; a quiet life of toil is said to be irksome to them, and 46 of them absconded during the year, no doubt upon thieving expeditions. Still the Magistrate notices a marked improvement in the cultivation of their lands, and in respect of the feeling with which they are regarded by their fellow-villagers, by whom they are now employed as field labourers.

35. The names favourably noticed by the Inspector-General in paragraph 50 of his report will be noted in the Appointment Department. The Lieutenant-Governor has again to thank Mr. Veasey (who was in charge throughout the year) for a very full report of the working of the department, and for the keen personal interest he has shown in its effective administration, notwithstanding the difficulties which arise from an inadequate force in many districts, and an inadequate rate of pay in many branches of the service.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Inspector-General of Police, and the Commissioner of Police, Calcutta.

Ordered also that a copy of the Resolution be forwarded to all Commissioners of Divisions for information.

Ordered also that a copy of the Resolution and extract paragraph 50 from the Report, be forwarded to the Appointment Department of this Office for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE TRIBUTARY STATES OF ORISSA FOR THE YEAR 1885-86.

RESOLUTION.

POLITICAL.

Darjeeling, the 5th November 1886.

READ—

The Annual Report on the Administration of the Tributary States of Orissa for the year 1885-86.

Read also—

The Reports for the years 1883-84 and 1884 85, and the orders of Government recorded thereon.

Mr. Metcalfe was Superintendent of the Tributary Mehals throughout the year, but, owing to press of work in other departments, was unable to visit any of the States except Mohurbhunj. This is to be regretted, as the Lieutenant-Governor attaches much importance to the States being personally visited as frequently as possible by the Superintendent. A useful tour of 75 days was, however, made by the Assistant Superintendent. Angul and the Khondmals are Government estates; Mohurbhunj, Dhenkanal, Baramba, and Nursingpore are under direct management, and the remaining States are administered by their respective Chiefs subject to the general control and supervision of the Superintendent. The whole demand on account of tribute from these States, Rs. 33,249-7-11, was realized during the year.

2. *Weather, crops, and material condition of the people.*—There were good or more than average crops in Mohurbhunj, Nilgiri, Talcher, Nursingpore, Athmallik, Athgur, and Tigiria. In Hindole and parts of Dhenkanal, Baramba, Khandparah, Ranpur, Pal Lehera, Angul, Nyagur, and the Khondmals the crops suffered from drought. Moreover, the crops were in places seriously harmed by the storm of September. The rainfall appears to vary considerably, as the highest fall registered was 71 inches and the lowest 37. In Hindole very little rain fell in June, and none at all from the beginning of July to the end of September. The principal rice crop failed over a large area, giving rise to considerable scarcity. Measures of relief were devised by the Assistant Superintendent in consultation with the Rajah and his Dewan. The Rajah behaved very well, and, for the purpose of assisting his people, has taken a loan of Rs. 5,000 from Government. He remitted a portion of the rents, and in many places all the rent in kind: he established a godown for the sale of rice, and put in hand the construction of roads and excavation of tanks in order to provide labour for his people. Taking the Gurjhats as a whole, the rainfall was sufficient and well distributed, except in certain specified tracts, and the crops were good. The winter crops were almost everywhere good, and generally the autumn crop was up to the average. The Superintendent states that the Gurjhat people are generally well off, their wants few and easily satisfied. The average price of rice during the year was about 21 seers, and of *behri* about 19 seers, against 26 and 21, respectively, in the previous year. The rates of skilled labour are said to vary from 3 to 5 annas (8 annas is given as the maximum for Angul only), and of unskilled labour from 1 to 3 annas. The public health was generally good during the year. Cholera appeared in Dhenkanal station in the form of an epidemic, and gradually spread into the interior, and continued in a sporadic form for several months. There were isolated cases in several other States, but except in Baramba and Nursingpore, where the deaths reported were 160 and 400 respectively, the disease was not severe. Vaccine operations were carried on in Mohurbhunj, Talcher, Dhenkanal, Angul, Baramba, Nursingpore, and Ranpur, with more or less success everywhere except Talcher, where the people are opposed to it. There are 11 hospitals, where English medicines are dispensed, and two others were about to be established in Boad and Dhenkanal. There is nothing to remark under the head of roads and communications except that a new road is to be made from Cuttack to Angul, and is now in course of construction.

3. *Administration of Civil Justice.*—The total number of civil and revenue suits for disposal during the year, including 2,805 pending from the previous

year, was 13,091 against 15,678 in 1884-85; 10,854 cases were disposed of, leaving 2,237 pending at the end of the year. Many of the States show hardly any cases at all Of the 10,286 cases instituted during the year, Mohurbhunj alone has 4,529, Dhenkanal 2,490, and Baramba 1,733. The total number of appeals in civil cases was 233, and in revenue cases 53.

4. *Criminal Justice.*—The total number of offences reported was 2,231 against 1,725 in the previous year, and 1,456 in 1883-84. Of these, 1,763 were returned as true. Of 3,150 persons under trial during the year, 1,191 were acquitted or discharged, and 1,881 convicted. There were 29 offences affecting life against 28 in the previous year, and 353 cases of hurt and criminal force against 290; so that crimes of violence have slightly increased. Offences against property also have increased, there having been 459 cases of theft against 441, and 141 cases of mischief against 77; but cases of criminal trespass declined from 155 to 109. There were 41 cases of defamation against 28 in the previous year. It is a curious fact that the States of Athgur, Keonjhur, Nyagur, Pal Lohera, and Tigiria have no cases at all, while Athmallik, Boad, Daspulla, Hindole, Khandparah, Nilgiri, Ranpur, and Talcher show only 14 cases between them. Mohurbhunj contributes 632 of the total number of cases reported and brought to trial during the year, Angul 250, Dhenkanal 228, Nursingpore 146, and Baramba 137. Mohurbhunj has no fewer than nine murders, culpable homicides or attempts. It is to be hoped that from the larger number of cases of violent crimes in States under European management and under direct control the presumption is not valid that, in the States managed by their own chiefs, crimes of this character are concealed and suppressed. The total number of appellants and applicants for revision was 137; the sentence or order was confirmed in 101 cases, reduced or altered in 8 cases, and reversed in 13 cases. The small proportion of reversals is a striking contrast to the results of appellate and revisional jurisdiction in regulation districts.

5. *Murders.*—The large proportion of murders arising out of the faithlessness of wives is striking. This, however, among a wild and savage people, such as those who inhabit some of the States, is hardly a matter for surprise, their natural impulse being to take the law into their own hands. One of the cases of murder was that of an illegitimate child by a widow of good caste. She was sentenced to transportation for life, but Government commuted the sentence to rigorous imprisonment for seven years. In another case the husband went away to get work, telling his wife he could not return till the next day. Finding no work, he returned unexpectedly the same evening, and, looking through the open door, saw a man in the act of criminal intercourse with his wife. Another case from Athmallik was of a similar nature. The accused was sleeping in his house, and waking up found his wife in criminal intercourse with another man, and there and then killed her. He was convicted under section 304, Penal Code, and sentenced to rigorous imprisonment for three years. In a case from Mohurbhunj, the accused, suspecting his wife, followed her to the jungles armed with a bow and arrows. He tracked her and found her having connection with another man. He fired at the man, but the arrow struck a tree overhead. The startled lovers jumped up and ran. The accused fired a second arrow at the man, which missed him and struck the woman. In two cases, both among Sonthals, the murders were due to a belief in witchcraft. The most horrible case came from Ranpur. The accused took a young girl not quite 12 years of age into the jungles and raped her with such violence as to dislocate her right shoulder, besides injuring her in other ways. He then strangled her, and took a pair of gold earrings from her ears. The sentence of death passed was confirmed by Government. There appears to be a tendency to crimes of violence, which the Superintendent must endeavour to keep in check by the imposition of adequate sentences.

6. *Forest Conservancy.*—During the year an addition was made to the Government reserved forests of Angul by adding the Durgapur block. When the settlement of this estate is taken in hand, the whole of the exterior boundary will have to be demarcated. The season was a satisfactory one as regards fires, as up to the end of the official year not one fire had occurred in the reserves. There are some disputes between the villagers and the Forest Department as to

the area available for grazing, and the villagers have agreed to pay small grazing fees during the months from June to November. At Tikarpara an experimental nursery of about half an acre was made on the bank of the Mahanuddi, and toon, babul, and teak seeds were sown. The revenue from the forests is slightly increasing, but is not yet sufficient to meet the charges incurred. The Conservator and his Deputy have visited the Khondmal forests, and the question whether any reserves should be formed is now under consideration. The Tributary Chiefs of Ranpur, Nyagur, Athmallik, Khandparah, Athgur, and Boad have either reserved or protected their forests. In Baramba and Nursingpur, now under direct management, the cutting of timber trees has been prohibited. Valuable timber is preserved in Mohurbhunj and Hindole, and, to a certain extent, in Dhenkanal. It is said that the Daspalla forests are being denuded of good timber by men who have obtained leases on payment of trifling sums of money and two elephants. The Superintendent, who has addressed the Rajah on the subject, should do his utmost to prevent the wasteful destruction of such valuable property.

7. *Post Office and Education.*—There has been no change in postal lines or communications. An arrangement with the Chiefs was made for an annual contribution on the understanding that as soon as the postal lines begin to pay, they would be entirely relieved of the cost of their maintenance. As some of the post offices do not yet pay their way, the Postal Department does not seem to be willing to take over the entire responsibility. The Superintendent remarks: "There now seems to be some unwillingness on the part of some of the Chiefs to continue the subscriptions, and if they cease to pay, and the Postal Department does not take them over, the entire scheme must fall to the ground, which will be a matter of great regret, not only from a commercial, but also from a political, point of view." There seems no doubt that the postal lines and arrangements must very shortly become self-paying, and it is to be hoped that the Chiefs will have the wisdom and public spirit to continue their subscriptions until this result is attained. The Postal Department cannot be expected to do more than it has done, and the Superintendent should lose no opportunity of impressing on the chiefs the importance to themselves of not withdrawing from the arrangement entered into.

The number of schools at the close of the year was 1,215 against 1,151 in the previous year; the number of pupils was 14,956 against 14,836. The aggregate number of children of the aboriginal races was only 1,509. Mohurbhunj, Athgur, and Hindole show a marked decrease in the number of lower primary schools, while the number in Nilgiri increased from 48 to 81. In some cases the decrease is apparent and not real, owing to the reduction of the reward fund, which means that some of the schools have not come under inspection and the reward system. Of the 33 upper primary schools, 3 in Angul are maintained by Government, 6 in the Khondmals by a local cess on grog-shops, and 24 by the Native States. There are six female schools as compared with four in the previous year, attended by 97 girls. Two hundred and sixteen read in boys' schools, and, out of 313 (the total number being educated), 149 can read and write. The total expenditure on schools (including Government expenditure) was Rs. 66,786 against Rs. 59,364 in 1884-85. The Government grant was Rs. 8,042. The inspecting staff has been slightly increased, and now consists of five Sub-Inspectors and nine inspecting pundits.

8. *Angul.*—There are mines of limestone, mica, and coal in Angul. It is said that the coal may be worked at a profit if the proposed railway passes through the estate. The existing settlement will expire in 1887, and it is proposed to commence the re-settlement in the ensuing cold weather. The present rates are said to be very low, and a considerable area of jungle land has been brought under cultivation since the last settlement. The present land revenue demand of the estate is Rs. 32,916-3-4½. The total area of rent-free or quit-rent life tenures was 32,073 acres, and of this amount 22,570 acres have been resumed on the death of the original grantees. The excise revenue increased from Rs. 1,620 to Rs. 1,998-1-4. It is said that, owing to the introduction of the Court-fee and Stamp Acts from the 4th December 1885, the number of suits has decreased, but not to any appreciable extent. A sum of Rs. 1,289-12-7 was expended on works of improvement.

9. *Mohurbhunj.*—The total revenue demand was Rs. 2,88,146-15-6, of which Rs. 1,95,956-3-2 was collected during the year, and Rs. 10,635-4-8 was remitted. The pergunnahs Panchpir, Kainsari, Sanikola, and Poradiha were under measurement with a view to re-settlement, and a report has been submitted to Government regarding Bamunghatti, the settlement of which is about to expire. The new building for the dispensary at Baripada, which is a commodious and substantial building, was completed during the year, and a branch dispensary was opened in Bamunghatti. As regards education, it is a significant fact that a Sonthal was serving the State as an inspecting pundit, and a Sonthal boy, who had got a scholarship at Baripada, was studying in the Balasore Zillah School; but unfortunately they both died during the year, which led the Sonthals to think that education brings evils on them, and many withdrew their children from the schools. Mr. Wylly, who was in charge of the State throughout the year, is opposed to a regular forest system as the State cannot afford it, and there are no roads for easy transport of timber; and the Lieutenant-Governor has no doubt that any present attempt to introduce regular conservation of the forests here would be premature; but there are certain small reserves which should be carefully maintained, and the wasteful cutting of valuable timber should be prohibited throughout the State. Baboo Brindabun Chandra Bhunj, brother of the deceased Maharajah, was in charge of Bamunghatti throughout the year. His request to manage the pergunnah independently of Mr. Wylly was disallowed. His administration falls very short of the requirements of so important a charge. It has been proposed during the year that he should take up his residence at Baripada where he can, if he chooses, make himself useful in many matters in which it is desirable that the wishes of the family should be consulted. Sir Rivers Thompson has more than once expressed his willingness to accede to this arrangement, if Baboo Brindabun will recognise at Baripada his subordination to Mr. Wylly, the Deputy Superintendent and Manager of the State; but upon this point the Baboo appears unwilling to give the assurance which Government requires. In the meantime, the Lieutenant-Governor is clearly of opinion—a conviction that has been strengthened by recent events—that it is out of the question at present to place him in any entirely independent charge. To do so would be most detrimental to the best interests of the State.

10. *Nilgiri.*—The Chief of this State has practically retired from the duties of his office, and the entire administration is in the hands of Mr. Ricketts, a member of the Subordinate Executive Service, whose services have been lent to the Rajah. This State has constantly been a source of anxiety, and during the year a disturbance took place in Kharakpur owing to the surbarakars of six villages refusing to pay what was due from them as rent. The execution of decrees was resisted by force, the police were assaulted, and persons who had been arrested were rescued. Vigorous measures had to be taken to restore order, and the disturbance only quieted down after some of the ringleaders had been arrested and punished. The State has three stone quarries, and the value of the stone-plates, cups, and other articles annually exported to Bengal is estimated at Rs. 50,000. The land revenue demand, including arrears, was Rs. 33,119-1-4, of which Rs. 28,527-4-3 was collected during the year. It is said that there are hundreds of acres of land under cultivation which pay no rent whatever, and the Manager proposes to make a general revenue settlement of the whole State. Care should be taken to carry out this settlement in such a manner as not to discourage further reclamation. Of the necessity for this, the Manager seems fully aware. It is said that registration of documents has commenced, and that 54 documents were registered during the year. The Lieutenant-Governor would like to have a further report on this subject, as he is not aware that Government have ever sanctioned the enforcement of the Registration Act in the Tributary States.

11. *Dhenkanal.*—The minor Rajah died during the year at the early age of 20. The succession of his only infant son has been approved by the Governments of Bengal and India. The total realizable demand of the State, including arrears, was Rs. 95,492-3-10, of which Rs. 83,492-6-6 was

collected during the year. As the people to the north of the State had to travel more than 30 miles to head-quarters, a new sub-divisional office was established at Baisinga.

12. *Keonjhur and other States.*—The total demand of the Keonjhur State for the year 1292 was Rs. 87,854-0-3½, of which Rs. 85,978-12-6½ was on account of land revenue. With arrears, the demand amounted to Rs. 1,13,493-10-0½, of which Rs 80,509-5-4 was collected during the year. The total expenditure amounted to Rs. 63,559-12-5, of which Rs. 1,976-11-10 is Government tribute. The jail in Athgur is said to be a miserable hovel, and the Rajah has failed to carry out his promise to build a proper jail. The Rajah is reported to be a hard landlord, and to think that the people have no rights in the land they cultivate. The settlement of killah Baramba, which was commenced in 1881 at the request of the people, is now almost complete, and the total land revenue demand of the State has been raised from Rs. 14,111 4-2 to Rs. 18,179-5-8, exclusive of the assessment on resumed jaghir and lakheraj lands. This State was involved in debt when Goverment took charge of it. Not only have all the debts been paid off, but many works of improvement have been effected. In the Boad State it was the custom for the heads of pergunnahs to decide petty civil and criminal cases, and to impose small fines, half of which were retained by the headmen, and half credited to the State treasury. It was found, however, that the headmen had abused their powers, which were accordingly withdrawn from them by the Rajah. Boad is an extensive State, inhabited chiefly by aborigines, and the Superintendent has asked the Rajah to devise some ready means of administering justice near the homes of the people. A further report, which has before been called for, should be submitted on this matter by the Superintendent after he has visited the State during his next cold-weather tour. It has been remarked in paragraph 3 of this Resolution that Boad and five other States show only 14 criminal cases amongst them. The general administration of the Daspulla State is unfavourably animadverted on by the Superintendent, who had to interfere to prevent oppression by the Chief. The state of the finances is said to be deplorable. The area of the State is 568 square miles, with a population of 41,608; the land revenue amounts to Rs. 11,000 only, of which about Rs. 1,000 go towards paying the Government tribute and postal charges. The present settlement will expire in two years, and if the Rajah will only take the trouble to conciliate his people he should be able to obtain a fair increase of revenue. The Hindole State has been in difficulties owing to the failure of the autumn crop, and, as has been mentioned above, considerable measures of relief had to be undertaken. A settlement has just been effected, by which the total assessment is increased from Rs. 21,683 to Rs. 34,857. The large increase in the number of civil suits is said to be due to the fact that the Rajah introduced certain rules of limitation during the year, no limitation having previously existed. The Rajah of Khandparah is said to be a hard landlord, and to think that his people have been created with the sole object of administering to his wants and comforts. He looks with displeasure on those who complain, and three men who brought grievances to the notice of the Assistant Superintendent during his recent visit to the State have since got into trouble, one having been sentenced to three months' imprisonment in a case of petty squabbling. The Lieutenant-Governor must desire the Superintendent to visit this State during the ensuing cold weather. There is evidently much needed in the way of reform, and but little chance of its being introduced except through the authority and influence of the Superintendent himself. During the whole of 1885 there were only four prisoners in the jail, all sentenced in one case for killing a bullock. The population of the State is 66,296. As the Superintendent remarks, many offences are not reported, and the offenders in others are punished by the Pan sirdars for their own benefit. The Superintendent was unable to visit the Khondmals. The Khonds pay no land revenue, but a tax of 3 annas on each plough. This together with an equal contribution by Government, constitutes the Khondmal Road Fund. The total demand of Nursingpur, including arrears, was Rs. 31,528-8-2½, of which Rs. 28,398-3-8 was collected during the year. A dispensary has recently been opened at the head-quarters of the State. The

Superintendent has proposed to appoint a joint Forest Officer for Nursingpur and Baramba, and this proposal is now under the consideration of Government. Nyagur was not inspected during the year. Out of a total land revenue demand (including arrears) of Rs. 41,125-2-8, a sum of Rs. 40,196-5 was collected during the year. Of the total debts of the Rajah, amounting to Rs. 76,300-9-7, a sum of Rs. 31,005-5-8 was paid off during the year. A charitable dispensary was established during the year. The Rajah is said to be kind-hearted but improvident, and readily runs into debt. The Superintendent states that several of the Chiefs are defrauded by foreign merchants, and he has republished a notification issued by the late Sir Henry Ricketts in 1838, to the effect that he (the Superintendent) has no legal power to recover debts due from Native Chiefs, and in future will not receive applications for assistance. This action has the approval of the Lieutenant-Governor, but any case of real hardship should be reported to Government. The finances of the Pal Lehera State are very bad, and the Rajah is deeply in debt. The total receipts of the State amount to Rs. 17,160-12-1, while the Rajah's debts amount to about Rs. 35,000. The term of the current settlement of Ranpur will expire in 1297 Umli. Rights of occupancy and transfer are recognized by the State, and large quantities of waste land (held rent-free for the first three years) have been reclaimed. The land revenue demand, including arrears, was Rs. 34,911, of which Rs. 25,992 was collected during the year. The Lieutenant-Governor would like to have further information here also regarding the registration of documents. The management of the State during the year is said to have been satisfactory. The total income of the Talcher State is Rs. 39,322. This State was overassessed in 1877, and in the case of a good many villages the assessment of the revenue has been revised and reduced, which indicates the justice and moderation of the Rajah. A pucca building is being constructed for the dispensary. The Superintendent, it is satisfactory to note, speaks very highly of the Rajah's administration. Since the close of the official year, the Rajah of Tigiria has died. He was a ruler of the old patriarchal type, and is said to have been much liked by the people of the State. The succession of his only son has been approved by the Government of India.

13. The Superintendent has submitted a full report, but it would be well if the different subjects could be arranged in a more systematic manner. The arrangement of the present report is so desultory that it has been found difficult to deal with the various subjects in a complete manner. The remarks concerning the merits of officers will be communicated to the Appointment Department.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Superintendent of the Tributary Mehals of Orissa for information and guidance.

Ordered also that a copy of the Report, together with a copy of the Resolution, be forwarded to the Government of India, in the Foreign Department, for information.

Ordered also that a copy of the remarks concerning the merits of the officers engaged in the administration of the States during the year be forwarded to the Appointment Department for record.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

The results of the year under report, as compared with the previous year, show a decrease of Rs. 12,29,533, or 6 per cent. in the receipts, and a decrease of Rs. 29,737, or 10·9 per cent., in the charges. There was a decrease under all the heads of receipts; that under the head of Duty was due to smaller clearances, and that under the head of Rent of warehouses to a reduction in bonding transactions. The decrease in the charges was chiefly due to smaller refunds of Customs duty on salt.

2. The total quantity of salt in stock at the commencement of the year was 15.41,259 maunds against 20,00,056 maunds in 1884-85. During the year 94,01,468 maunds were imported or manufactured against 1,00,50,107 maunds in 1884-85, and 9,82,909 maunds were in stock at the close of the year. Of the stock in hand at the commencement of the year, 11,10,199 maunds were imported and the remainder was excise salt.

3. Importation of salt was confined during the year to the ports of Calcutta and Chittagong, and there was a decrease of 6,69,495 maunds as

compared with the total quantity imported in the previous year. In Calcutta salt was imported from the United Kingdom, Hamburg, Bombay, Madras, the Arabian and Persian Gulfs, Italy, Port Augustus, and Akyab, and in Chittagong from the United Kingdom, Madras, and Akyab. There was no importation in Cuttack.

4. The clearances of salt from shipboard in Calcutta showed a decrease of 1,26,796 maunds, or 1·7 per cent., and in Chittagong of 1,35,983 maunds, or 68·9 per cent. In the aggregate there was a decrease of 2,62,779 maunds, or 3·4 per cent., and of Rs. 7,45,513, or 5 per cent. in the duty realized. There was an additional clearance of 13,000 maunds from shipboard at Chittagong under bond for Naraingunge. The total quantity cleared from bond in all ports amounted to 19,06,624 maunds against 21,19,010 maunds in 1884-85, and realized a duty of Rs. 38,13,248 against Rs. 42,38,022.

5. Salt was manufactured under the Excise Rules in Orissa only. As compared with 1884-85, there was an increase of 20,532 maunds, or 4·8 per cent., in the total quantity manufactured. The increase in Pooree and Balasore amounted to 23,065 maunds and 1,028 maunds, respectively, while Cuttack showed a decrease of 3,260 maunds. The decrease in Cuttack is attributed to the heavy rains of March 1886.

6. The total quantity of excise salt sold amounted to 4,78,749 maunds against 5,01,255 maunds in 1884-85, yielding a duty of Rs. 9,57,498 against Rs. 10,02,512 in the previous year. There was a decrease in the sales, amounting, in the 24-Pergunnahs, to 2,989 maunds, in Cuttack to 20,719 maunds, and in Balasore to 11,859 maunds; while in Pooree there was an increase of 13,060 maunds. The decrease in the 24-Pergunnahs is said to be due to the stock of salt in the golahs having been disposed of. It is reported that the decrease in Cuttack was very probably caused by an illicit trade carried on in the district, unsuspected by the Executive and unhindered by the Police. The Salt Department in Orissa has now been transferred to the control of the Commissioner of Salt Revenue, Madras, and the Lieutenant-Governor hopes that the trained supervision to which the operations are now subjected will stamp out illicit dealings.

7. The sales of salt in the saliferous districts showed a decrease of 13,906 maunds as compared with the previous year. The decrease occurred chiefly in the districts of Chittagong, Cuttack, and Balasore. There was a decrease of 16 in the number of seizures, while there was an increase of 98 maunds in the quantity of salt attached, and the quantity confiscated fell off by about 53 maunds. The cases instituted for offences against the salt laws were 469 against 959 in the previous year. The amounts realized as fines and disbursed as rewards were Rs. 2,179 and Rs. 1,446 against Rs. 4,704 and Rs 3,565 respectively in the previous year.

8. The following table shows the despatches of salt into the interior by the different water routes and railways in the last two years:—

From the figures given above, it appears that there was an increase of 49,572 maunds in the quantity of salt conveyed by water, and a decrease of 1,92,644 maunds in the despatches by rail. The quantity of salt bonded during 1885-86 was 14,88,290 maunds against 16,61,055 maunds in the previous year. The decrease is due to low freights and depression of trade, which held out less inducement to merchants to clear their salt from ship board for the return cargo. The quantity of salt remaining in storage at the close of the year was 4,51,765 maunds against 9,38,858 maunds at the beginning.

There has thus been an increase in the number of registrations under all heads, while the excess of receipts over expenditure is only Rs. 579 less than in the previous year. Compulsory registrations affecting immoveable property increased by 3·01 per cent., optional registrations of the same kind by 9·06 per cent., and "other registrations" by 5·54 per cent.

It will be seen that there has been almost, without exception, a general and steady increase. The operation of section 54 of the Transfer of Property Act, 1882, and the Full Bench decision of the Calcutta High Court reported in I. L. R., 8 Cal., 597, have virtually abolished the distinction created by sections 17 and 18 of the Registration Act between compulsory and optional registration of documents affecting transfers of immoveable property even when the value is under Rs. 100; for, if delivery is not given, section 54 makes registration compulsory, and if delivery is given, a registered instrument of transfer is not required. Moreover, the provisions of the Bengal Tenancy Act (VIII of 1885) will have the same effect as regards deeds relating to the transfers of permanent tenures. The Government of India have accordingly been asked to modify the existing forms of Statistical Statements II and IV, but final orders have not yet been received. The increase in the number of deeds of mortgage of value less than Rs 100 was very large, being 16·89 per cent more than the previous year. The number of leases for terms of one year and less exceeded the number registered in the preceding year by 13·74 per cent. Of the total registrations, amounting to 723,901, the number relating to immoveable property was, as shown above, 597,416, or 82·52 per cent of the whole. A marked feature of the year's operations was the number of optional registrations, amounting to 337,869, or 46·67 of the whole number. Compared with the figures for the preceding year, optional registrations increased by 7·72 per cent., while compulsory registrations increased by only 3·01 per cent.

3. *Registration of leases.*—The total number of leases registered during the past four years has been as follows:—

Class of Lease.	1882-83.	1883-84.	1884-85.	1885-86.
Perpetual leases (compulsory) ...	70,704	75,552	85,519	87,236
Leases for terms of years (compulsory) ...	141,156	154,571	175,045	180,939
Leases for one year or less (optional)	4,534	4,952	5,363	6,100

Of the perpetual leases, 84,389 were registered in Bengal, only 1,343 in Behar, 1,399 in Chota Nagpore, and 105 in Orissa. As many as 69,775 were registered in the seven districts of Chittagong (23,472), Backergunge (10,969), Jessore, Noakholly, Furreedpore, 24-Pergunnahs, and Khulna (4,701). These districts in respect of this particular item of registration occupy precisely the same relative position as they did in 1884-85. As regards the increase in the number of leases registered, the following remarks made by the Registrar of the 24-Pergunnahs are worth notice:—

"There was thus an increase of 1,092, or of 21 per cent., in the number of perpetual leases registered, and of 1,134, or 10 per cent., in that of other leases. It is evident that some unusual cause, which no doubt must be sought for in the passing of the Bengal Tenancy Act, has operated during the past year to greatly increase the execution of leases, especially of perpetual ones. It is worthy of note that the increase in the registration of perpetual leases occurred chiefly during the five months after the passing of the Act, while in the case of other leases the increase occurred chiefly before the Act became law. It would seem as though landlords, afraid of the possible results of the new law, had exerted themselves to secure as many ordinary leases as they possibly could before the Act was passed, that as soon as the Act came into force they virtually accepted defeat, and consented to recognise claims to permanent rights and signed perpetual leases in large numbers, but that, in any case, they prefer that their ryots should be bound by leases of one kind or the other rather than that they should continue to hold their lands without any leases at all. The landlord's apprehension of the ryot acquiring dangerous rights has at length become greater than his hope of gain by irregular enhancements, while, above all, he is acutely alive to the possibility of the ryot developing Hibernian proclivities and repudiating his obligations altogether."

Upon this it is only necessary to remark that it is as yet too early to draw any inferences from the figures as to the effect of the Tenancy Act on registration. The operations of the present year will doubtless furnish data for some definite conclusion.

4. *Term leases.*—The number of term leases registered in Bengal Proper was 136,258 against 127,607 in 1884-85, the figures for the whole province being 180,939 against 175,045. In five districts the number of such leases exceeded 10,000, namely, Jessore with 17,248 registrations, Backergunge with 13,516, Furreedpore with 12,819, Tipperah with 10,956, and the 24-Pergunnahs with 10,636. There was an increase of over 1,000 registrations in each of the four districts of Backergunge, Khulna, Noakholly, and Jessore, while the numbers in Mozufferpore fell from 6,212 to 4,819, and in Maldah from 2,026 to 970. The increase in Backergunge is said to be partly due to the re-settlement of some large estates; in Khulna to the new settlement of jungle lands bordering on the Sunderbuns; in Jessore to the Tenancy Act, under which tenants can now only sublet for a term of years; in Noakholly no reason is given. In Mozufferpore it is said that bad crops in 1884-85, and disputes between indigo factories caused many term-leases to be registered, whereas the same causes did not exist in the year under report. In Maldah the decrease is attributed to the settlement of several pergunnahs having been temporarily stopped by their zemindars. 6,100 leases for one year or less were registered as against 5,363 in 1884-85. The variations in different districts do not call for any particular notice. The total value of leases of all kinds registered during the year was Rs. 92,99,354 against Rs. 1,00,86,412 in the preceding year. But the number of leases increased from 154,275 to 161,932. Of this number 75·43 per cent. were for amounts not exceeding Rs. 25. As in 1884-85, Behar took the first place as regards registration of deeds of large values, the average value for each lease being Rs. 119·55 against Rs. 39·86 in Bengal.

5. *Proportion of leases to counterparts.*—The total number of leases, excluding perpetual leases, amounted to 46,612, and of counterparts to 140,274, the percentage of leases being only 24·92 as compared with 26·83 in 1884-85. Thus, only two leases are registered for every five counterparts. The highest percentage was again in Chumparun, where the leases registered amounted to 91·87 per cent., and in eleven other districts the ratio exceeded 50 per cent., namely, in Lohardugga, Mozufferpore, Gya, Patna, Sarun, Sonthal Pergunnahs, Calcutta, Singbhoom, Darjeeling, Shahabad, and Manbhoom. In five districts, Cuttack, Purneah, Rajshahye, Mymensingh, and Bogra, the ratio was less than 10 per cent. Various reasons are assigned for the smaller percentage of leases, such as the fact that the ryot has to pay the cost of both documents, the unwillingness of the zemindars to bind themselves in writing, their unwillingness to attend at registration offices, and their wish to prevent the ryot from using the lease as a valuable security for the purpose of raising money. To the Lieutenant-Governor it almost seems as if there might be a doubt whether it is generally known that a lease and a counterpart, when presented at the same time, can be registered for a single fee.

6. *Deeds affecting immoveable property of Rs.* 100 *in value and upwards.*—Registrations of deeds of sale of immoveable property of the value of Rs. 100 and upwards showed a small increase of 0·29 per cent., while deeds of mortgage of the same kind showed an increase of 6·46 per cent. The Inspector-General brings to notice the fact that, broadly speaking, in those districts in which a large number of sales of immoveable property of Rs 100 and upwards in value was registered, a large number of mortgages of property of a similar class and value was also registered.

7. *Deeds affecting immoveable property of less than Rs.* 100 *in value.*—Registrations of deeds of sale of immoveable property of less than Rs. 100 in value increased from 115,540 to 120,381 The most marked increases were in Tipperah, Chittagong, Pubna, and the 24-Pergunnahs. As was remarked in the Resolution on the Report for 1884-85, the increase is probably due to a greater appreciation of the benefits of registration rather than to pressing necessity or agricultural depression. Registrations of instruments of mortgage of the same class increased by 16·89 per cent. The highest increase was in Chittagong, which the Registrar attributes to the people having become aware

that the Transfer of Property Act requires the registration of all such deeds, even though the property be less than Rs. 100 in value.

8. *Registered sales of estates and tenures.*—Statement XII shows the number of estates and tenures transferred by registered deeds and the classes of persons by whom they were purchased. Of the classes specified, the most numerous purchasers in the case of entire revenue paying estates were those classified as "others," excluding mahajans, traders, money-lenders, zemindars, intermediate tenureholders, and ryots. Zemindars were the largest buyers of shares in such estates; ryots in the case of revenue-free properties; and small talukdars and tenureholders in the case of intermediate tenures. Revenue-free properties are evidently keenly sought after; the ryot purchasers numbered 10,089, while the zemindars, talukdars, and mahajans put together amounted to only 9,008. The figures show clearly that the agricultural classes are not parting with their interests in the soil, and that mahajan and money-lending purchasers are not so numerous as is sometimes alleged. The total number of purchasers of the latter class amounted to 9,739, while the zemindar, tenureholder, and ryot purchasers amounted to 60,677.

9. *Sales of ryotti holdings*.—The following statement shows the number and classes of purchasers of ryotti holdings at fixed rates during the past two years:—

Year	Transactions.	Purchasers.					
		Mahajans, traders or money-lenders.	Landlords of holdings transferred.	Other landlords.	Ryots	Others.	Total purchasers.
1884-85 ...	24,327	4,156	781	2,134	13,012	5,931	26,014
1885-86	26,479	4,386	843	2,424	11,085	6,940	28,678

The ryots are about one-half of the total number of purchasers. The total purchase-money increased from Rs 22,83,331 to Rs. 23,35,666, giving an average of 10 years' purchase against 11·2 in the previous year The purchasers of ryotti holdings with rights of occupancy were as follows:—

		1884-85.	1885-86.
1	Mahajans, traders, or money-lenders ...	6,846	6,725
2.	Landlords of the holdings transferred .	1,060	1,186
3	Other landlords	2,685	3,155
4.	Ryots ... •	39,436	38,919
5.	Others, including those unspecified ...	7,515	8,802
	Total ...	57,542	58,787

The average number of years' purchase shows an advance from 9·9 to 10 2. The ryots amounted to a little less than two-thirds of the total number of purchasers. Transfers were most numerous in Tipperah 8,267), Midnapore (5,337), Rungpore (5,002) and Burdwan (3,143); and in the following districts they exceeded 2,000, namely, Dinagepore, Dacca, Beerbhoom, Mymensingh, Hooghly, and Furreedpore. Having regard to the discussions on the subject during the passing of the Tenancy Act, the fact seems clear from the above statements that in most districts of Bengal Proper the transferability of rights of occupancy is customary and common.

10. *Bonds.*—Out of 124,699 instruments relating to moveable property, which were registered during 1885-86, 89,501 or 71·77 per cent. were money bonds; the ratio in the previous year was 72·41 per cent As many as 30,533, or more than one-third of the whole were registered in Jessore alone. Nothing new is said regarding this enormous registration of bonds in Jessore which, though less by 125 than the number registered in the previous year, is nearly four times as large as that of the 24-Pergunnahs, the district in which the next largest number of bonds were registered. In former years it has been attributed to the high price of food-grains, and to the fact that the completion of the railway works, which used to provide employment for the poor class of people, has compelled many to borrow money. These causes are not peculiar to Jessore, and are not by themselves sufficient to account for the extraordinarily large number. Indebtedness may be a cause

for increase of bonds in some districts; but the increase is equally evident in districts that are undoubtedly prosperous. The Registrar of Noakholly remarks :—" Borrowing does not always imply poverty; borrowers raise money for investment in cultivation and trade, as well as for unproductive expenditure." It is said that in Midnapore the traders frequently mortgage their homesteads in order to have more money to invest in business. The more frequent registration of bonds is doubtless to a great extent due to the increasing facilities for registration afforded by the establishment of new rural sub-registry offices. Of the total number of bonds, 21,139 were for amounts not exceeding Rs. 25; 28 907 for sums between Rs. 26 and Rs. 50; and 21,825 for sums between Rs. 51 and Rs. 100. As regards registrations under sections 24 and 34, which deal with the presentation of documents after the prescribed times, Mr. Bourdillon's anticipation that Mr. Bolton's circular would result in an increase of fines has not proved to be correct, *quoad* registrations under section 24.

11 *Commissions, appeals, and prosecutions.*— The number of commissions issued fell from 2,902 to 2,668, and of visits paid from 3,261 to 3,120 Registration was refused in 3,639 cases against 3,391 in 1884-85. Out of 445 appeals under sections 72 and 73, registration was ordered in 238 cases. The number of prosecutions under the Registration Act was 78 as compared with 54 in the preceding year. Of 136 persons prosecuted, 63 were prosecuted for false statements, 46 for false personation, and 6 for forgery. Forty-seven persons were acquitted, 75 were convicted, and 14 were awaiting trial at the close of the year. The largest number of prosecutions in any one district was 9 in Furreedpore, 4 being the highest number in any other district.

12 *Searches.*—The number of applications for search or copy amounted to 59,967 as against 56,976 in 1884-85 and 52,218 in 1883-84. The number of ordinary searches was 23,787, and the fees realised Rs. 28,189-4. Searches made under the High Court Rules amounted to 36,200 and the fees realised Rs. 67,118-12. The Inspector-General remarks that another year's experience shows that searches made under the High Court Rules should be made, not by the parties, but by the office establishment. On this subject Government has recently addressed the Inspector-General in a separate communication.

13. *Documents impounded and discredited.*—The number of documents impounded was 2,192 against 2,225 in the preceding year. The Collector upheld the action of the registering officers in 1,680 cases; in 317 cases the documents were held to be correctly stamped, and prosecutions were instituted in 104 cases. The number of deeds discredited by civil courts was 62 as against 70 in the preceding year.

14. *Registration operations in different divisions.*—There was an increase in the number of operations under the Act in 27 districts, and a decrease in 18 districts. The highest actual increase was 6,116 in Chittagong, and the largest decrease 2,788 in Mozufferpore, but no reasons are given in the report The following table shows the number of registrations and the fees realized in each of the different divisions of the Province :—

Division.	Registrations.	Total fees realised	Percentage of registrations on the whole.
		Rs.	
Presidency	178,009	2,65,339	24·6
Dacca	125,438	1,81,121	17 33
Chittagong	115,818	1,25,382	16
Burdwan	112,105	1,55,438	15·49
Patna	74,626	1,71,063	10·31
Rajshahye	44.579	66,309	6·16
Bhagulpore	43,297	69,284	5·98
Orissa	15,704	24,638	2·16
Chota Nagpore	14.525	22,594	1·97
Total ...	723,901	10,81,168*	100·00

* Exclusive of receipts of the Registrar of Joint-Stock Companies and the office of the Inspector-General of Registration. The total expenditure was Rs. 5,00,679.

The total increase in the number of operations was 5·16 per cent. on the operations of the preceding year. In every district there was a profit to Government after all the expenses in connection with the working of the Act had been defrayed. The total net surplus was Rs 5,80,488-15-11 against Rs. 5,20,391 in 1884-85; or, after deducting all charges on account of stationery, printing, printed forms and registers, iron record-racks and buildings, Rs. 4,50,651-2-2

15. *Registration offices and inspections.*—The number of registration offices open at the close of the year was 292 against 290 at the close of 1884-85. Three new rural sub-registry offices were opened during the year: at Pipli in Pooree, at Poopri in Mozufferpore, and at Daudkandi in Tipperah. On the recommendation of Mr Bourdillon, 26 sub-registry offices at sub-divisional head-quarters were converted into rural offices during the year under report, and 12 more since the close of the year. This relief of sub-divisional officers from registration work was very much required: 905 inspections of registration offices were made as compared with 809 in 1884-85. The small number of inspections (21) made by Mr. Bourdillon was the unavoidable result of his illness, but the total number of inspections made by the first and second Inspectors increased from 257 to 284. The increase from 64 to 102 in the number of inspections of Sudder Sub-Registrars is also satisfactory. The number of stamp inspections was 255 against 428 in 1884-85.

16 *Operations under the Mahomedan Marriage Registration Act.*—Statistics from the year 1877-78 are given in the following table:—

Year.	Number of districts in which the Act was in force.	Number of offices open on the 31st March.	Number of marriages registered	Number of divorces other than *khulas* registered.	Number of *khulas* registered.	Total number of ceremonies registered
1877-78 ...	14	103	7,391	1,404	595	9,390
1878-79 ...	14	103	8,161	1,705	771	10,637
1879-80 ...	14	107	7,137	2,097	623	9,857
1880-81 ...	14	106	5,777	1,874	779	8,430
1881-82 ...	14	107	4,951	2,239	667	7,857
1882-83 ...	14	112	5,008	2,247	766	8,081
1883-84 ...	14	112	4,273	2,315	895	7,483
1884-85 ..	14	112	3,913	2,540	957	7,410
1885-86 ...	14	112	3,993	2,422	1,109	7,524

The total number of ceremonies registered was slightly more than in the previous year. Chittagong, as usual, shows the largest number (2,895), while Dacca comes next with 819 and Rungpore with 803, as against only 535 in the previous year. Mymensingh has 621, while Rajshahye shows a decrease from 844 to 505. Rungpore and Rajshahye have thus changed places, but no reason is assigned for the variation. In no other district did the number of registrations amount to 400, while in Pubna and Nuddea the numbers were only 22 and 8 respectively. The Officiating Inspector-General remarks:—"No practical advance has been made so far as registration under the Act is concerned, and people do not appear to have come to appreciate the Act any more than they did in former years. It was thought that the appointment of Qazis under the Qazis Act, XII of 1880, would have the effect of increasing the number of registrations, but so far this would not appear to be the case." It is not stated whether any particular effect has been produced by the alterations in the rules and procedure under Act I (B C.) of 1876, to which reference was made in the Resolution on the Report of the working of the Act for 1883-84.

17. Since the close of the year the rules for the regulation of registration in connection with the Tenancy Act have been sanctioned by Government. The general rules were also revised by Mr. Bourdillon, and have been approved by Government. The effect of the working of the Tenancy Act upon the Registration Department will demand close attention in the current year's report, with the probable result of extending the facilities of registration in many districts. The question of improving the position of the ministerial

officers of the Registration Department is now under the consideration of Government in connection with the report submitted by the Salaries Commission. It is very clear from that report that the numerical strength of the establishments has by no means kept pace with the enormous increase in the work to be done. Owing to financial pressure, the general scheme for appointing record-keepers is still in abeyance. Mr. Bourdillon has submitted proposals for levying registration fees by means of court-fee stamps. The objections and difficulties in connection with such proposals have been pointed out by Government, and the Inspector-General has been asked if he can meet them satisfactorily, and, if he can, to submit amended proposals The principal objections are the opportunities for fraud in the use of adhesive stamps, the inconvenience to the public of having to buy stamps, the necessity for the Collectors keeping a separate stamp account (if the stamps are sold by the Sub-Registrars), and the loss from the percentage allowed to stamp vendors if the stamps are sold by them.

18. Mr. Bourdillon was in charge of the Department throughout the year, with the exception of 30 days in April and May, when Mr. Handley officiated for him. The report has been submitted by Mr. Blyth, who received charge only in July of the present year. The names of the officers specially mentioned in paragraph 90 of the Report will be communicated to the Appointment Department.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Registration for information and guidance.

Ordered also that extract paragraph 18 of this Resolution, and extract paragraph 90 of the Report, be forwarded to the Appointment Department of this Office for information

Ordered also that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, in the Home Department, for information

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Chief Secretary to the Govt. of Bengal.

ADMINISTRATION OF WARDS' AND ATTACHED ESTATES IN THE LOWER PROVINCES FOR THE YEAR 1885-86.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 13th November 1886.

RESOLUTION.

READ—

The Report of the Board of Revenue on Wards' and Attached Estates in the Lower Provinces for the year 1885-86.

Delay in receipt of reports.

The Board properly notice the delay which has taken place in the submission of the Commissioners' reports, particularly those of the Burdwan, Presidency, and Chota Nagpore Divisions, which, though due on the 1st July, were not received until after the middle of August.

Collections.

2. The number of private estates under Government management during the year was 176, the annual rent demand was Rs. 93,42,744, and the collections amounted to Rs. 87,77,439, or 93·9 per cent. The remissions amounted to Rs. 3,84,000, and the balance outstanding increased from Rs. 75,78,418 to Rs. 77,82,737. The Board consider that the collections were, on the whole, satisfactory; noticing that, notwithstanding local floods, and the temporary interruption caused in places by the introduction of a new form of rent receipt under the Bengal Tenancy Act, the percentage of realizations to current demand was rather better than in either of the two preceding years. On the other hand it should be remembered that the crops were somewhat better, even allowing for loss by inundation, than in either of the years referred to, and that during the six years from 1877-78 to 1882-83 inclusive, the collections averaged 99·7 per cent. of the rental. The Lieutenant-Governor, while he cannot find any special cause for approval in the results obtained during the year 1885-86, is glad to acknowledge the attention which managers have habitually paid to this part of their duty. The results are so far satisfactory that the estates have, during the last nine years, yielded an income equal to 97·5 per cent. of the annual rental, the balance uncollected, 2·5 per cent. of the whole, including necessary remissions. It is true that the balance outstanding is always very large; but this is in a great measure due to the chaos and confusion which the Court of Wards finds on taking over charge of private estates, where the arrear demand of many years is often swollen by claims at enhanced rates never valid according to law, and by sums long since barred by limitations. In the Chittagong Division the collections were highly satisfactory, and for this credit is due to the Commissioner and Collectors, who, with estates to manage second to none in difficulty, have obtained the best percentage in Bengal. It is impossible to attach too much importance to punctuality in accounting for the demand, either by collecting it, or by obtaining remissions for reasonable cause. The accumulation of arrears is not only unfair to the proprietor, but demoralizing to the ryots, and more particularly to the collecting agency. It is satisfactory to notice in this connection, as regards the operation of the certificate procedure, that the reduction shown last year in the total number of certificates is still retained, and that the Board can support with their authority the conclusion that the certificate procedure in Wards' estates in Bengal is worked with discretion.

Effect of the Bengal Tenancy Act.

3. The introduction of new forms of receipt under the Bengal Tenancy Act is mentioned in the body of the report as a cause of short collections on three estates—Srinagar, Sultangacha, and Lolit Mohan Rai; and there is reason to suppose that in two of these cases some of the ryots at least had just cause to dispute the validity of demands made against them. On Srinagar, though it has been found necessary to remit arrears amounting to the whole rental of several years, the balance still outstanding exceeds two years' income, and the Lieutenant-Governor, in investigating the state of the property while on tour in September last, came to the conclusion that a survey and record of rights was necessary in order to ascertain the rent-roll.

With regard to the Sultangacha estate, it is stated in the report that the High Court disallowed rent improperly assessed on rent-free land by the late proprietor, who, with a rental of Rs. 1,26,926, left behind him an arrear demand of over four lakhs. Far from realising these enormous arrears, the Court of Wards has never been able to collect even the current demand. Where heavy unrealisable balances, and the result of particular suits, indicate that the ryots challenge with effect the validity of the rent-roll, the introduction of the new forms of receipt, in which the annual rent has to be specified, must bring disputes to an issue, with the ultimate effect of putting an end to a state of things which can be only regarded as intolerable. The Lolit Mohan Rai estate is small, and the friction on it is sufficiently accounted for by the fact that the manager and the greater part of the collecting staff were absent from it during most of this and the preceding year, conducting civil suits at Dacca.

Payment of Government revenue.

4. In the Resolution upon last year's report the Lieutenant-Governor observed that the punctual payment of State dues should be regarded as an imperative duty. There has been an increase this year both in the amount of the arrears reported, and in the proportion borne by them to the total demand; and the sum left unpaid, Rs. 3,43,720, is so large as seriously to affect the revenue. It would, however, appear, from a statement subsequently sent by the Collector of Burdwan, that the greater part of the alleged balance, Rs. 1,93,717, has been entered in the arrear statement by mistake, the sum not being in reality payable until after the close of the year. As to the real arrears, the explanations given cannot be said to be in every case satisfactory. For instance, on the Tikari estate Rs. 60,691 revenue, and Rs. 6,534 cesses, remained unpaid at the close of the year, though the property includes Government securities valued at more than these dues, and the only comment made is that the amount has been paid since the close of the year. This is a matter which requires the special attention of the Board. On solvent estates the revenue should be invariably paid as it falls due, and any failure in this respect shows the manager to be unfit for his post. It would be well if the Lieutenant-Governor's view upon this point was brought to the notice of all managers.

Works of improvement.

5. The following statement shows the expenditure during the year on schools, dispensaries, and works of improvement:—

Year	Subscriptions and donations to schools	Subscriptions and donations to dispensaries.	Improvement of land and property and benefit of ward.
	Rs.	Rs.	Rs.
1885-86	58,430	33,007	54,763
1884-85	41,697	11,395	74,122
1883-84	39,989	19,445	1,20,493
1882-83	34,478	16,252	72,576

Upon this the Board observe—

"The contributions in aid of schools and dispensaries and the expenditure for maintaining buildings and other immoveable property in efficient condition, show an increase which is entirely due to the assumption of charge of the Burdwan Raj estate. The expenditure on works of improvement has decreased. This is admittedly not satisfactory, but it must be remembered that the solvent estates under the Court of Wards are mostly leased in putni, and that there is therefore no scope for improvements which benefit the estate, while the other estates which are in debt cannot afford to spend money on improvements, which on general grounds are so much to be desired."

6. The explanation, though good as far as it goes, does not seem to the Lieutenant-Governor to be sufficient, as there are large estates perfectly solvent, and not let on putni, on which not even a rupee has been spent on improvements. In their report of last year the Board observed that—

"On some Wards' estates it is impossible to effect substantial improvements, as large debts have in the first instance to be paid; but looking to the fact that Rs 4,76,567 were invested in Government securities during the year, it is evident that want of funds is not the only reason for the inadequacy of the works undertaken. In the whole division of Dacca there was no expenditure on improvements. It is believed that the action of managers

in this respect is influenced by the example of the less intelligent of the private owners of land, and that they do not always sufficiently realise that it is the policy of Government rather to expend on remunerative works than to hoard the surplus accumulation of Wards' estates. Many managers also want both the will and the ability to plan and supervise works of agricultural improvement. Now that an Agricultural Department has been created, managers should be able to obtain more readily skilled advice which will facilitate the execution of beneficial works on a larger scale. It is certainly matter of regret that during the year the expenditure on law charges was three times as much as that upon agricultural improvements."

With these remarks the Lieutenant-Governor expressed his entire concurrence, and it is matter of regret that, such being the approved policy of the Board, the practical result has been an unexplained falling off in the value of the work done. The Board may with advantage point out to the Commissioners in whose divisions there has been a deficiency in this respect, the advisability of seeing that the subject meets with due attention in future. As indicated in last year's report, the managers cannot always be trusted to initiate judicious improvements, and the matter is one which calls for the close attention of Divisional and District Officers.

Surveys and records of rights.

7. The extent to which surveys and records of rights have been carried out by special officers in recent years in Wards' estates is indicated in the following passage of the report:—

"The survey and record of rents in the Chooramon estate in Dinagepore was commenced in November 1884 under the supervision of a Sub-Deputy Collector; the work is expected to be completed in three seasons; the area is 172,357 acres, and the sanctioned expenditure is Rs. 46,589, or 4 annas 4 pies an acre—a rate which thus far has not been exceeded. The survey of the Burdhankotee estate in Rungpore was completed in December 1885 under the supervision of a first grade canoongoe; the survey has cost 7 annas 8 pies per acre, but the settlement work is not yet finished. A Sub-Deputy Collector was employed upon the survey of the Sasseram endowment estate in Shahabad. An area of 14,622 acres was measured, and the total cost of the survey and record of rights was Rs. 9,020, or 10 annas an acre. The survey of the Chota Nagpore estate in Lohardugga was completed in 1884-85 by Mr. Smart, a pensioned officer of the Professional Survey Department. The surveyed area amounts to 675,660 acres, and the estimated cost for both survey and settlement is Rs. 1,72,066, or a fraction over 4 annas per acre; but as the settlement is still unfinished, it is uncertain whether this estimate will be exceeded. The survey of the Dhanwar estate in Hazaribagh was made by a professional party under Major Sandeman at a cost of Rs. 41,000, or 6 annas an acre. The settlements of the Chota Nagpore and Dhanwar estates, and the surveys and settlements of other estates in the Chota Nagpore Division, are now under the charge of Mr. F. A. Slack who has been appointed Settlement Officer on a salary of Rs. 1,000 a month. Seven of the estates under the Court of Wards, and seven estates which are managed under the Encumbered Estates Act of 1876, have been selected for the operations which are now in progress."

8. As stated in the Board's report of last year, no new surveys on a large scale were undertaken pending the settlement of the provisions of the Bengal Tenancy Act. The expediency of now commencing such surveys on the Srinagar, Narhan, Tikari, Cossimbazar and other estates is under discussion, and the Lieutenant-Governor need only express his strong conviction that in many cases tolerable management is impossible without a survey and record of rights, owing to the untrustworthy nature of the accounts left by the late proprietors. The following description of Bhubanjoy Shaha's estate, Noakholly, is quoted from the report as showing what a poor foundation is sometimes afforded for collections, and in particular for the issue of certificates, by the accounts made over to the Court:—

"Before making over the estate to the management of the Court of Wards, the ward seems to have prepared a fictitious and inflated rent-roll, most of the jummas mentioned in his papers being hotly contested and objected to by the tenants. The whole rent-roll has to be carefully examined, and a new rent-roll prepared. The tenants of Sulekea have in a body declined to pay any rents unless a correct rent-roll is prepared. It appears that the ward has enhanced the rent of these tenants during the last two or three years by 50 to 75 per cent. The affairs of the estate are in a very confused state owing to the absence of all reliable papers and past mismanagement and maltreatment of the tenants, and probably about eight or ten thousand rupees (nominal arrears of rent) will have to be remitted as irrecoverable. Such a proposal necessitates a very careful examination of the ward's rent-roll, which of course takes time to do."

It is obvious that the management of an estate in this condition must be unsatisfactory to all connected with it. As an example of management founded

on a survey and record of rights, made without the enhancement of rent, the estate of the Sasseram endowment may be taken, where the collections this year slightly exceeded the current rental, and the balance at the end of the year was only Rs. 2,032 out of a total demand of Rs. 33,282.

Condition of the tenantry.

9. Under this head the Board observe as follows:—

"A full account of the condition of the tenantry in the estates under the Court of Wards has been furnished in previous years' reports, and it is only necessary to say that during the past year considerable distress was occasioned in several portions of the country by the severe inundation which took place in September 1885. It is true that ultimately the soil is fertilised by the deposit of river silt which the water brings with it; but temporarily, while the inundation lasts, the sufferings of the people are necessarily very great. In the Kanika estate in Orissa a cyclone, accompanied by a storm-wave, occurred on the 22nd of September. Out of 290 villages in the south of this estate, 11 were completely swept away and 108 were partially destroyed: three-fourths of the population of these villages are said to have perished. The precise loss of life has not been ascertained, but it probably exceeded 5,000 persons. Rents were remitted and relief was liberally granted; but the effects of this terrible calamity will be felt for many years to come. The condition of other districts in the province, which did not suffer from special causes, was generally prosperous."

Education.

10. Since the abandonment of the Wards' Institute in Calcutta, the education of minor proprietors has been carried out either in their homes by private tuition, or at the Government schools and colleges at the head-quarters of districts. The Lieutenant-Governor is glad to find, from the scattered notices which appear in the report, that the subject receives the attention of Divisional and District Officers, and that in nearly all cases the reports of progress are favourable. The prominent exception to these good reports is noticeable in the case of three wards in the Orissa Division, whose backwardness and indolence in the prosecution of their studies require the consideration of the local authorities. With the facilities of communication which now prevail throughout India, much may be done for the benefit of these young men by encouraging them to travel in different parts of the country under the care of their tutors. It would be a more wholesome experience than the life under the control of the zenanas, to which, the Lieutenant-Governor fears, many of the boys are subjected. Every effort, too, should be made to promote the pursuit of athletic exercises

Burdwan Estate.

11. The principal estate under management during the year was that of the Burdwan Raj with a current demand of Rs. 45,72,602, and liability on account of revenue, &c, of Rs. 34,89,170. The collections amounted to 98 per cent. of the current demand.

The Board report—

"When the estate was taken in charge, the arrear demand of rent due to the estate was Rs. 36,11,741, which represents the accumulated balance since the year 1267 B.S. swelled continually by addition of interest from year to year Much of this amount was barred by limitation during the lifetime of the late Maharajah and is not recoverable. As it is worse than useless to keep up a fictitious debt of this nature, remission statements are being prepared in the manager's office which, when sanctioned, will reduce the balance to a large extent."

Two important matters in connection with this property were under discussion during the year, and are still unsettled—the adoption of an heir by the widow proprietor, and the settlement of disputes as to landed property with the dowager Maharani. The difficulties which have arisen in both cases may now be said to be approaching solution. The Lieutenant-Governor notices with much regret the death of Mr. Miller, Joint-Manager of the estate, and for many years the trusted adviser of the two late proprietors.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Offg. Secretary to the Government of Bengal.

REPORT OF THE BOARD OF REVENUE ON THE LAND REVENUE ADMINISTRATION OF THE LOWER PROVINCES FOR THE YEAR 1885-86.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 15th November 1886.

RESOLUTION.

READ—

The Board of Revenue's Report on the Land Revenue Administration of the Lower Provinces for the year 1885-86.

The Land Revenue Department of the Board was administered by Mr. Reynolds throughout the year; the Land Acquisition Department by Mr. Cockerell.

The number of estates.

2. The number of estates paying revenue or rent to Government, and their classification, are shown in the following table:—

	Class I, permanently-settled estates.	Class II, temporarily-settled estates.	Class III, Government estates.	Class IV, ryotwari tracts.	Total
1884-85	145,457	7,691	2,913	26	156,087
1885-86	147,008	7,764	2,950	24	157,746
Increase or decrease in 1885-86 ...	+1,551	+73	+37	—2	+1,659

The increase in the number of estates is normal, and is due to the usual causes, to partitions, to the settlement of new alluvial accretions, and to purchase by Government in default of private bidders at sales for arrears of revenue. The reduction under the head of ryotwari tracts is the result of re-classification.

Land Revenue demands.

3. The current demand in respect of each class of estates is compared below with that of the year 1884-85:—

	1884-85.	1885-86.
	Rs.	Rs.
Class I	3,22,98,211	3,22,99,680
„ II	27,11,757	27,14,942
„ III	21,24,585	21,97,439
„ IV	8,53,133	8,21,318
Total ...	3,79,87,686	3,80,33,379

4. The increase of the year was only Rs. 45,693 against Rs. 47,779 in 1884-85 and Rs. 77,962 in 1883-84. In former years the annual addition to this branch of the revenue amounted to about a lakh and a half of rupees, and the diminution in the rate of development is attributed to the greater moderation shown at present in enhancing rents, and the greater readiness to reduce them where found excessive—the result, no doubt, of the long discussions of the subject during the consideration of the new Bengal Tenancy Act.

Collections, remissions and balances.

5. The following statement shows the collections, remissions and balances of the year as compared with those of 1884-85:—

	Demands.			Remissions	Net demand after remissions.	Collections.	Balances.	Percentage of collections to current demand	Percentage of collections to total demand
	Current.	Arrear	Total						
	Rs.	Rs.	Rs.	Rs	Rs.	Rs.	Rs		
1884-85 ...	3,79,87,686	22,00,716	4,01,88,402	1,24 977	4,00,63,425	3,71,37,748	29,25,677	97·76	92 41
1885-86 ...	3,80,33,379	30,13,936	4,10,47,315	2,00,005	4,08,47,310	3,83,91,424	24,55,886	100 94	93 58

6. The remissions were considerable, amounting to Rs. 2,00,005 against Rs. 1,24,977 in 1884-85 and Rs. 1,03,580 in 1883-84. They are classified as follows:—

	1883-84.	1884-85.	1885-86.
	Rs.	Rs.	Rs.
Nominal remission	30,475	25,065	61,089
Remission of grace	33,538	38,072	56,458
Ditto of right	39,567	61,840	82,458

7. Nominal remissions and remissions of right are frequently connected with original errors in the statement of demand, such as double assessments, or failure to enter at once reductions ordered by competent authority, and the growth of entries of this class may be checked by greater attention to the accounts. As to remissions of grace, which really affect the revenue, the Board remark:—"The largest remissions of grace occurred in the following districts:—

	Rs.
Gya	13,327
Julpigoree	8,010
Hooghly	7,119
Midnapore	6,947
Cuttack	5,201
Backergunge	4,325

In Gya the remission was allowed on account of failure of crops; in Julpigoree on account of death, desertion, and insolvency of ryots; in Hooghly on account of the loss of crops by flood. In Midnapore Rs. 3,737 were written off on account of death and desertion of ryots and the insolvency of farmers, and Rs. 3,016 on account of the adjustment of jungle jumma due from the aymadars of estate Bulrampore. The causes of remission in Cuttack were relinquishment of lands by the ryots after the storm-wave of 22nd September 1885, loss of crops by flood in Banki, and reduction of rents of some poor ryots in the Cuttack town khas mehal. The remissions in Backergunge were rendered necessary by diluvion and the insolvency of farmers."

8. The outstanding balances of the four classes are compared below with those of 1884-85:—

	1884-85.	1885-86.
	Rs.	Rs.
Class I	14,07,616	9,03,603
„ II	4,71,924	5,10,711
„ III	9,19,706	9,59,385
„ IV	1,26,431	82,187
Total ...	29,25,677	24,55,686

The Board observe that "the comparison shows a decrease of Rs. 4,69,791, and by taking the corrected figures for 1884-85 as given in column 5 of appendix No. II of this report, viz. Rs. 30,13,936, the decrease becomes Rs. 5,58,050. This improvement is due to the payment of revenue by the Burdwan estate." The amount left unpaid on account of the death of the late Maharajah of Burdwan was eight lakhs of rupees, so that, allowing for this temporary and exceptional default, the year under report compares unfavourably with 1884-85. The result of a comparison with previous years is still less satisfactory, and it is evident that these balances have a tendency unduly to increase. The control of the Board over payments on account of estates permanently settled is in great measure limited to those under the management of the Court of Wards. As to these, it is stated in the report "the total amount due from Wards' estates at the close of the year was Rs. 1,52,659 against Rs. 46,899 in 1884-85 and Rs. 25,847 in 1883-84. The result is far from satisfactory." In this conclusion the Lieutenant-Governor entirely concurs. It is most unsatisfactory, for instance, that a large balance should have been left unpaid by the Manager of the Tekari estate, which is not only solvent, but includes a considerable sum in Government securities. The Lieutenant-Governor cannot consider the manager of a Ward's estate fit for his position

if, having funds which by timely arrangements can be made available for the purpose, he fails to discharge the public revenue The collections on temporarily settled and Government estates must be very greatly influenced by the attention which revenue officers pay to this branch of the administration, and in these cases also the Board consider that the results obtained during the year cannot be considered satisfactory. There has been a certain falling off in the work of revenue collections taken as a whole, and it does not seem to be due to the circumstances of the year, which were, in spite of local floods, rather more favourable than those of 1884-85. The Lieutenant-Governor is glad, on the other hand, to notice an improvement as to ryotwari tracts, where the collections exceeded the current demand, and the balances were reduced from Rs. 1,17,701 to Rs. 82,187 The District Officers of the 24 Pergunnahs, Darjeeling, and Singbhoom deserve mention for having collected more than 99 per cent of heavy gross demands. The results obtained in these districts show what can be done where arrangements are adequate, and the Board should endeavour, during the current year, to stimulate Collectors elsewhere to imitate the example set. The coming harvest will probably be abundant in every district in the province, and the financial position of Government makes it even more than ordinarily desirable that all dues should be collected with the utmost punctuality

Financial results of direct management.

9. The number of public and private estates managed directly by Government, that is without the intervention of middlemen, was 1,315; their annual rent-roll amounted to Rs. 27,63,645, and the collections were Rs. 26,78,174, or 96 9 of the current demand. The year opened with an arrear balance of Rs. 11,04,618, and the percentage of the collections on the gross demand made up of the annual rent and of such arrears was 69 2. For the purpose of criticising the work of individual Collectors, prominence is properly given to the proportion borne each year by collections to gross demands, and this has led to a mistaken belief, widely diffused by a portion of the press, that on estates managed by Government little more than two-thirds of the annual rent is collected. As a matter of fact, the percentage of collections to the annual demand during the last ten years has been as follows:—

Years.	Percentage.
1876-77	99 6
1877-78	87·2
1878-79	100·0
1879-80	101 9
1880-81	104 8
1881-82	99·4
1882-83	108·3
1883-84	96·1
1884-85	97 1
1885-86	96·9
Average of ten years	99 18

10. The percentage obtained on the average shows that the collections have been on the whole, in what was described in the Resolution on the Board's Revenue Administration Report of 1877-78, as "the healthy stage," in which collections, taken one year with another, equal the full current rental of the property. The floating balance appears unduly large, and may probably be reduced by attention to matters of account, and to fixing suitable dates for payment; but the broad fact remains that a sum very nearly equal to the annual rent is collected year by year. The management during 1885-86 has not, as the Board remark, been very successful by comparison with other years, and it is hoped that exertions will be made to obtain better results during the current year. But, nevertheless, the net income has been larger than could have been obtained had the estates been farmed out. The allowance made to middlemen in such cases is 20 per cent. on the rental, while the most allowed for direct management, including improvements and contributions to roads and schools, is 10 per cent.; to this, adding 3·1 per cent, the amount by which the collections of the year fell short of the current demand, there would be an advantage of 6 9 per cent. in favour of the form of management adopted, even if the

farmers paid in full, which they never do. They really pay in proportion to the current demand no better than the ryots when dealt with directly, and, from a financial point of view, the additional ten per cent. allowed to them is a loss, against which the only set-off is the comparatively trifling interest on the outstanding balance, in so far as that exceeds the amount to which it would reach were the estates directly managed.

Improvements on Government estates.

11. The sum of Rs. 54,753 was spent during the year on the improvement of Government estates, by the excavation of tanks, the sinking of wells, by drainage, irrigation, embankments, and similar works. In addition to this amount, Rs. 27,342 were spent from the funds of the Orphangunge market, in the 24-Pergunnahs, on reproductive improvements to that estate. The Board observe that—

"The Agricultural Department has given some impetus to the cultivation of new staples. The estate of Tichasa, in the Patna district, was placed under the supervision of Mr Allen, Assistant to the Director of the Agricultural Department, for making experiments, which are said to have been attended with success. In the Government estates of Arrah, the experimental cultivation of wheat was tried on scientific principles under the supervision of the same officer, and the result appears to have been remarkably successful.

Successful attempts were made by Mr A. C. Sen, another officer of the Agricultural Department, to cultivate mattar, wheat, mussooree, and the potato in Burdwan. The usual contribution of 2½ per cent. on the collections was made for the construction of roads, and for education on Government estates. There is reason to believe that these allowances, assigned as they are to local Committees, are often spent on the districts generally, without special reference to the estates from which the receipts are derived, and an endeavour may now be made with advantage to see that the Government ryots more immediately concerned obtain the full benefit of the grants.

Conditions of ryots.

12. The condition of the ryots on the Government estates in the Dacca, Presidency, Chittagong, Patna, and Chota Nagpore Divisions is reported to have been generally good. In parts of Burdwan, Bhagulpore, and Rajshahye losses were sustained from inundation. "In Orissa," the Board report, "some distress was felt by ryots of the estates bordering on the Chilka lake and its neighbourhood. A grant of Rs. 9,500 was made for their relief. The ryots of the Birso estate in Balasore suffered much damage from the cyclone of September last and the sea-wave that followed it. The Board have sanctioned remission of rent for the Amli year 1293 in the case of those ryots who have lost their whole crop, and three-fourths of the rent in the case of those who have saved only one-fourth."

Survey and settlements.

13. No survey work of importance was carried on during the year, except that done under the Bengal Tenancy Act in Mozufferpore, which is separately noticed. Six hundred and eleven settlements were concluded, producing Rs. 2,43,518 a year, being Rs. 56,130 in excess of the revenue previously received. Of the increase, Rs. 43,293 resulted from original settlements.

Land registration.

14. At the commencement of the year the initial work of registration under Act VII (B.C.) of 1876 had been completed in 34 out of 43 districts. Completion reports were received during the year from Hooghly and Midnapore, leaving seven districts in which the operations are still pending. It is only in Cuttack that the work remaining to be done is considerable, and there the progress made during the year has been very poor. It is now desirable to complete the registration with the least practicable delay. The Board consider that the mutations registered, which were during the year 3·5 per cent. of the initial registrations, do not fairly represent the number of changes in title which occur, and the question whether judicial or executive action should be taken to ensure a more complete record of such transactions is at present under consideration.

Operation of the Sale Law

15. The number of estates which became liable to sale during the year on account of default in paying the revenue was 12,445; that of estates actually sold 1,770 The sales were not so numerous as in the three preceding years. The number of estates bought in by Government at nominal prices was 143, and these were presumably let go to sale because, owing to diluvion and other causes, they could no longer bear the revenue assessed. It is generally reported that the Sale Laws were worked with moderation and leniency.

Working of Public Demands Recovery Act VII (B.C.) of 1880.

16. The following statement shows the number and nature of certificates in force during the year:—

	Number pending from last year.	Number filed during the year.	Total	Disposed of during the year.	PENDING— More than six months.	PENDING— Less than six months.	PENDING— Total.

Total ...	115,379	199,262	314,641	195,075	44,943	75,318	119,566

The number of certificates filed during the year was thus 199,262 against 173,474 in 1884-85 and 220,003 in 1883 84. There was a considerable increase in the issue of certificates for the realization of water-rates, and the Board express their conviction that the number of these was excessive, and a source of oppression. Collectors should use every effort to realize small demands amicably, and the success of an officer in charge of this branch of the revenue must in some degree be measured by the extent to which he can recover the rates without resort to the certificate procedure. It often happens, however, that irrigation demands of the smallest amount are disputed, and therefore cannot be realized except by legal process. In such cases it is better to collect under the certificate procedure than not to collect at all. The number of cases in which it was necessary actually to sell property for the realization of demands diminished from 8,599 in the preceding year to 6,284 in 1885-86.

Miscellaneous proceedings.

17. The collections of miscellaneous revenue amounted to Rs. 1,91,451 against Rs. 2,51,827 in 1884-85, the decrease being due to the introduction of a new rule under which searching and copying fees are realized in stamps instead of in cash. Thirteen Government estates, with an area of 572 acres, were sold, subject to an annual revenue of Rs. 1,296, for the total price of Rs. 3,768. During the year 526 partitions were effected against 502 in the preceding year, and it is stated that work of this class is increasing. The Government revenue was redeemed in respect of 226 estates with an annual demand of Rs. 251, the price realized being Rs. 9,269. Two hundred and forty-six leases were granted of waste land, including 17,369 acres, at an immediate rent of Rs. 923.

Land Acquisition.

18. The statement given below shows the area of the land acquired for public purposes during the year, its distribution and cost:—

	Area of land acquired. A. R. P.	Revenue abated. Rs. A. P.	Cash compensation paid and other charges. Rs. A. P.

In these proceedings are included several important projects, such as the improvement of the Jorebagan bustee, the widening of a portion of the Chitpore road, the acquisition of the land for the Kidderpore Docks, a large drainage scheme in the Hooghly district, besides several extensions in railways.

Working of the Bengal Tenancy Act.

19. Act VIII of 1885 came into operation on the 1st November 1885, and was therefore in force during five months of the official year The statement given below shows the action taken under its different sections in revenue offices:—

The Board of Revenue remark—

The work done relates principally to the issue of notices and payment of landlords fees on transfer of tenures under sections 12 to 15 of this Act. It is reported that in many cases the landlords refused to accept the fees sent to them with the notices, under the idea that acceptance would bind them to acknowledge the transfer. The fees were then held in deposit in the treasury. In the Patna Division it is said that some administrative difficulty has arisen from the refusal to accept the landlords' fee. In the Shahabad Government estates it has been necessary to file objections repudiating transfer of tenures described as being held at fixed rates, but which at most are mere occupancy holdings, the transfer of which is, by the custom of the country, not binding on the landlord without his consent. The Collector of Chumparun has reported that in his district many transfers have been notified which do not seem to fall under the provisions of the law. The Commissioner of Chittagong observes that the law apparently gives the landlord no power to contest such a notice, and that some power of protest at least should be given, otherwise, in the event of litigation, the courts might infer that because no objection was raised none existed.

After the close of the year, the sanction of Government has been accorded to rules for the guidance of the Registration Department in registering such transfers. The registering officer is required to certify that the document is admissible, and it will be his duty to refuse to give this certificate unless the transfer purports upon the face of the document to be a transfer of a permanent tenure or of a ryoti holding at a fixed rate.

Transfer of holdings.

20. A petition has been addressed to Government on the subject of the working of section 12, which provides that ryots holding at a rent fixed in perpetuity must give notice, and pay a fee to their landlords, through the Collector, on transferring their holdings. It is alleged that ryots not holding at fixed rates adopt the prescribed procedure, thereby creating evidence which in future may be accepted as proof that they really occupy the privileged position which they claim. In so far as the action taken by such ryots is the result of misapprehension as to the meaning of the law it is met by the registration rules cited by the Board in the passage quoted above. But where the parties to the sale of a holding seriously assert that it is alienable and privileged for ever against an increase of rent, while the zemindar denies that it is of this character, it does not seem undesirable that the issue should be distinctly raised at the time when the transfer takes place The new law has not conferred any right of sale, but has merely provided that, when transfers occur, they should be duly registered and notice given to the zemindar. If the latter denies the right of transfer, he can refuse to acknowledge the new tenant. If, while admitting the transfer, he merely denies that the holding is held at fixed rates, he can protect himself against the notice and his acceptance of it, with the fee, being used in evidence against him by action such as that of the Collector of Shahabad. Even if he declines to accept the fee, he is not in a worse position than under the old law, which did not require that a fee should be offered.

Appraisement of produce.

21. The Board state that the cases connected with the appraisement of produce occur principally in the Patna Division. The Collector of Gya observes that the working of these sections has so far been satisfactory to both landlords and tenants, and is likely to prove most beneficial in his district, where so much land is held on the system of produce rent.

Applications for survey.

22. Of the four applications for survey and record of rights, one appears to have referred to a Government estate, one was refused, and two were pending at the close of the year. The other proceedings entered in the table were of minor importance.

Survey and record of rights in Mozufferpore.

23. On this subject the Board observe—

After much correspondence and discussion, it was ultimately decided, with the sanction of the Government of India, to undertake an experimental survey of pergunnah Bisareh in Mozufferpore, including therein a record of rights and settlement of rents. The operations have been carried on under Chapter X of the Tenancy Act, and a notification under section 101 (3) was duly published in the *Calcutta Gazette* of the 4th November last.

The cadastral survey has been conducted by a professional survey party under the superintendence of Colonel Barron, of the Survey Department, who recently completed successfully the survey of the Benares district. The work of record of rights and settlement of fair rents is being carried on by Mr Collin, C.S., with the assistance of two Sub-Deputy Collectors, under the immediate supervision of the Director of the Agricultural Department, who in this matter acts in subordination to the Board of Revenue. The officers of the Survey Department record the areas of holdings, facts of undisputed possession, of crops grown, and of irrigation. The maps and measurement records of each village, as they are completed, are at once made over to the revenue officers, who immediately proceed to the village and determine and record the status and interests of all parties, from the proprietor down to the under-ryots. They also record the amounts of existing rents, and settle and record fair rents on the application of either landlord or tenant, and without such application, also, when it appears that the tenant is holding land in excess of or less than that for which he is paying rent.

The total area cadastrally surveyed to the end of June was 410 square miles. The rents were recorded and the status determined of 15,876 tenants, while fair rents were settled on the application of either landlord or tenant in the cases of 3,546 ryots. Boundary disputes, of which there were 323, mostly of a petty character, were amicably settled, and in no case was an appeal made to the Special Judge from the decisions of the Settlement Officer. The tenants whose status was determined are classified thus—

		Percentage on total.
Cultivating tenure and under tenure-holders ...	12	0·08
Ryots at fixed rates	636	4·00
Settled ryots	13,194	83·13
Occupancy ryots but not settled	95	0·60
Non occupancy ryots	992	6·25
Under-ryots	943	5·94
	15,876	100·00

In all cases in which fair rents have been settled, the existing rents have been recorded as fair. The law presumes that existing rents are fair till the contrary is proved, and does not permit of their reduction except on the ground of a fall in the prices of staple food-crops since the rents were last fixed, or on the ground that the area of the holding is less than that for which the ryot has been paying rent. Neither of these grounds for reduction in rent having been found to exist, existing rents have not been reduced. On the other hand, landlords have not shown that prices have risen since the rents were last fixed, nor have they adduced evidence that the ryots are holding land in excess of that for which they are paying rent. Existing rents therefore have not been enhanced. Unauthorised cesses and abwabs are not recorded.

The total cost of the operations of both survey and settlement to the end of June was Rs 1,33,710, or 8 annas per acre on the area which had been cadastrally surveyed. Within this sum is included the cost of such non-recurring items as tents, camp equipage, travelling allowances to officers joining their appointments, and other charges which are necessarily incurred when a survey party is organised in a new district.

It is not possible, at the present stage of the proceedings, to give an exact estimate of the cost at which the combined operations may be done when the survey and settlement parties are in full working order, as the results of the first field season are never a fair criterion; but, as far as present experience enables the survey and settlement officers to form an opinion, it may be anticipated that the total cost of the operations will not exceed 8½ annas per acre.

The success of the work, so far as it has gone, may fairly be judged by the absence of that friction and those difficulties which were expected in connection with it. There has been no opposition and no obstacles of any kind. On this subject the Board are glad to reproduce the opinion of the Commissioner, Mr. Halliday, as follows:—

"The survey operations under the Bengal Tenancy Act are progressing as smoothly as possible disputes as to boundaries and possession are few, and are chiefly connected with pieces of waste land and roads; organised opposition there is none; and it is now clear that apprehensions as to relations between landlords and tenants being embittered by the survey are groundless. Among the zemindars, the survey seems on the whole not unpopular, inasmuch as they see that it will provide facilities for identifying the whole of their lands and for realising their dues on account of every portion of their estates. The ryots are quite indifferent in the matter, and see no cause for resistance or opposition to the proceedings.

"The criminal cases connected with the demarcation and survey proceedings have been extremely few, and have mostly on investigation turned out to be false or exaggerated. Nothing in the shape of a riot has been proved in any instance. The survey will effect much good in the way of determining rights and facilitating the identification of land. It is probable that the survey record will be looked upon as a charter of rights by all classes interested in land, and no transfer will be negotiated without reference to it."

In view of these facts, it is a matter of extreme regret to Sir Rivers Thompson that, since the close of the year, the orders of the Secretary of State have been received that this experimental survey should, for the present, be abandoned.

Rent receipts.

24. The provisions of the Bengal Tenancy Act on the subject of receipts for rent have produced a very immediate and striking effect, and give matter for comment in every part of the Province. The earlier reports of Collectors everywhere give prominence to the difficulties which had arisen. Under the former law, section 11 of Bengal Act VIII of 1869, every cultivator to whom a receipt, specifying the year on account of which he might have made a payment of rent, was not given, was entitled to recover damages not exceeding double the amount paid. In fact, however, the year was not specified in receipts, and the remedy by a suit for damages proved illusory. The matter was of the most serious importance, inasmuch as the worst agrarian disputes in Bengal arose from the practise of making false rent-rolls showing rates in excess of those due, payments on account of the current demand being credited, without the knowledge of the tenants, to imaginary arrears of past years at the increased rate. The ryots had no means of checking these fraudulent proceedings, inasmuch as the receipts they received showed merely the sums paid, without specification of the year to the demand for which they were credited, and even the Courts found the greatest difficulty in deciding whether accounts produced before them as the sole evidence of the existence of an alleged arrear were genuine, or concocted in the manner indicated above for the purpose of being used as false evidence. To check this abuse, which was widespread and most dangerous, it is provided in the Bengal Tenancy Act that rent receipts shall contain certain particulars as to the holding and the demand for which the money is paid, so far as they can be specified at the time by the landlord; and it is further enacted, as a self-acting sanction to the above rule, that if a receipt does not contain substantially the particulars required, it shall be presumed, until the contrary is proved, to be an acquittance in full of all demands up to date. That a change affecting every payment of rent throughout the province, and tending to bring old disputes to a head, would cause much temporary trouble and inconvenience was obvious; but it was believed that it was nevertheless desirable to take the precautions necessary to prevent the constant forgeries, false evidence, and riots clearly traceable to the evasion of the old law, as also to put a stop to a system by which the ryots as a body were being by degrees defrauded of their privileges in the matter of rent rates.

25. That an appreciable effect has already been produced appears from the fact that, during five months, the Board sold 7,473,311 of the specimen forms of receipt. In addition to these forms are printed at private presses, those supplied by Government having purposely been disposed of at a price which permits of their being undersold.

26. The first introduction of the new forms into use were impeded by a curious misapprehension. The words "particulars of the holding" being used as a general heading in the form, it was supposed by the ryots in many districts that the specific designation of their status should be given, and many refused to pay rent, as their demand to be entered as belonging to some privileged class was not complied with. The attention of the Lieutenant-Governor was drawn to this error by Maharajah Sir Jotendro Mohun Tagore, K.C.S.I., and instructions

were immediately issued by Government, through the Board, for its correction by the explanations of local officers. On most estates, when this preliminary difficulty was got over, the new system worked smoothly. Thus the Commissioner of Patna writes of landlords and tenants that—

The relations have been, on the whole, satisfactory, except as regards certain estates in some of the districts in which there was some misunderstanding between the two classes, but these may be treated only as exceptional cases.

* * * * * *

In Shahabad a rupture was at one time imminent in some of the estates of the Maharajah of Dumraon, situated in pergunnahs Behia and Bhojepore, where the tenants would not agree with the landlords' agents as to the details of area and rental to be entered in the form of receipts for rent prescribed by the Tenancy Act. The tenants refused to pay any rent unless their claims were admitted in the receipts. The Collector happened to be on tour near the locality at the time, and took the opportunity of explaining to the ryots that non-entry of these particulars would not affect them, the risk being altogether of the landlords. With this assurance in writing the tenants were satisfied, and have since resumed payment of rent.

27. In some places there has been a dispute as to the entries to be made against the headings as to the area of holdings—a matter generally settled by leaving the column blank. This course is legal and correct where, as generally happens, the landlord does not really know what the precise area is. There remain the cases which the law was designed to meet, those in which the landlord has been keeping his accounts so as to show a higher rent than that which is authorised by law, or acknowledged by the ryots; those in which illegal cesses have been collected; and those where, through the former neglect of zemindars to grant receipts and pattahs, everything is in confusion, and the real rent has never been ascertained. As the Collector of Mymensing remarks, "where neither will trust the other, and where the character of the holding, the quantity of land, and the amount of rent, are all in dispute, there seems no way of settling matters but by the arbitrament of the Civil Court, or by the operation of the Revenue authorities under the Tenancy Act." On such estates the first effect of the new law may be to increase contention, with the ultimate result of producing a satisfactory settlement. Even in these instances, it may be remarked, what brings matters to an issue is merely the insistance on the discharge of an obligation which existed under the old law, and has always been considered necessary in Bengal—the entry in the receipts of the period in respects of which rent is a paid. This is a necessary form of honesty and fair-dealing, insisted on in business, of every kind, and if its observance in transactions between Bengal zemindars and their ryots causes friction, that is the best proof that the precaution is necessary either to clear up uncertainty, or to prevent fraud.

28. A few minor points as to the working of the Act are mentioned in the extracts given in the Board's report. In Nuddea the zemindars are much concerned as to the meaning of section 188, which is interpreted by some authorities as preventing one of several joint proprietors from suing separately for his share of the rent. The Collector of Pubna writes—

The provisions of the law as to the maximum rents payable by the under-tenants are also beginning to be appreciated. Very large jotes underlet at an enormously increased rent are common, and I received a complaint from several of the jotedars on the Selimpore estate that they were about to be ruined by the new Act. The effect of the Act in making jotes readily saleable has been very apparent, and larger numbers of jotes have been sold principally on account of debts incurred in former years.

If by large jotes are to be understood those of an area exceeding 100 bighas, it is probable that the alarm of the holders is unfounded, as the provisions of the law prescribing a maximum rent do not apply to the under-tenants of tenure-holders, but to under-raiyats as defined in the Act.

29. The Board express their opinion on the general subject as follows:—

On the whole, the Board consider that, as far as can be judged from the experience of the few months which have elapsed since the Act came into operation, the working of the new law is not likely to be attended by any such disturbance of the relations between landlords and tenants as was apprehended by some of those who were opposed to the introduction of the measure. The difficulties hitherto experienced have mostly been confined to questions connected with the new forms of receipt, and with the notices of transfers. The Board have no doubt that, upon both these points, the difficulties will prove to be merely of a temporary nature. It is satisfactory to find that the other provisions of the Act appear

to be working smoothly, that recourse is being had to the sections relating to the appraisement of produce rents, and to the registration of improvements, and that some applications have been received for the settlement of rents. At present, however, there are no materials for forming an opinion on the operation of some important sections of the law, among which may be mentioned the publication of price-lists, the sale of tenures subject to encumbrances, and the modified procedure for distraint. The Board will be in a position to submit a more complete report on the whole question when the returns of an entire year's working of the new law are before them. But it will perhaps be found that the most important results of the Act are such as do not admit of being numbered or tabulated. The real benefits of such a measure as the Tenancy Act are to be looked for, not in the number of cases in which application may be made to the Courts to enforce its provisions, but in the peaceful acceptance by all classes of the principles which underlie it, that the landlord is to be secured in the enjoyment of his fair rent, and that the tenant is to be maintained in the possession of his rightful holding.

30. The Lieutenant-Governor thanks Mr. Reynolds for his administration of the Land Revenue Department during the year. The names of the officers commended by the Board will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

JOHN ELIOT,

Meteorological Reporter to the Govt. of Bengal.

METEOROLOGICAL AND RAINFALL SUMMARY OF THE PROVINCE OF BENGAL FOR THE MONTH OF OCTOBER 1886.

DURING the month of October the south-west monsoon, which is usually established over the province in the beginning of June, retreats southwards, and is replaced in Bengal by the north-east monsoon. The change is a slow one, and hence the meteorological conditions of the month are those of a transition period. The normal features of the October transition period are rapid decrease of temperature, the prevalence of light, unsteady, variable winds, and slight rainfall, occurring chiefly as local showers, which are frequently due to thunder-storms. South-west monsoon winds continue over the south and centre of the Bay, but recurve in the centre or north of the Bay, and are then determined westwards, giving moist north-easterly winds and rain to the west or Madras coast of the Bay. This recurvature of the rain-giving south-west monsoon winds is hence one of the normal features of the month, and in fact the most important one. It takes place further and further south during the months of October and November, the area of recurvature marching southwards in an irregular fitful manner, depending largely upon the local conditions in Burmah and Southern India, or on the opposite sides of the Bay. Occasionally the rainfall occurs in the Bay itself under special localized conditions which determine the formation and rapid growth of a cyclonic disturbance. These disturbances or cyclonic storms constitute the abnormal feature of the month and period. They may vary in magnitude from a small diffused storm of little importance to a storm of great extent and intensity, and accompanied by an immense storm-wave as in the cases of the Calcutta cyclone of 1864, or the Backergunj cyclone of 1877. The storms generated in October frequently advance northwards to the Bengal coasts, and then give excessive rain and violent winds to the area over which they pass. Storms formed in November usually advance westwards to the Madras coast. All the larger storms that are generated in the centre or north of the Bay, whatever their line of advance may be, modify the weather in the province during their existence. Their influence is most marked in the coast districts of Bengal and Orissa, but extends to a varying distance into the interior, depending upon the character and extent of the storm. The dry north or north-westerly land winds proper to the season are replaced by the easterly, north-easterly, or northerly winds of the northern outer quadrant of the storm area. These are damp sea winds, usually very feeble, but which have circulated in Lower Bengal slowly over the malarious sea-board districts of the Sunderbunds, and are hence very strongly opposed in character to the winds they replace. Skies also cloud over in the coast districts, and rain falls in very variable amounts; Orissa, from its position, usually receiving the largest quantities. The conditions necessary for the formation of cyclones during this period have been explained in previous October monthly reports. The present remarks are, it is hoped, sufficient to show the character of the normal and abnormal features of the weather of the month.

The rainfall of October is due to two distinct causes, and as the second cause (cyclone occurrence) is from its nature an extremely variable and uncertain one, it will be seen that the average distribution of the rainfall in October must be more irregular than in the previous monsoon months, and also that in particular years the actual distribution of the rainfall may be of an extremely capricious character. In the case too of the rainfall which is brought up by the continuance of the south-west monsoon conditions, as the period at which these conditions ceases, varies very considerably from year to year, the distribution of the rainfall will not only be irregular, but the total amount received will be very variable. The normal distribution of the rainfall is so irregular that it can only be briefly described with approximate accuracy. It was thus described in the report for October 1884:—"The average rainfall in Behar (with the exception of the Purneah and North Bhagulpore districts) and Chutia Nagpur (excluding the districts bordering on South-West Bengal) varies from two and a half to four inches. The amount is least in the Gya district. It varies between four and six inches in the case of the previouly excepted districts, the western districts of Orissa and the whole of Bengal, excluding the Julpigori district and a narrow strip extending along the coast, and bounded on the north by a curved line running through Cuttack, Jajpore, Diamond Harbour, Port Canning, Chandpore and Chittagong. Over this long narrow area, the width of which varies from 20 to 60 miles, the average rainfall exceeds 6 inches. It is absolutely greatest at False Point, for which it is 11·4 inches."

Meteorological summary of the month.—The meteorological conditions which obtained in the province at the end of September were somewhat abnormal. During the whole of that month, the south-west monsoon current gave abundant rain to the whole province. The conditions which gave rise to the excessive rainfall of September were also of such a character as to determine the heaviest rainfall and the greatest excess to South Behar (more especially the Gya and South Bhagulpore districts) and the Sonthal Pergunnahs, and to the Dinagepore district of North Bengal. The tendency of the moisture current to be drawn to South Behar, and to give heavy rainfall to that area, was, as will be seen, even a more prominent feature of the first fortnight of October than it was of the month of September. Over Bengal the interaction between this moisture current with the cool, dry descending northerly currents from the hills, gave rise to an unusual amount of local atmospheric disturbance, which was shown by the frequent occurrence of thunder-storms, to an extent that is very unusual at the end of the south-west monsoon. During the latter half of the month, the south-west monsoon current began to retreat southwards.

The conditions of its recurvature were somewhat unusual, being apparently mainly determined by a marked tendency to low barometer on the west coast. This had been shown slightly in the month of September, but came into marked prominence during the latter half of October. Hence the cyclonic storms which were generated at this time advanced to the Madras coast, and influenced the province of Bengal very slightly. Consequently the past month has, in its absence of cyclonic storms entering the province, been a very favourable one.

The following remarks give a more detailed account of the more important meteorological features of the month. At the end of the month of September a small depression which had crossed from the Aracan to the Ganjam coast was filling up. Its apparent disappearance on the 3rd from that area was accompanied by the formation of a small depression in Chutia Nagpur and the southern districts of South Behar, which continued with little change of position or character until the 9th, when it filled up. On the 4th the depression off the Ganjam coast began to re-form, and continued a permanent feature of the meteorology of the Bay until the 15th, when it finally disappeared. During the period from the 3rd to the 9th, there were hence two depressions in existence—one in Ganjam, and the other in South Behar. The former gave occasional rain squalls to the coasts of Orissa and Bengal, and the latter exceptionally heavy general rain to the greater part of Behar and Chutia Nagpur. Frequent thunder-storms with heavy showers of rain occurred in Bengal, more especially in South-West Bengal and the northern districts of North Bengal. On the 10th dry weather set in over Behar, and gradually extended eastwards. The depression on the west coast, which was on the 10th off Ganjam, marched slowly southwards along the coast, and from the 12th to the 16th lay between Masulipatam and Negapatam, and finally filled up on the 16th. The disturbance was diffused and irregular in character, and did not concentrate into a severe cyclonic storm during any portion of its existence. The indraught to it gave heavy rain to the west coast of the Bay, and brought up much cloud into the coast districts of South Bengal and Orissa, which hence received occasional rain. With the southward march of the depression, the area affected contracted southwards, and during the last stage of its existence rain fell only in Orissa and Chutia Nagpur. Very shortly after the disappearance of this depression, and probably on the afternoon of the 17th, another depression (the second of the month) began to form in the north of the Bay. It was off the Ganjam coast on the 18th and 19th, during which period it intensified slightly, and was moving almost due westwards. It crossed the Ganjam coast early on the morning of the 20th, and drifted westwards into the interior. It gave heavy rain to the west coast of the Bay, and moderate rain to Orissa, Chutia Nagpur and the southern districts of South Behar, which were affected indirectly in exactly the same manner, but to a very much less extent, as they were by the first depression. A small depression, subsidiary to this, formed in the north-east of the Bay on the 19th in the rear of the second depression, and advanced to the north-east into East Bengal, to the southern districts of which it gave moderately strong winds and fairly general rain on the 20th, 21st and 22nd. During this period the continuation of the dry land winds from Northern India over Behar and Bengal was suspended, and replaced by variable local breezes or by sea winds. A rapid increase of temperature hence immediately followed, which will be discussed in fuller detail under the heading temperature.

The disappearance of the subsidiary depression in East Bengal was, however, not followed by an immediate return to the normal conditions. From some cause or other the westerly winds over the upper Gangetic plain were suspended. Hence light local winds continued in Behar and Bengal. The excessive temperature of the previous week, which had produced no effect upon the horizontal air motion, caused unusually large and rapid vertical motion. This was shown by large rapid oscillations of the barometer, and a slight influx of sea winds. Hence the atmosphere was slightly disturbed, frequent thunder-showers occurred in the coast districts of Bengal and Orissa, and an unusually high temperature prevailed over the whole of the interior, more especially in Behar, where no rain fell during this period. These slightly abnormal conditions of the weather lasted until the end of the month, when they began to pass away, to be replaced by the normal cold-weather conditions of Northern India.

Barometer.—The movements of the barometer have been indicated in the previous statement. Pressure was considerably above the average at the commencement of the month. From the 1st to the 9th the fluctuations were small and chiefly confined to a slight fall in Orissa, Chutia Nagpur, and Behar. The barometer began to rise on the 10th. This rise continued until the 15th, when pressure was from ·02″ to ·04″ above the normal. It then fell steadily from the 16th to the 19th, when it was on the average ·12″ below the normal pressure of the day.

Pressure began to increase after the disappearance of the second depression of the month, when the advance of the subsidiary depression into East Bengal caused a very rapid fall of the barometer in that area (averaging ·1″) and a smaller fall over the remainder of the province. Pressure increased rapidly (·09″ to ·12″) on the 23rd, with the disappearance of the subsidiary depression. This was followed by a brisk irregular fall (averaging ·17″) on the 24th and 25th, and by a more rapid increase on the 26th and 27th (averaging ·19″). A more moderate, but equally irregular, fall occurred on the 28th and 29th, which averaged ·08″ throughout the province. This was followed by a larger rise on the 30th and 31st, when pressure was slightly above the normal of the day. The mean pressure of the month varied very slightly from the normal. It was ·01″ in defect in

Orissa and the adjacent districts of South-West Bengal, and ·02″ (probably) in South Behar, whilst it was practically identical with the normal mean in North Behar, East Bengal, and Chutia Nagpur. These variations from the mean hence represent approximately the effect of the two depressions of the month.

Temperature.—The variations of temperature from the mean were not large during the first fortnight of the month, and were mainly dependent upon the distribution of rainfall. During the first week temperature was below the normal, except in East and North Bengal. The variations were small, except in Behar and Chutia Nagpur. The heavy rainfall in that area reduced the temperature 3° below the mean in South Behar and 2° in North Behar and Chutia Nagpur The termination of the rains in Behar on the 10th was marked by a considerable increase of temperature, and more especially of the day temperature, due to the clearing of the skies. The excess for the second week of the month averaged 2½° in South-West Bengal, 1½° in East Bengal, and was 1° or less in the remaining divisions. During the remainder of the month temperature was excessive in consequence of the prevalence of the abnormal conditions already explained. In the maritime districts of Bengal and Orissa, the excess was shown almost equally in the night and day temperatures. In the interior of the province, and more especially in Behar, its effect was much more marked in the night than in the day temperatures. The following table gives data for ten representative stations in different parts of the province, in illustration of the above statement :—

The mean temperature of the month was above the normal by amounts ranging from 1·5° in Chutia Nagpur to 1·9° in South Behar and East Bengal. The average effect on the mean temperature was hence nearly the same throughout the province, although it was due to variations of opposite character in some respects in different parts of the province.

Rainfall.—The character of the rainfall has been briefly indicated in the previous remarks. From the 1st to the 9th general rain fell in Behar, Orissa, and Chutia Nagpur. Very heavy showers were received on the 3rd in the Chumparun, Mozufferpore and Sarun districts. Sinhar (in Mozufferpore) received 6·76 inches and Bettiah 5·11 inches on that day. Exceptionally heavy rain fell in the Gya, Shahabad and Monghyr districts of South Behar on the 5th and 6th. The most noteworthy rainfalls on the 5th were :—Shaikpura (in Monghyr) 5·07 inches, Shereghati 3·72 inches, and Aurungabad 3·78 inches ; and on the 6th Shereghati 7 inches, Bhabooah 5·54 inches, Dehree 5·5 inches, and Sasseram 5 inches. Local thunder-storms were of frequent occurrence at this time in Bengal, and gave light to moderate rain during this period. A few showers of little importance fell in Behar and Chutia Nagpur on the 10th and 11th.

The next rainfall of importance occurred in connection with the advance of the second depression (and its subsidiary depression). Rain fell in moderate amounts in Orissa on the 18th and 19th, and some light showers in the southern districts of South Behar on the 17th and 18th. Heavy showers fell in the Khoolna, Jessore, Chittagong, Backergunj and Noakholly districts on the 21st. The largest amounts reported were 5·3 inches at Cox's Bazar, 4·05 inches at Bauphal (in Backergunj) and 3·56 inches at Bhola (also in Backergunj). A few light showers were received in the northern districts of North Bengal on the 22nd. The slightly disturbed condition of the atmosphere during the last nine days of the month gave frequent thunder-showers in all parts of the province excepting North and South Behar (excluding the Sonthal Pergunnahs). The rainfall was generally not large in amount and was very irregularly distributed. The rainfall of the month was hence of a very exceptional character. Orissa, Behar and Chutia Nagpur received amounts considerably in excess of the normal, whilst in Bengal the rainfall was more or less in defect. Chutia Nagpur received 8·47 inches or more than three times its normal amount, South Behar 6·74 inches or more than twice its normal amount, North Behar 5·3 inches or 56 per cent. in excess, and Orissa 7·25 inches or 18 per cent. in excess. South-West Bengal obtained an average of 3·94 inches or 12 per cent. in defect, East Bengal 3·61 inches or 34 per cent. in defect, and North Bengal 2·74 inches or 46 per cent. in defect.

The total rainfall of the month exceeded 10 inches in six isolated districts, all of comparatively small extent, and represented by the stations of Banpur and of Cuttack in Orissa; by Chuprah and Arrah and by Sinhar in Mozufferpur; by Shereghati, Semtagurah and Hazaribagh in the Hazaribagh and Shahabad districts; and by Bhola, Sundip and Cox's Bazar in South East Bengal.

The rainfall varied between 5 and 10 inches over the whole of Orissa, Chutia Nagpur, South Behar, and the south-western districts of North Behar, and also over the greater part of the Jessore, Khoolna, and Chittagong districts, and the southern districts of Noakholly and Backergunj (with the exception of these areas already named, in which the rainfall exceeded 10 inches). The total rainfall varied between 2 and 5 inches over the remainder of the country, excepting the following districts, in which it was slightly less than two inches:— the northern portions of Mozufferpore, Durbhunga, Purneah, Dinagepore, the greater part of Julpigori and Rungpore, and portions of Bogra, Commillah and Mymensingh represented by the stations of Serajgunj, Kasba and Mymensingh, and in five small areas in East and South-West Bengal represented by the stations of Bishenpur, Hooghly, Mutlah, Burrisal and Dacca.

The rainfall of the month was in excess over the whole of Behar (with the exceptions of the northern portion of Purneah and Durbhunga),- Chutia Nagpur, Orissa (with the exception of a narrow tract along the sea-board), and over small portions of South-West and East Bengal (represented by the stations of Chittagong, Fenny, and Bhola in East Bengal), Bagirhat, Bongong, Busseerhat, and Jhenidah in South-West Bengal, and the greater part of the districts of Maldah and Beerbhoom. The excess was 5 inches and over in the greater part of the Shahabad, Sarun, Southern Gya, Monghyr, Palamow, Hazaribagh, Cuttack and Khoordah districts, and was absolutely greatest at the three stations of Chupra (9·3 inches) and at Arrah and Hazaribagh (8 5 inches).

The rainfall was in defect over the whole of North Bengal (excepting Maldah) and the greater part of East and South-West Bengal. Over three-fourths of this area the defect was very approximately two inches, and varied from 1·5 inches to 2 5 inches. In the sub-montane districts of North Bengal, and in the Mymensingh, Commillah and North Noakholly districts the defect ranged from three to six inches. The percentage variation of the rainfall for the past month in each of the meteorological divisions and in each district is shown in the two following tables, and does not require discussion.

The following table gives a comparison between the actual monthly and total rainfall up to the end of October, with the normal rainfall of the same period, in the same form that has been employed in previous monthly abstracts of the present year. The figures express as a percentage the ratio of the average rainfall of each of the meteorological districts to the normal average rainfall of the period in question. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the 31st of October:—

Average for province	44	13	216	35	134	92	116	110	153	144	116

The following table gives full data for the comparison of the actual and the normal rainfall of the month of October in all districts of the province. The figures are obtained by the methods explained in previous summaries. The first column gives the average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the actual rainfalls at the reporting stations in the district The third column expresses as a percentage the ratio of the actual district rainfall to the normal. The fourth column gives the same information as the third column in a slightly different form. It states by what percentage the actual rainfall varies in excess (+) or in defect (—) from the normal rainfall:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

Explanation.—summary. The normal means of air pressure and temperature are the arithmetical averages or means of the reading during the same period for the past 20 years. The *mean daily* of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers in the rainfall column are the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub divisional stations for the period in question during the past 20 years. The number of stations in the district reporting is ascertained by dividing the sum of the returns received by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

[ ] Mean of 6 days.

CALCUTTA, *the 16th November* 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 12TH OF NOVEMBER 1886.

THE weather in Bengal during the past week has been to some extent influenced by a cyclone which formed in the centre of the Bay, and advanced to the Madras coast. It was noted in last week's report that the weather in the Bay had been more or less unsettled and squally from the 3rd. So far as can be judged from the coast observations, the disturbance from the 3rd to the 6th was diffused and irregular in character. Moderately strong winds with occasional severe rain and wind squalls probably prevailed over the centre and south of the Bay, but there was no definite centre of convergence until the 6th, when the first signs of concentration were indicated in a somewhat doubtful manner.

The observations of the 7th showed clearly that it had developed into a cyclone of some intensity, which was probably marching westwards to the Coromandel coast. It increased considerably in intensity during the next 48 hours. The centre crossed the Coromandel coast a little to the north of Madras about 10 A. M. on Tuesday, the 10th. Its approach towards the Madras coast caused a fall of nearly half an inch in the barometer at that station. As invariably happens with large cyclonic depressions in the Bay, the outer limits of the disturbance extended to the coast districts of Bengal and to the whole of Orissa. The flow of dry, cool air from the North-Western Provinces across Behar and Chutia Nagpur into Bengal was suspended. Clear weather with light local breezes prevailed in Behar and the northern districts of Bengal. The winds in the outer portions of the eastern and northern quadrants of the disturbance brought up much cloud into South Bengal and Orissa. The north-easterly and easterly winds of this portion of the area of disturbance circulated slowly over the low and damp ground of the Sunderbunds and Southern Bengal, and hence were utterly different in character to the dry land winds which they had temporarily displaced. These humid winds gave light showers to the Pooree and Cuttack districts of Orissa on the 8th, 9th and 10th, and to the Chittagong district in East Bengal on the 8th, 10th and 11th. The influence of the disturbance was shown most strongly on the temperature. It caused a slight reduction of the day temperature, and a considerable rise in the night temperature in South Bengal and Orissa, over which there was a considerable development of cloud. In Behar and Chutia Nagpur the suspension of the dry, cool westerly winds was accompanied by an increase in both the day and night temperatures, of which the latter was somewhat the larger The cyclone passed rapidly across the Deccan and apparently broke up on the 10th, after which the meteorological conditions slowly settled down again into those characteristic of the cold weather.

The barometer was unusually steady during the week in Behar and North Bengal. In South Bengal and Orissa it fell on the 8th and 9th to a slight extent (the average fall being only ·03″). This was followed by a gradual increase of pressure on the 10th, 11th and 12th, varying in amount from ·08″ at Calcutta to ·15″ at Cuttack. As this large rise extended over the whole of the Bay, the baric differences between Behar and the south of the Bay were very small at the end of the week. The mean pressure of the week was ·05″ in defect in Orissa, ·025″ in defect in South-West Bengal, ·01″ in defect in East Bengal and Chutia Nagpur, and ·02″ in excess in Behar.

The general character of the temperature of the week has been already stated. The following table giving data for eight representative stations illustrates these remarks :—

The normal average rainfall of the week is a tenth of an inch in all the meteorological divisions except North Behar, where it is only ·03 inch, and Orissa, for which it is one-third of an inch. Light showers fell on the 8th, 9th and 10th in the Pooree and Cuttack districts, giving a total rainfall ranging from ·2 inch at Tajpore to 1·55 inches at Pooree. A few light showers were received in the Chittagong, Backergunj and Mymensingh districts of East Bengal. No rain fell in the remainder of the province.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 12th of November 1886:—

MEMORANDUM.

THE principal Municipalities in Bengal returned, during the week ending 23rd October 1886, the birth and death-rates of 26·3 and 39·9 per 1,000 of population, respectively, as opposed to very nearly the same proportions, viz. 25·9 and 40·2 per 1,000, respectively, in the preceding week ending 16th October.

2. Births and deaths were registered at the highest rates in the undermentioned Municipalities:—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Naraingunge	70·4	Gya	79·4
Comillah	65·5	Mozufferpore	73·0
Beauleah	47·3	Serampore	70·7

Monghyr	30 7	Burdwan	42·7
		Patna	42·5
		Midnapore	35·6
		Hughli	34·8
		Comillah	30·8

3. The subjoined table, taken from the general statement appended to this Memorandum, indicates that, as compared with the results of the preceding week, cholera and bowel-complaints exhibited enhancement of mortality, while the fatality of fever and the maladies grouped under the head of "other causes" diminished sensibly:—

	Ratio per *mille* during the weeks ending—	
	23rd Oct 1886.	16th Oct. 1886.
Cholera	10 4	8·6
Small-pox	...	·1
Fever	13·4	15·3
Bowel-complaints	6·0	5·0
Injury	·6	·4
Other causes	9 4	10·7

4. While no death was reported from small-pox, and the casualties from injury were nowhere great, the rest of the maladies enumerated above caused the greatest loss of life in the following Municipalities:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Mozufferpore ...	36·5	Purneah ..	34·6	Utterpara ...	37·8	Gya ..	23·9

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorised form of age classification.

N. St.L. Carter,
Traffic Manager.

Traffic Manager's Office, Jamalpur, *the 9th November* 1886.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during four weeks ended 25th September 1886.

INCREASES.

Coal and Coke.—There was an increase in the upward traffic, and a decrease in the down traffic, resulting in a net increase The improvement in the up traffic was due to demand from the foreign railways, and the decrease in down traffic was due to a sluggish market in Calcutta

Cotton.—The increase in this staple is attributable to a favourable market and good demand for export.

Rice (husked and unhusked).—There was a substantial increase in this staple, due to plentiful crops and favourable prices.

Iron.—This increase was chiefly in the despatches of first and second class iron from Howrah to Mirzapore, Cawnpore, Delhi and other stations up country

Ghee.—This increase is assignable to a brisk demand throughout Bengal, North-Western Provinces and Oudh, and the despatches were chiefly made from Etawah, Shikohabad, Hathras, Khurja, and Delhi.

Wheat.—An active market in Calcutta during the early part of the month and favourable prices resulted in the increase in this commodity.

DECREASES.

Piece-goods.—A lull in the demand from the chief up-country markets accounts for the decrease in this staple.

Gunny.—This decrease was due to absence of demand from the Punjab and Delhi consequent on limited despatches of wheat from those places.

Gram and pulses.—Large quantities of these staples were imported into Bengal last year from the North-Western Provinces; there has been no such demand this year, hence this decrease

Other rain and spring crops.—An absence of demand for these staples led to the decrease shown under this head.

Brass and copper.—Limited despatches to Mirzapore, Cawnpore and other stations manufacturing utensils, account for this falling off

Railway material, Foreign.—This decrease is attributable to completion of construction works on the several State railways.

Salt.—There was an increase in the weight carried, and a small decrease in the earnings, which was due to reduced competitive rates being quoted this year.

Seeds.—The advance in exchange and unfavourable sea freights interfered seriously with the export of linseed, hence the falling off in seeds

Sugar (refined and unrefined).—There was an increase in weight carried, but a decrease in earnings, which is attributable to the traffic being for shorter distances.

HIGH COURT NOTICE.

Circular Order issued by Authority of the High Court of Judicature at Fort William in Bengal.

CIVIL.

No. 12, *dated the* 22*nd September* 1886.

THE attention of the officers presiding in the Civil Courts of the Lower Provinces of Bengal and Assam is invited to the Revised Rules* made by the High Court for their guidance in the exercise of their duties under section 287 of the Code of Civil Procedure, in supersession of the Rules published at page 584 of the *Calcutta Gazette* of the 7th July 1880, and at page 344 of the *Assam Gazette* of the 10th July 1880. It will be observed that the Rules come into operation from 1st October 1886.

* Published at page 939 of the *Calcutta Gazette* of the 18th August, and at pages 741, 742 of the *Assam Gazette* of 4th September 1886

A copy of the Revised Rules is appended to this Circular Order for facility of reference. The form of Proclamation of Sale previously prescribed will continue in use.

Revised Rules under Section 287 *of the Civil Procedure Code.*

1. Every application under section 284 of the Code of Civil Procedure for the sale of immovable property under attachment other than a tenure or holding to be sold in execution of a decree for arrears due in respect thereof under the provisions of the Bengal Tenancy Act (VIII of 1885), shall be in writing, and shall be verified in the manner prescribed by the Code for the verification of Plaints by the holder of the decree in execution of which the property is to be sold, or by some other person (approved of by the Court) if the Court be satisfied that he is acquainted with the facts mentioned in it.

Section 65.

2. Every such application shall state everything known, or believed by the person verifying the same to exist, which relates to the nature or affects the value of the property to be sold, and shall further state that he is not possessed of any further information regarding them.

3. Every person applying under section 162 of the Bengal Tenancy Act (VIII of 1885) for the simultaneous attachment and sale of a tenure or a holding of a raiyat holding at fixed rates, or applying only for the sale of such tenure or holding already under attachment, shall, in such application, specify the registered and notified encumbrances subject to which the tenure or holding is to be sold. Such specification shall be verified in the manner prescribed by the Code of Civil Procedure of Plaints by the holder of the decree in execution of which the tenure or holding is to be sold, or by some other person (approved of by the Court) if the Court be satisfied that he is acquainted with the facts mentioned in it.

4. If, after the sale-proclamation has been published, any written communication regarding the property to be sold shall be received by the Court, which it considers material for purchasers to know, the Court shall cause the same to be read out when the property is put up for sale.

5. If the property to be sold is an estate or a share of an estate paying revenue to Government, and the revenue payable on account of such estate or share of an estate exceeds the sum of Rs. 500, the proclamation of sale shall be published in the local official Gazette.

The rule shall not interfere with the discretion of the Court under section 289 of the Procedure Code in directing, whenever it thinks fit, a similar publication of the intended sale of any other property or properties attached in execution of a decree.

6. Subject to the proviso in section 269 of the Code of Civil Procedure, sales of property in execution of decrees in the several Courts of each district (not being Courts of Small Causes), shall be held and commence at a certain day in each month, such day to be fixed by the District Judge or other principal Judge in the district, as regards his own Court and all other Courts sitting at the same place as his own; but as regards subordinate Courts sitting at other places within his district, he shall fix the day in consultation with the Judges of those Courts: Provided that, where two or more of such Courts are stationed in the same place, the District Judge may fix the time for sales in consultation with only one of them.

7. All property, except property of the nature specified in the proviso to section 269, Code of Civil Procedure, or in Rule 11, to be sold at each place of sale, shall be entered in lists for each place, the lists of movable and immovable properties being distinct. The lists shall be so prepared as to contain in regular order each item of property to be sold in execution of the decrees of each Court severally. Such lists shall be stuck up in the Courts where the sales are to be held—in the case of movables not less than 7 days, and in the case of immovables not less than 15 days, before the date fixed for the commencement of each set of sales.

8. At the stated hour upon each fixed date, the sales shall be commenced, and shall be carried on in the order stated in the lists above mentioned. No sale shall continue after sunset; but the sales shall be held from day to day, except when the Court is closed and until the lists are finished: Provided that this rule shall not interfere with the adjournment of any particular sale according to law.

9. The same days shall not ordinarily be fixed for the sale of movable and of immovable property.

10. Except as regards property of the kind mentioned in the next succeeding rule, sales in execution of decrees for all Courts sitting in Sudder stations shall be held in the Court of the District Judge or other chief Judicial Officer. If, in other places, there are two or more subordinate Courts, all the sales in that place shall be held in such one of the Courts as may be selected by the District Judge. Where there is only one Court, the sales shall be held in that Court: Provided that the Court executing a decree may, if it see fit, for reasons to be specified in writing, direct, in the interest of the parties, that the sale be held at any other time and place within its jurisdiction, and, when acting under this last-mentioned proviso, shall, except for good reason to the contrary, give the preference as regards choice of time and place to the wishes of the judgment-debtor.

11. All sales of live-stock, agricultural produce, articles of local manufacture, and of other things commonly sold at country markets, shall, unless the Court otherwise direct, be held at such market in the neighbourhood of the place where the goods were attached, as may appear likely to be for the greatest advantage of the debtor, regard being had to the prospect of good prices and to the saving of expense in conveyance and carriage.

CIVIL.

Rule No 13, *dated the 24th September* 1886.

(*d.*)—[Withdrawal of such attachment—Circular Order No. 3 of 8th February 1876.] Whenever the attachment of an estate or share in an estate is legally and formally withdrawn, such withdrawal shall in like manner be notified to the Collector.

After Clause (*d*), Rule 14, Chapter V, page 262, Civil Rules and Orders, insert the following:—

(*e*) Whenever any estate or share of an estate has been sold by any Civil Court in execution of a decree, such sale shall be notified by the Court to the Collector of the District in which such estate or share of an estate is situated, after the same shall have been confirmed under section 314 of the Code of Civil Procedure.

P. B. ROBERTS, C.E., *Executive Engineer, Nuddea Rivers Division.*

Berhampore, the 22nd November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage.	With postage.
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8

Notes on Forestry,

By C. F. AMERY,

Deputy Conservator, Forests, N.-W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. King, King & Co., Bombay, and of Messrs. Wyman & Co., Calcutta. Price Rs. 3-8, or including postage, Rs. 4. Or of the publishers, Messrs. Trübner & Co., Ludgate Hill, London. Price five shillings.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e.*, from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

RESOLUTION ON THE REPORT ON THE CALCUTTA MEDICAL INSTITUTIONS FOR THE YEAR 1885.

MUNICIPAL DEPARTMENT—MEDICAL.

Darjeeling, the 30th October 1886.

RESOLUTION.

READ—

The Report on the Calcutta Medical Institutions for the year 1885.

Read also—

The Report for the year 1884, and the Resolution recorded upon it.

1. As directed in Government order No. 608, dated the 8th February 1886, the Inspector-General of Civil Hospitals has incorporated the annual report on the voluntary lock-hospitals in this report.

2. Judged by the death returns, the public health of the town during the year was slightly better than in the previous year. The general death-rate was 29·3 per mille of the population of the town, against 30·5 in the previous year. The number of deaths from cholera was 1,603 against 2,272 in 1884, and was considerably less than the number registered in the past four years. On the other hand, there was a large increase in the number of deaths from diarrhœa and dysentery, the deaths having risen from 1,209 in 1884 to 1,655 in 1885. The mortality from fever slightly increased, while there was a large falling off in the number of deaths from small-pox. The mortality from "other causes" was also lower than in the previous year. The following

statement shows the number of cases of the principal diseases treated in the several hospitals in Calcutta during the year, and the number of cases which proved fatal:—

There was a considerable decrease in the numbers of both cholera and small-pox cases treated in the hospitals, the numbers under each of these heads being 627 and 83 against 1,023 and 275 respectively in the year 1884. In this respect the practice of the hospitals reflects the experience of the general population of the town. The hospital death-rate, however, under both heads was higher than that of the previous year, being 577 and 409 per mille against 523 and 312 per mille respectively. The number of diarrhœa and dysentery cases rose from 2,674 in 1884 to 3,367 in the year under review.

Compared with the statistics of the previous year. the total number of in-door patients treated shows an increase of 2,170. The increase was chiefly confined to fevers, bowel-complaints, and venereal disease. Diseases of an asthenic type prevailed largely throughout the year. This is illustrated in a marked manner in the Campbell Hospital return, which shows an accession of 1,086 patients who suffered from disorders generally associated with failure of vital power. With the exception of the Police Hospital, which partakes more of the character of a military hospital, and can in no way be ranked as a charity, all the Presidency hospitals received a larger number of in-patients than in the previous year. Towards the end of the year an unusual number of persons sought admission into the Campbell Hospital, necessitating the erection of a large temporary ward. It is stated that the increase of patients at this hospital was in the main due to distress in the flooded districts and its consequences, and if this is correct, the crowding should be temporary, and the necessity for the ward should shortly cease. This hospital still holds a number of persons suffering from blindness, and others who should be classed as incurables. The Superintendent should renew his efforts to transfer such persons to the charge of their friends and relative.

4. The number of in-patients treated in the voluntary lock-hospitals during 1885 was 414 against 333 in 1884, showing an increase of 81. The daily average number of patients treated was 90 against 61 in the previous year. This shows that each patient on the average continued in the hospital 79 days in 1885 and 68 days in 1884. Of the total number of in-door cases, 48 were Europeans and Eurasians and 366 natives. Ninety-three patients, viz., 48 Europeans and Eurasians and 45 natives, were treated in the Sealdah Lock-hospital, against 111, or 38 Europeans and 73 natives, in the previous year. Three hundred and twenty-one patients (natives) were treated in the Alipore lock-hospital, against 222 in 1884. The total number of admissions was 342, of which 100 were received on transfer from the Campbell Hospital. The corresponding numbers in 1884 were 279 and 75. There were 18 deaths among the native in-door patients, or a rate of 4·9 per cent. on total cases treated, against 21 and 6·3 per cent. in the preceding year. There were treated in the hospitals 1,889 out-door patients against 1,454 in 1884, the daily average number being 6·5 and 5·9 respectively. Of the total number of out-door cases, 39 were treated in the Sealdah Lock-hospitals, against 50 in 1884. Altogether 1,850 patients were treated in the Alipore Lock-hospitals, against 1,404 in the preceding year. Many cases of venereal disease are still treated at the other hospitals to the detriment of the patients of other classes for whom those institutions are chiefly intended. The Inspector-General will be requested to instruct the Principal of the Medical College and Superintendents of other hospitals to transfer as many patients as they can to the voluntary hospitals.

5. The results of the surgical operations in the Medical College Hospital were more satisfactory than those of the previous year. The number of

operations performed in the hospital was 394, of which 30 cases proved fatal, against 416 operations with 52 deaths in 1884. Ophthalmic operations are not included in these figures. There were three deaths from erysipelas during the year. The disease broke out in November, having been imported by the husband of a patient, and spread by infection. Six cases in all occurred, of which three were fatal. Prompt measures were taken to segregate the sufferers and to disinfect the wards in which the outbreak occurred, and to purify the bedding, instruments, and other appliances through which contagion might be communicated. Dr. Cowie considers that the history of this small outbreak shows that the spread of erysipelas, once the most dreaded and fatal of all forms of hospitalism, is now completely under control, while its specific action can readily be destroyed or rendered harmless by antiseptic surgery and effective sanitary measures. He has pointed out, however, that the College Hospital, unlike most modern hospitals which are built on some principle of segmentation, is *en bloc*, and that at present scarcely any means exist for segregating infectious cases. This matter has already received the attention of Government, and the Inspector-General has been asked to submit plans and estimates for a suitable ward for cases of this character.

6 In the Eden Hospital 1,575 women and children were treated against 1,390 in the previous year. Of these, 1,064 were Europeans and 511 natives. The deaths among the former amounted to 35, and among the latter 32. The number of confinement cases rose from 379 to 432, the mortality among this class of cases being 22 against 29 in 1884. The reduction in the death-rate is satisfactory, as many patients were admitted in a hopeless state. The Lieutenant-Governor is satisfied with the general working of the hospital. It is stated that a steam laundry is required, as the present arrangements are defective. An estimate has been called for; but the Lieutenant-Governor fears that with so many urgent calls upon the Provincial finances, it will be difficult to provide the necessary funds at present.

7. The total number of cases of enteric and remittent fever treated in all the hospitals during the year was 20 and 803 respectively, against 11 and 930, the corresponding figures of the previous year. Of the 20 cases of enteric (or typhoid) fever, 17 are shown as having been admitted into the Presidency General Hospital, 1 into the Medical College Hospital, and 2 into the Police Hospital. These figures are, however, said to be unreliable owing to the difficulty of distinguishing between enteric and remittent fever, which, as Dr. Cleghorn, the Officiating Surgeon Superintendent of the Presidency General Hospital, remarks, "is due to the imperfect knowledge which we at present possess of the fevers of this country, and to a general belief in the widespread influence and prevalence of malaria." In order to overcome this difficulty, the Inspector-General strongly urges upon all medical officers the importance of a *post-mortem* examination in every case of death from remittent or suspected typhoid fever.

8. The nursing arrangements at the General and Medical College Hospitals continue to be managed by the Calcutta Hospital Nurses' Institution, under the supervision of the ladies of the Clewer Sisterhood. Drs. Cowie, Coates, Harvey, and Cleghorn all speak in the highest terms of the efficiency of the work done; and the Lieutenant-Governor desires to add his testimony to the valuable services which the institution has rendered to the cause of medical charity in Calcutta.

9. The invested capital of the Calcutta Hospitals was increased during the year from Rs. 5,53,300 to Rs. 5,54,300. The whole of this increase appertains to the Howrah General Hospital. The total expenditure, excluding the amount invested, was Rs. 4,23,236, which exceeded the amount expended in 1884 by Rs. 9,921. The net cost to Government of all the hospitals, including the voluntary lock-hospitals, which are now entirely supported by Government, amounted to Rs. 2,71,349 against Rs. 2,70,400 in the previous year, inclusive of the cost of lock-hospitals, which was Rs. 16,185 in 1884. There was a total decrease of Rs. 16,057 in the Medical College, Police, and Presidency General Hospitals, and an increase of Rs. 17,006 in the Campbell, Howrah, and lock-hospitals, the total net increase being Rs. 949. Orders have separately been passed regarding the revision of the Government grants to the Mayo Hospital, which the Lieutenant Governor has decided to reduce to Rs. 34,000 from the ensuing year.

From—The Right Hon'ble the Secretary of State for India,
To—His Excellency the Right Hon'ble the Governor-General of India in Council.

I FORWARD herewith, for such action as may be necessary, 12 copies of an announcement which was published in the *London Gazette* of the 3rd instant, relative to Certificates of Origin for British goods exported to Spain.

Foreign Office,
September 3rd, 1886.

MEMORANDUM.

CERTIFICATES OF ORIGIN FOR BRITISH GOODS EXPORTED TO SPAIN.

HER MAJESTY'S Minister at Madrid has reported that, under the existing Spanish Customs Regulations, Certificates of Origin are required. A simple declaration of the shipper of goods, to the effect that they are of British origin, will, however, be deemed sufficient at the Spanish Custom-houses. This declaration is to be made before the Chief Officer of Customs at the port of shipment, and shippers are recommended to make it on the specification of goods in the following form, viz.—

I_____ do hereby declare that the goods mentioned herein are of British produce or manufacture.

_____, *Exporter.*

Signed and declared in my
presence this_____day
of_____188

_____
Chief Officer of Customs,
*Port of*_____

This officer will sign the document on the form prescribed by the Commissioners of Her Majesty's Customs. The Certificate of Origin must then be vised by the Spanish Consul at the port of shipment, whose *visa* will be given free of charge.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical averages or means of the readings during the same period for the past ten years. The *humidity* of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number in the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub divisional stations for the period in question during the past ten years. stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

[Mean of 5 days.]

The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.

ing could amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head "District observations of rainfall" the normal means

e. The means of the district are the numerical averages of the rainfall return received in the district, i.e., from the total rainfall at the sub-division

Calcutta, *the 23rd November* 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 19TH OF NOVEMBER 1886.

THE meteorology of the past week was of the simplest character and calls for very brief notice. Fine weather, with light north-east monsoon winds, prevailed in the Bay until nearly the end of the week, when a disturbance began to form in the same part of the Bay as that which initiated the cyclone that passed over Madras on the 10th. The baric gradients over the Bay were slightly smaller than they usually are in November.

The weather was hence fine during the whole week in Bengal: winds were lighter than the normal, and the westerly element was unusually weak. Temperature was hence somewhat higher than the normal, and the air in Behar slightly damper. Light local showers fell in the Julpaigori, Cooch Behar, and Darjeeling districts on the 13th, 14th, and 15th, due to some very slight local disturbance, probably originating over the higher hills to the north of Darjeeling. No rain fell in any other part of the province with the exception of the Pooree district, where one or two very light showers of no importance fell on the 13th.

The barometer rose on the 13th slightly, and then fell generally until the 17th or 18th, when it began to rise again. The oscillations of the barometer during fine weather in November are generally of longish period, lasting from five or six to nine or ten days, the extent of the oscillation rarely exceeding one-tenth of an inch. They are a phenomenon of the same order as the daily oscillation or the diurnal barometric tides (as they are usually termed), but are less regular and steady in character. The mean pressure of the week was ·03″ in defect in Orissa, South-West Bengal, and East Bengal; 0·45″ in defect in Chutia Nagpur and South and Central Behar, and normal in North Behar.

Temperature decreased slowly, but fairly steadily, during the week. The mean temperature of the week was from 1° to 2° above the normal mean over the greater part of the province, including Orissa, South-West Bengal, Chutia Nagpur, and South Behar. It was either normal or slightly in defect in North Behar and East Bengal, and probably over all those districts lying near the hills of Northern and Eastern Bengal. The following table gives the chief facts in the variation of the temperature of the week at eight representative stations:—

	Normal mean maximum temperature, November 13th to 19th.	Actual mean maximum temperature, November 13th to 19th, 1886.	Variation of actual from normal.	Normal mean minimum temperature, November 13th to 19th.	Actual mean minimum temperature, November 13th to 19th, 1886.	Variation of actual from normal. The normal rainfall of the week is practically nil. Light showers, more or less local in character, were received in the Julpaigori, Cooch Behar and Darjeeling districts on the 13th, 14th and 15th. The Julpaigori and Cooch Behar districts received an average of very nearly one-tenth of an inch, and the Darjeeling district an average of one-third of an inch.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

THE annexed table, exhibiting the mortuary statistics of the districts in Bengal for the month of September 1886, discloses the following results :—

1. That the deaths of 119,371 persons were registered among a population of 66,163,884, or at the rate of 21·60 per 1,000 per annum, against 20·64 per 1,000 in the preceding month, and 26·40 per 1,000 in the corresponding month of the preceding year, indicating, as compared with the latter period, a great retrogression in the registration of deaths.

2. That the highest casualty-rates were returned from the following districts :—

Districts.	Ratio per *mille.*	*Districts.*	Ratio per *mille.*
Shahabad	60·00	Patna	31·20
Gya	42·60	Rungpore	29·04
Monghyr	33·96	Jalpaiguri	27·48
Bhagulpore	33·96	Sarun	27·24
Darjiling	31·56	Bogra	27·00

3. That the mortality from the specific heads of disease stands as follows :—

	Ratio per *mille* during—	
	September 1886.	September 1885.
Cholera	·72	3·48
Small-pox	·01	·02
Fever	16·20	18·00
Bowel-complaints	·72	1·08
Injury	·72	·72
Other causes	3·00	3·00

The noticeable facts indicated by the above figures are that, excepting injury and the maladies classed under the head of "Other causes," the death-rates from all diseases, notably from cholera and fever, were considerably lower in September 1886 than during the corresponding month of the preceding year.

4. That cholera and fever caused the greatest loss of life in the following districts, while the rest of the diseases did not display noticeable severity anywhere, excepting in Sarun, where 10·32 per 1,000 of the population died from "other causes" :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*
Gya	6·00	Shahabad	49·08
Shahabad	4·56	Gya	29·64
Patna	2·40	Monghyr	27·12

		Rungpore	25·08
		Julpaiguri	24·84
		Bogra	23·64
		Darjiling	23·04
		Dinajpur	22·08

5. That under the heads of *Sex*, *Class* and *Age*, the mortality of the month was distributed as follows :—

Office of Sanitary Commissioner for Bengal,
The 22nd November 1886.

R. LIDDERDALE, M.D.,
Deputy Surgeon-General, Sanitary Commissioner for Bengal.

MEMORANDUM.

THE birth and death returns of the principal Municipalities in Bengal exhibit the following results for the week ending 30th October 1886 :—

1. That births were registered at the rate of 23·2 per 1,000 of population and deaths at 42·3 per 1,000, as opposed to 26·3 and 39·9 per 1,000, respectively, during the preceding week ending 23rd October, indicating a retrogression in the registration of births, but a fair advance in that of deaths

2. That the following Municipalities returned the highest proportions of births and deaths :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille*
Serampore	47·1	Puri	98·6
Naraingunge	41·4	Gya	79 9

		Bali	52·6
		Monghyr	51·5
		Patna	48·4
		Hughli	41·6
		Beauleah	39·4
		Utterpara	37·8

3. That in comparison with the results of the preceding week, there was a considerable increase of mortality from fever, but no noticeable differences in the casualty-rates from the rest of the diseases—*vide* figures given below :—

	Ratio per *mille* during the weeks ending—	
	30th Oct 1886.	23rd Oct. 1886.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the native remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorised form of age classification.

NOTIFICATION.

The 30th November 1886.—The following draft of revised rules for the grant of leases of lands for tea cultivation in Julpigoree and Darjeeling, and of arable lands in the former district, are published for general information; and it is hereby notified that the draft will be taken into consideration by the Government of Bengal on the 15th January 1887. Any remarks and criticisms which may be made by any person with respect to the draft should be submitted to the Secretary to the Government of Bengal in the Revenue Department before the date specified above.

P. NOLAN,
Offg. Secretary to the Govt. of Bengal.

Rules for the grant of leases of waste lands for tea cultivation in the districts of Julpigoree and Darjeeling.

THE following rules for the grant of leases for tea cultivation in the districts of Julpigoree and Darjeeling supersede all those previously passed:—

1. The lands that are generally available under these rules in the district of Julpigoree are the unsettled lands, excepting reserved forests, which lie within that tract of country, bounded on the north by Darjeeling and Bhootan, west by the Teesta river, south by the State of Cooch Behar, east by the Sunkos river. Any lots of waste land belonging to Government, lying in any other parts of the district of Julpigoree, and which are not reserved for other purposes, may also be made available for tea cultivation under these rules.

The lands that are generally available in the Darjeeling district lie in the Kalimpong or Daling sub-division of the district, east of the Teesta. They are in two blocks, bounded as follows:—

I.—*North.*—The Labah forest block.
South.—The Lehti, Noam, Pugo, and Mal forest blocks.
West.—The Jeet Chu.
East.—The Nim Chu to its junction with the Chu Chu, then the Chu Chu to a point about 4 miles below Ambiokh, then a line northwards up to the Ambiokh forest block, and thence southward the boundary of the Dalingkote forest block and the Goorobathan khas mehal: area about 19·95 square miles.

II.—*North.*—The Mo forest block.
West.—The East Nar block.
South and South-west.—The Mochu, up its junction with the Khoomanee.
East.—The Khoomanee and Rongo forest block: area about 8·50 square miles.

2. The following lands will not ordinarily be available under these rules:—

(*a*).—Lands which, by a notification in the *Calcutta Gazette*, are held to constitute a reserve for the supply of timber, fuel, grazing, or any other article of general and public consumption.

(*b*).—Lands not included in the above category, but which now bear India-rubber trees or other valuable timber (such as sâl, khair, chelownee, sissoo, &c.) in considerable quantities and in compact blocks or patches.

(*c*).—Lands in respect of which any person or persons, or any village community, possess rights of occupancy, or such other rights or privileges as

render it impolitic or unadvisable to grant such lands to any other person or persons for the purpose of tea cultivation.

(*d*).—Lands lying within a distance of 60 feet on either side from the centre of any public road or thoroughfare: provided that such road or thoroughfare shall have been constructed, or shall be kept in repair, from public funds.

(*e*).—Lands which the Local Government may at any time, by a notification in the *Calcutta Gazette*, expressly exempt from the operation of these rules.

3. Every person, company, or association or promoter of a company or association, desirous of obtaining a grant of land under these rules, must in person, or by a duly authorized agent, present an application on stamped paper of the value of 8 annas to the Deputy Commissioner of the district in which the land lies

4. The application must specify—

(*a*).—The name or names and address or addresses of the applicant or applicants, and of his or their authorized agent, if any.

(*b*).—The area, situation, and boundaries of the land applied for, as far as they can be ascertained without a detailed survey

(*c*).—The particulars, if any, which may appear to the applicant to bring any part of the land applied for within the exceptions mentioned in Rule 2 The application must also state whether the land, or any part of it, is, or has ever been, cultivated in any manner.

As settled in 1883.

5 Every lot applied for must be compact and capable of being enclosed in a ring fence; and if any part of the land touches on a public road or navigable river, the length of such road or river frontage must not exceed one-half the breadth of the lot applied for.

6. Not more than 800 acres will ordinarily be granted to any one applicant, company, or association; and when more than 800 acres are applied for, the applicant must set forth specially the grounds for such application, and give *primâ facie* guarantees that he possesses the requisite capital for working such larger area.

The Deputy Commissioner may, when he has reason to believe it to be necessary, demand such a guarantee when the area applied for does not exceed 800 acres.

As proposed in 1886.

5. Every lot applied for must be compact and capable for being enclosed in a ring-fence; and if any part of the land touches on a public road or navigable river, the length of such road or river frontage must not exceed one-half the breadth of the lot applied for

The exact boundaries will be settled by the Deputy Commissioner, who will decide the point on a consideration of what is best in the public interests.

6. Not more than 800 acres will ordinarily be granted to any one applicant, company, or association; and when more than 800 acres are applied for, the applicant must set forth specially the grounds for such application, and give *prima facie* guarantees that he possesses the requisite capital for working such larger area.

The Deputy Commissioner may, when he has reason to believe it to be necessary, demand such a guarantee when the area applied for does not exceed 800 acres.

If, upon proceeding to survey and map out the grant, the Deputy Commissioner finds that it is desirable in the public interests, or for the sake of good boundaries, to include a larger area than 800 acres within the area to be granted on the application, it shall be in his discretion, with the sanction of the Commissioner, to grant to one applicant so much land, not exceeding 1,000 acres, as may be necessary to obtain good boundaries and to avoid waste, &c.

7. All applications for more than 800 acres will be forwarded by the Deputy Commissioner to the Commissioner, who, if he desires to recommend compliance therewith, will forward them to the Board of Revenue, who will take the orders of Government upon each case.

8. The holder of a grant of 800 acres shall not be debarred from applying for a second grant if he has complied with the clearance and other conditions of the preliminary lease in respect of the first grant. Tea lease-holders may obtain arable grants contiguous to their tea lots.

9. On receipt of an application for any area not exceeding 800 acres, the Deputy Commissioner must satisfy himself, as far as lies in his power, that the requirements of the rules have been complied with. If he considers that the application should be rejected, he will record an order to that effect, giving his reasons for such rejection. An appeal will lie from such order of rejection to the Commissioner of the division, if preferred within 30 days from the date of the order. If the Deputy Commissioner considers that an application for such area as it is within his power to grant should be entertained, or in the case of application for areas over 1,000 acres, when the orders of Government accepting the application are received, the applicant or his agent will be required to deposit the estimated cost of the enquiry referred to in the next rule, and the cost of survey and demarcation to be made as hereinafter provided. The amount to be so deposited must be calculated at one rupee per acre of the total area applied for. If the area is found to be greater, the sum of one rupee per acre must be paid on account of such excess area before a preliminary lease is granted.

Payments under this rule do not cover the cost of erecting permanent boundary marks under Rule 24

In the event of the applicant withdrawing his application before any enquiry has been made under Rule 10, or in the event of its being found that the land has been previously applied for, the applicant shall be entitled to a refund of the survey fee paid by him.

If the cost of survey is not paid within one month of demand, the application may be struck off

10. On receipt of the sum payable under the preceding rule, and of an agreement signed by the applicant, or by his authorized agent, to pay such further sum as may be required for the purposes above mentioned, the Deputy Commissioner will record an order appointing a tehsildar or other officer to visit the land, and to make full and detailed enquiries into its condition and circumstances

11. The general object of such enquiry shall be to ascertain whether or not the land applied for can be granted under the rules in force; but the Deputy Commissioner may instruct the officer making the enquiry to furnish him with such other specific and detailed information as may seem to him to be necessary.

12. On completion of this enquiry, the officer making it will record the result thereof, and submit a report for the orders of the Deputy Commissioner. If the Deputy Commissioner, after considering the report, and after calling for such further explanations, oral or written, as he may deem necessary, shall be of opinion that the land applied for cannot be granted under the rules,

and should not therefore be surveyed, he will record an order to that effect. An appeal will lie from such order to the Commissioner of the division if preferred within 30 days from the date of the order

13. If the Deputy Commissioner decides that the land applied for can be granted under the rules, and should therefore be surveyed, he will record an order to that effect.

14. The Deputy Commissioner shall at once send a copy of any order passed under Rule 13 to the Conservator of Forests, in order that an estimate may be made by the Forest Department of the value of any forest trees standing on the land. The Conservator of Forests will depute an officer to examine the land, and make a detailed report suggesting the average rate per acre at which payment should be made for such trees. Such officer, in valuing the timber, shall have regard to its present market value on the spot, and to the local circumstances of the case, the accessibility of the grant, and the prospect of markets for timber becoming available during the currency of the lease. The Conservator will carefully examine the report, and forward it to the Deputy Commissioner with such remarks and alterations as he may think necessary. If the Deputy Commissioner, on receipt of the Conservator's decision, sees reason to object to the proposed rate per acre, he may refer the matter to the Commissioner, who shall take the orders of the Board of Revenue and of Government on any point on which he and the Conservator may eventually differ.

15. If the Deputy Commissioner finds the land, or any part of it, in the occupation of any person or persons or of any village community, he will submit a full report of the circumstances for the orders of the Commissioner, stating in detail how he proposes to deal with such prior occupants; and if it is proposed to remove them, the compensation, if any, which the applicant undertakes to pay to such persons. If the Deputy Commissioner declines to propose the removal of such occupants, an appeal shall lie to the Commissioner within thirty days after the record of an order by the Deputy Commissioner declining to propose the removal. The Commissioner will report his orders in all such cases for the information of the Board of Revenue.

16. If any claim or objection be preferred under Act XXIII of 1863, the Deputy Commissioner will proceed to dispose of the same in accordance with the provisions of that Act.

17. The officer who made the enquiry provided for by Rules 10 to 12 will, on receipt of an order to that effect from the Deputy Commissioner, proceed to point out to the surveyor the boundaries of the land applied for, and such prominent features in it as may be useful for the purposes of the survey, and which should, in his opinion, be entered in the preliminary lease as hereinafter provided. The boundaries and other features above mentioned should be clearly marked and defined by the officer in presence of the surveyor, and the latter should be furnished with a list of them signed by the said officer.

As settled in 1883.

18. The surveyor will then proceed to make the survey and put up such temporary boundary marks as are necessary for that purpose. He must prepare a map showing—

(*a*).—All natural features of the country lying within the boundaries as fixed by the officer who made the enquiry under Rules 10 to 12, *e.g.*, bheels, streams, forest clumps, &c.

(*b*).—Such features of the country lying outside the boundary of the land to be surveyed as may serve to identify the latter and connect it with the revenue survey or other existing map.

The surveyor is bound to bring to the notice of the Deputy Commissioner any fact which may come to his knowledge in the course of the survey, rendering it advisable that the land he is surveying should not be granted under these rules.

As proposed in 1886.

18. The surveyor will then proceed to make the survey and put up such temporary boundary marks as are necessary for that purpose. He must prepare a map showing—

(*a*).—All natural features of the country lying within the boundaries as fixed by the officer who made the enquiry under Rules 10 to 12, *e.g.*, bheels, streams, forest clumps, &c.

(*b*).—Such features of the country lying outside the boundary of the land to be surveyed as may serve to identify the latter and connect it with the revenue survey or other existing map.

(*c*).—The total area within the boundaries after deductions of areas for roads or other Government reserves, jotes, &c., and the net area of the grant.

(*d*).—Points at which permanent or other marks should be erected by the lessee.

The surveyor is bound to bring to the notice of the Deputy Commissioner any fact which may come to his knowledge in the course of the survey, rendering it advisable that the land he is surveying should not be granted under these rules. He is particularly bound to bring to notice any need for public roads across the lands he surveys, and if the Deputy Commissioner concurs with the surveyor in this matter, the road or roads should be marked off on the ground and on the map, and the area to be occupied thereby should be deducted from the rent-paying area of the grant.

19. The map should ordinarily be on a scale of 16 inches to the mile. If possible, the surveyor's field book should be copied at the back of it If not, a copy of the field-book should be attached to or accompany the map. If the map be made originally in the vernacular, the Deputy Commissioner will cause it to be translated into English.

20. On the map being completed, it must be checked by an officer appointed by the Deputy Commissioner. If found to be incorrect, it will be amended by the surveyor in conjunction with the officer above mentioned. If found to be correct, it will be laid before the Deputy Commissioner with the report of the officer who made the preliminary enquiry under Rules 10 to 12, and with all other papers connected with the case.

21. The Deputy Commissioner will then proceed to consider the application. A date for this purpose must be previously fixed by him, and due notice of it given to the applicant or to his authorized agent.

22. The Deputy Commissioner shall have power to reject an application at any stage of the proceedings under the rules, if he sees reason to do so, refunding in such case to the applicant the deposit made by him on account of survey, minus such an amount as it may seem to the Deputy Commissioner fair to retain in consideration of the expenses incurred. If, however, the application is rejected for a reason which could not reasonably be anticipated under these rules, no portion of the deposit money shall be retained. He is authorized to reject an application when he does not consider that there is a *bonâ fide* intention on the part of the applicant to cultivate in

tea the land applied for, or when it appears desirable to reserve the land for cultivation other than tea, or to preserve any forest standing on it. An appeal against every such order of rejection shall lie to the Commissioner of the division, if preferred within thirty days of the date of the order.

As settled in 1883.

23. If the Deputy Commissioner grant the application, he will without delay grant the applicant a lease in form G of the appendix, and call upon him to execute a counterpart thereof, w ich must be registered, and to pay for forest trees the sum assessed under Rule 14. Payment for these may be made by instalments with the sanction of the Board of Revenue, which will only be given when the Board is fully satisfied of the good faith and solvency of the applicant. In such case the dates and amounts of the instalments shall be endorsed upon the lease, and the lessee must covenant that, in the event of his throwing up his lease, all outstanding instalments shall be forthwith recoverable from him under the Public Demands Recovery Act, 1880, whether the timber on the grant has been cut by him or not; but he shall have no further right to fell or remove timber from the grant. When granting the lease, the Deputy Commissioner will also direct the lessee to mark out the land leased by a continuous trench, or in such other manner as the Deputy Commissioner may direct. Within three months of the grant of such lease the lessee must, on pain of forfeiture of all rights in the land leased, mark out the land as above directed, and must further erect, at his own expense, such permanent boundary* marks as the Deputy Commissioner may direct. On the expiry of the three months, the surveyor must test the correctness of the boundary line and permanent marks, and report the result to the Deputy Commissioner, at the same time pointing out to the lessee or his representative by written notice any corrections that may be required. If the corrections indicated are not made by the lessee or his representative within thirty days of the receipt of such notice, all rights in the land shall be liable to forfeiture to Government.

* These boundary marks shall ordinarily consist of a masonry platform at every point where more than two lots or patches of waste or other lands meet, with large stones or mounds at every angle and at every 100 yards of boundary line between such platforms and other marks.

24. Whenever, after receipt of an application, as provided for in Rule 3, and after making such enquiries as he may deem necessary, the Deputy Commissioner shall be of opinion that there is no *primâ facie* objection whatever to the grant under the rules of the land applied for, he may put the

As proposed in 1886.

23. If the Deputy Commissioner grant the application, he will without delay grant the applicant a lease in form G of the appendix, and call upon him to execute a counterpart thereof, which must be registered, and to pay for forest trees the sum assessed under Rule 14. Payment for these may be made by instalments with the sanction of the Board of Revenue, which will only be given when the Board is fully satisfied of the good faith and solvency of the applicant. In such case the dates and amounts of the instalments shall be endorsed upon the lease, and the lessee must covenant that, in the event of his throwing up his lease, all outstanding instalments shall be forthwith recoverable from him under the Public Demands Recovery Act, 1880, whether the timber on the grant has been cut by him or not; but he shall have no further right to fell or remove timber from the grant.

24. When granting the lease the Deputy Commissioner shall also direct the lessee to mark out the land leased, within three months of the granting of the lease, by a continuous trench, or by clearing the jungle for a breadth of at least twelve feet along the boundaries, or in such other manner as the Deputy Commissioner may direct, and by erecting boundary marks at the points indicated on the map.

These boundary marks may be of masonry, or of stone, or hollow iron telegraph posts filled with clay or shingle, as the Deputy Commissioner may direct; and he will decide on their shape and dimensions.

25. On the expiry of the three months, the surveyor shall test the correctness of the boundary lines and ascertain if the boundary marks have been erected and in their proper places, and report the result to the Deputy Commissioner, at the same time pointing out to the lessee or his representative, by written notice, any mistakes or omissions that may be found If the mistakes or omissions are not rectified or supplied by the lessee or his representative within thirty days of the receipt of such notice, the lessee or his representative shall be liable to a fine, not exceeding Rs. 50 per day, from the date of the expiry of such notice till the requirements of the notice have been complied with. If at the expiration of thirty more days the mistakes and omissions are not rectified, the lessee's rights in the land will be liable to forfeiture.

26. Fines, cost of notices served, of clearing boundaries, of erecting or repairing boundary marks, or any other money that may become due from lessees to Government, shall be deemed to be a demand under the Bengal Council Act VII of 1880, or any other law that may be in force at the time, and shall be recoverable as such

27. Whenever, after receipt of an application, as provided for in Rule 3, and after making such enquiries as he may deem necessary, the Deputy Commissioner shall be of opinion that there is no *primâ facie* objection whatever to the grant under the rules of the land applied for, he may put the

applicant in preliminary and provisional possession of an area not exceeding one-eighth of the estimated area of the land applied for, with the object of enabling the applicant to make preparations for commencing cultivation and getting the land in order: provided that the applicant, before obtaining such preliminary possession, shall have erected such boundary marks as the Deputy Commissioner may direct, and that the amount of all estimated charges incurred in connection with such preliminary occupation shall have been deposited by the applicant: provided further that the applicant shall engage in writing to pay the cost of any trees felled, at such rate as may be determined by the Forest Department after inspection of the land under Rule 14.

25. The order for, and conditions of, such preliminary occupation shall be in the form H in the appendix, and shall be addressed to the tehsildar or other officer appointed by the Deputy Commissioner. A copy of the order shall be delivered to the applicant, who shall, after receipt of occupation, acknowledge such receipt by signing a copy of the order and depositing it with the Deputy Commissioner.

26 If after the survey an applicant shall fail to comply with any request of the Deputy Commissioner made in accordance with the rules, or fail to deposit any sums of money for which the applicant is liable under them, within two months, the application may be struck off

27. Grantees are not permitted to club or amalgamate their grants otherwise than by transfers duly registered, as provided for in the preliminary lease. Any unauthorized amalgamation will subject the holders of the grants in question to forfeiture of all rights in the lands so amalgamated.

28. In the event of the amalgamation of two separate grants held by two different lessees for the purpose of forming an association, the fee of two annas per acre, prescribed under the conditions of the lease for registry of the transfer, shall be levied on the aggregate area of both grants.

As proposed in 1886.

applicant in preliminary and provisional possession of an area not exceeding one-eighth of the estimated area of the land applied for, with the object of enabling the applicant to make preparations for commencing cultivation and getting the land in order: provided that the applicant, before obtaining such preliminary possession, shall have cleared the boundaries, and erected such temporary boundary marks round the whole of the area applied for as the Deputy Commissioner may direct, and that the amount of all estimated charges incurred in connection with such preliminary occupation shall have been deposited by the applicant: provided further that the applicant shall engage in writing to pay the cost of any trees felled, at such rate as may be determined by the Forest Department after inspection of the land under Rule 14; and provided further that the applicant shall take on himself all risk of loss occasioned by other claims being preferred to the land, or by his application being eventually rejected, or from any other cause whatsoever.

28 The order for, and conditions of, such preliminary occupation shall be in the form H in the appendix, and shall be addressed to the tehsildar or other officer appointed by the Deputy Commissioner. A copy of the order shall be delivered to the applicant at the time of giving preliminary possession by the officer who gives it, the officer signing and dating it then and there. The original order addressed to the tehsildar or other officer shall be signed by the applicant on the date he receives it in acknowledgment thereof, and the tehsildar or other officer shall forward such original order, with his report written on the back of it, to the Deputy Commissioner, for record in his office.

29. If any transfer of an application for land is desired before the grant of the preliminary lease, and if such a transfer is allowed,* it must be registered within twenty-one days of the issue of the order allowing the transfer, and a registration fee of two annas an acre must be paid.

30. If after the survey an applicant shall fail to comply with any request of the Deputy Commissioner made in accordance with the rules, or fail to deposit any sums of money for which the applicant is liable under them, within two months, the application may be struck off.

31. Grantees are not permitted to club or amalgamate their grants otherwise than by sanctioned transfers duly registered, as provided for in the preliminary lease Any unauthorized amalgamation will subject the holders of the grants in question to forfeiture of all rights in the lands so amalgamated.

32. In the event of the amalgamation of two separate grants held by two different lessees for the purpose of forming an association, or for any other purpose, the fee of two annas per acre, prescribed under the conditions of the lease for registry of the transfer, shall be levied on the aggregate area of both grants.

33 The lessee shall maintain the boundaries of the grant clear of jungle, and all the boundary marks in good repair Where roads kept clear of jungle) or streams do not form the boundaries, the lessee shall clear the boundaries of jungle at least once a year not later than the end of February in each year.

* No transfer will be allowed, for instance, when the proposed transferee already holds a Tea Lease Grant, 15 per cent of the area of which does not yet contain growing tea-plants.

As settled in 1883.

29. The Deputy Commissioner should annually, or as often as possible, himself inspect, or cause to be inspected, the boundary lines and permanent marks referred to in Rule 23, and should he find any out of order, shall by letter instruct the lessee or his representative to place the same in order, and failing his doing so within thirty days of the receipt of the said letter, shall cause the same to be put in order, and shall recover from the lessee or his representative the cost of doing so, if need be, under the Public Demands Recovery Act.

FORM OF PRELIMINARY LEASES FOR TEA CULTIVATION TO CAPITALISTS IN THE DISTRICTS OF JULPIGOREE AND DARJEELING.

If the lessee is found by survey or otherwise to be in possession of land in excess of the acreage herein declared, he shall pay rent for such excess land within or without the boundaries above described from the date of occupation at the rates entered in clause 3.

In case of dispute the date of occupation will be settled by the Deputy Commissioner, subject to an appeal, to be preferred within thirty days, to the Commissioner.

As proposed in 1886.

34. The Deputy Commissioner should annually, or as often as possible, himself inspect, or cause to be inspected, the boundary lines and permanent marks referred to in Rule 24, and should he find any out of order, shall by letter instruct the lessee or his representative to place the same in order, and failing his doing so within thirty days of the receipt of the said letter, shall cause the same to be put in order, and shall recover from the lessee or his representative the cost of doing so, if need be, under the Public Demands Recovery Act.

35. If the lessee is at any time found, by survey or otherwise, to be in possession of land in excess of the acreage for which he has paid rent, he shall pay rent at the rates payable by him for the grant itself for such excess land, whether it be within or without the boundaries described in the lease or map, from one year after the date he received possession (preliminary or otherwise) of the grant, or any portion of it, unless it is established to the satisfaction of the Deputy Commissioner that no possession of the excess land was taken until after the grant of the renewed lease, in which case rent shall be payable from the date of the expiration of the preliminary lease. Provided that such unauthorized occupation of excess land, and payment of rent for it, shall give the trespasser no right to continued occupation, and the Deputy Commissioner shall be entitled, if he thinks fit to do so, to recover possession of the excess lands.

FORM OF PRELIMINARY LEASES FOR TEA CULTIVATION TO CAPITALISTS IN THE DISTRICTS OF JULPIGOREE AND DARJEELING.

Form of Preliminary Lease of land in granted by the Deputy Commissioner of to (name) of (address).

1. The lands covered by this lease are situated within the boundaries shown by the red lines in map No. , dated , and attached to the lease. The lands may be described as being bounded as follows:—

North.—

East.—

South.—

West.—

Their area is more or less acres, and they are situated in the pergunnahs and tehsils detailed in the margin.

As settled in 1883.

2 The rights conveyed by this lease are heritable and also transferable: provided (*a*) that the entire grant, and not a portion of it, be transferred; (*b*) that the clearance conditions are duly observed by the transferror and transferree respectively; (*c*) that the transfer is registered in the Deputy Commissioner's office within twenty-one days of the date thereof; and (*d*) that a registration fee of *two* annas per acre be paid to the Deputy Commissioner on the occasion of every such transfer. If any transfer of the rights conveyed by this lease is made otherwise than in accordance with the foregoing provisions, all rights in the land leased shall be liable to be forfeited to Government. After the expiry of this preliminary lease, no right shall be claimed otherwise than as expressly provided for hereinafter.*

As proposed in 1886.

2. The rights conveyed by this lease are heritable and also transferable: provided (*a*) that the entire grant, and not a portion of it, be transferred; (*b*) that the clearance conditions are duly observed by the trasferrer and transferree respectively; (*c*) that the transfer is registered in the Deputy Commissioner's office within twenty-one days of the date thereof, or within three months if the deed be executed out of India; and (*d*) that a registration fee of *two* annas per acre be paid to the Deputy Commissioner on the occasion of every such transfer. If any transfer of the rights conveyed by this lease is made otherwise than in accordance with the foregoing provisions and the rules,† all rights in the land leased shall be liable to be forfeited to Government. If any transfer not registered within the prescribed time is allowed by the Deputy Commissioner, a fine for the delay in registration, not exceeding one anna for every acre for every month of such delay, or any lesser sum, shall be payable* by the transferree at the discretion of the Deputy Commissioner.

After the expiry of this preliminary lease, no right shall be claimed otherwise than as expressly provided for hereinafter.

3. The rent to be paid shall be as follows:—

Year of entry (*i.e.*, from actual date of entry to 31st March following)	...	*Nil.*
1*st* full year (from 1st April following date of entry)	...	*Nil.*
2*nd* year	...	3 annas per acre.
3*rd* „	...	6 „ „
4*th* „	...	9 „ „
5*th* „	...	12 „ „

In Julpigoree.

The rent shall be paid to the tehsildar of or other officer appointed by Government in the following instalments:—

1st September	...	One-half.
1st March	...	„

In Darjeeling.

The rent shall be paid to the Deputy Commissioner in the following instalments:—

On or before 28th June	...	One-half.
„ „ 12th January	...	„

4. The lessee shall either himself reside on or near to the lands covered by this lease, or he shall appoint a manager or agent who shall reside on or near to such lands, and who shall be provided with a full legal power to act on behalf of the principal in all matters arising out of or concerning the lands covered by the lease.

5 The lessee binds himself to conform to all the provisions of the rules for the grant of tea leases under which this lease is granted.

* NOTE.—A shareholder in a registered Joint-Stock Company may transfer his shares, or any part of them, without registering the transfer or paying any fee under this rule. A partner in any other form of company or association may transfer his interest, or any part of it, but in that case the transfer must be registered under this rule, and a fee paid which shall bear to the maximum fee payable on transfer of the entire grant the ratio that the interest transferred bears to the sum of all the interests of the partners in the grant.

† For instance, a transfer to the holder of a tea lease for another grant of 500 acres, fifteen per cent of which is not under tea plants, would be a violation of Rules 7 and 8.

6. Five per cent. of the area of the land leased shall be cleared by the end of the second year after the grant of this lease, and 10 per cent. by the end of the third year

7. Any land covered by the lease which may at any time be required for a public purpose may be taken up by Government free of cost on a reduction being made in the rent payable under the lease, proportionate to the area taken by Government for the class of land taken. But the value of any improvements or property thereon shall be paid to the lessee, and shall be assessed under the provision of the law in force for the time being for the acquisition of land for public purposes.

8. All rights to minerals or quarries of all kinds are reserved to Government, together with such rights of way and other reasonable facilities as may be requisite for working, getting, and carrying away such minerals.

9. No right of fishery, and no right to dam up or otherwise obstruct the passage of any stream, is given by this lease. A public right of way over twenty yards on either bank of every stream, however much the bank may shift by action of the stream or otherwise, available at any time of the year for local boat traffic, is reserved.

Public access shall be allowed at all times to any springs of water on the lands leased, whenever such access is, in the opinion of the Deputy Commissioner, necessary for the convenient supply of good water to persons residing in the vicinity; and the lessee is bound not to injure the springs, or allow others to do so.

10. Standing timber must be paid for at the average rate per acre intimated to the lessees by the Deputy Commissioner before possession is given under this lease, unless, with the sanction of the Board of Revenue, payment by instalments has been allowed. In the latter case, payment must be made according to the schedule of instalments endorsed upon the lease. In the event of the lessee throwing up the lease while any instalments due to Government on account of timber are unpaid, the lessee hereby agrees that all such instalments shall forthwith become due and be recoverable from him under the Public Demands Recovery Act, 1880, whether all the timber on the grant has been cut by him or not. But he shall have no right of any kind over any timber on the grant; cut or uncut, after the date of his so throwing up the lease.

11 Whenever on an inspection being made the boundary lines and marks referred to in Rule 23 are found to be out of order, the lessee shall be bound to put them in order at his own expense on receipt of a requisition to that effect from the Deputy Commissioner. Should the lessee fail to do so within thirty days from the receipt of the requisition, the Deputy Commissioner shall cause it to be done, and if the lessee fails to pay, the Deputy Commissioner shall be entitled to recover from the lessee, under the Public Demands Recovery Act, all costs incurred in doing so.

12 The lessee shall be bound to furnish the Deputy Commissioner with information as to the births and deaths of residents in his tea garden, and as to progress and outturn thereof, in such form as may be approved by Government.

13 After the expiration of the second, third, and fifth year of the lease, the Deputy Commis-

sioner, or any officer appointed by him, shall enter on, inspect, and measure the areas cleared and under cultivation, and the lessee may at any time demand that such inspection and measurement be made. The expenses of any such inspections and measurements as are made before the due date on demand of the lessee (but of no others) shall be paid by the lessee as rent due. The Deputy Commissioner may at other times enter on, inspect, and measure the area under cultivation. If on any inspection being made during the first five years of this lease, or if on the first inspection being made after the five years, it is found that 15 per cent. of the total area held under the lease has been brought under cultivation by means of good husbandry, and actually bears tea plants, the lessee shall be entitled to the renewal of the lease for a further period of thirty years, and to renewals for similar periods in perpetuity, subject to *the rules and* the terms and conditions of renewed leases.

14. If, by the end of the fifth year after the grant of this preliminary lease, less than 15 per cent. of the total area held under it has been brought under cultivation by means of good husbandry, and less than 15 per cent. actually bears tea plants, the land may be resumed, or on the application in writing of the lessee, he may be allowed to hold on from year to year as a tenant-at-will for three more years, if he agrees in writing to pay rent at double the rates for which he would have been liable if he had complied with the condition about bringing 15 per cent. under tea cultivation. On the application of the lessee an inspection and measurement shall be made as soon as convenient after the expiration of any one of the three years, and the Deputy Commissioner may make such inspection and measurement of his own accord after the expiration of the third year. If after any such inspection and measurement it is found that 15 per cent. of the area bears tea plants, a renewed lease shall be granted on the terms that would have been in force if the condition had been complied with by the end of the fifth year. At the expiration of the three years all rights in the lands leased will lapse to Government, if 15 per cent. of the area does not then bear tea plants. The cost of all inspections and measurements made during the three years' grace shall be paid by the lessee.

15. All expenses connected with inspections and measurements, for which the lessee is liable under these rules, shall be recoverable under the Public Demands Recovery Act.

16. The rights and privileges conveyed by this lease, and by any renewed lease granted in accordance with its provisions, shall be liable to be forfeited on failure of the lessee to comply with any condition thereof.

TEA LEASE RULES.

TERMS AND CONDITIONS OF RENEWED LEASES.

1. Subject to any general or special orders of Government, the rent to be paid on the renewal of the lease for a term of thirty years shall be fixed by the Board of Revenue on the report of the Deputy Commissioner on each occasion of

renewal, but shall not exceed the rate* of rent per acre paid in the neighbourhood at the time of renewal for the highest class of lands under ordinary cultivation.

Provided that in no case shall the total rent payable under the renewed lease be less than twelve annas an acre on the entire area of the land leased.

If at any future time the administration of the tracts under tea cultivation should entail on the State any considerable increase of expenditure, it will be competent to the Government, with the sanction of the legislature, to impose such special taxation as may be deemed necessary, either by raising the rent or in some other mode. But under no other circumstances will the rent, which has been fixed for a term of years on the principle above enunciated, be raised during the currency of such term.

Lands actually planted with tea in the Dooars will for the present be assessed at the rate fixed for roopit land in the pergunnah wherein they lie. Waste lands will be assessed at six annas an acre in all pergunnahs, and the rest of the lands in each grant will pay the pergunnah rate of bastoo, bamboo, roopit, and faringhatta according to the area of the land answering to each of these descriptions that may be found in the grant.

In the case of the tract of Daling transferred to the Julpigoree district by Government notification, dated 9th January 1882, the rates to be imposed will, for the present, be those paid for similar lands in the adjoining pergunnah of the Dooars, on the principle just stated, waste lands paying six annas an acre.

The rate to be charged for the present in the case of lands in the Darjeeling hills is a single uniform rate of one rupee an acre for all the lands in the grant.

2. Where half the area of the grant has not been brought under cultivation during the term of the preliminary lease, as required by that lease, the renewed lease shall ordinarily include an area of waste land equal to the extent of land brought under cultivation during the currency of the preliminary lease. It will be in the discretion of the Deputy Commissioner, subject to the supervision of the Commissioner, to grant or refuse renewal of the lease in such cases, and also to include, if necessary, a larger area of waste, so as to make the grant under the renewed lease equal to the whole area granted under the preliminary lease. In the exercise of this discretion, the Deputy Commissioner should be guided by the consideration whether the excess waste is likely to be separately taken up by other applicants or

* The rates per acre paid at present in the Western Dooars of Julpigoree are as follows:—

DESCRIPTION OF SOIL.	In Ambaree, Fallacottah, Chengmaree, Morughat, and North Mynaguree.	In Lukheepore and West Madaree.	In East Madaree and Chukwakatee.
	Rs. A. P.	Rs. A. P.	Rs. A. P.

Waste	0 3 0	0 3 0	0 3 0

not. If it is likely to be so taken up, he should settle it separately; if it is likely to remain on the hands of Government, he should include it in the new lease.

3. When extra waste land is included in the lease under these orders, such portion of it as ought to have been brought under cultivation during the preliminary lease will be assessed at the rate prescribed for cultivated land, and not at the rate of waste land.

4. The title conveyed by the renewed lease shall be heritable and transferable, provided that the prior sanction of the Commissioner of the division be procured to the transfer of any portion of the grant less than the whole, and that no transfer shall be valid as against the Government, but shall, on the contrary, be equivalent to a surrender of the lease, unless notification of the transfer shall have been given by the transferree to the Deputy Commissioner within twenty-one days of the date thereof, or within three months if the deed be executed out of India, together with a registration fee of two annas per acre of the area leased.

5. In other respects the condition of the renewed lease will be the same as those of clauses 4, 5, 7, 8, 9, 11, 12, and 16 of the preliminary lease.

RULES FOR THE GRANT OF ORDINARY LEASES OF ARABLE LAND IN THE WESTERN DOOARS.

PART I.

What lands will ordinarily be available.

1. The lands that will be generally available under these rules lie within that tract of country in the Western Dooars which extends in an easterly direction from the east bank of the river Teesta to the west bank of the river Sankos.

What lands will not ordinarily be available.

2. The following lands will not ordinarily be available under these rules:—

(*a*). Lands which by a notification in the *Calcutta Gazette* are held to constitute a reserve for the supply of timber, fuel, grazing, or any other article of general and public consumption.

(*b*). Lands not included in the above category, but which now bear India-rubber trees or other valuable timber (such as sâl, khair, chelownee, sissoo, &c.), *in considerable quantities* in compact blocks or patches.

(*c*). Lands in respect of which any person or persons or any village community possess rights of occupancy, or such other rights or privileges as would, in the opinion of the Local Government, render it impolitic or unadvisable to grant such lands to any other person or persons.

(*d*). Lands lying within a distance of 60 feet on either side from the centre of any public road or thoroughfare, provided that such road or thoroughfare shall have been constructed or shall be kept in repair from public funds.

(*e*). Lands which the Local Government may at any time, by a notification in the *Calcutta Gazette*, expressly exempt from the operation of these rules.

How and to whom application is to be made.

3. Every person desirous of obtaining a grant of land under these rules shall, in person, present an application on stamped paper of the value of eight annas to the tehsildar of the tehsil in which the land lies.

What the application is to specify.

4. The application shall specify—

(*a*) The name, father's name, and address of the applicant.

(*b*) The area, situation, and boundaries of the land applied for, as far as they can be ascertained without a detailed survey.

(*c*) A statement of the particulars, if any, which may appear to the applicant to bring the land applied for, or any part of it, within the

exceptions mentioned in rule 2. The application shall also state whether the land or any part of it is, or has ever been, cultivated in any manner.

5. Every lot applied for shall be compact and capable of being enclosed in a ring-fence; and if any part of the land touches on a public road or navigable river, the length of such road or river frontage shall not exceed one-half the breadth of the lot applied for.

6. *No application in respect of an area greater than* 200 *acres or less than* 10 *acres, and not more than this quantity of land, shall be granted under these rules to any one lessee. The Deputy Commissioner may, with the sanction of the Commissioner, grant a larger area than* 200 *acres except in cases coming under clause* 13 *of the Preliminary Lease. In every case it shall be the duty of the tehsildar to satisfy himself that the applicant is possessed of sufficient means to cultivate the area applied for. Should the tehsildar be of opinion that a smaller area than that applied for should be granted, he will refer the point to the Deputy Commissioner for final orders.*

6. *No application for an area exceeding* 200 *acres or less than* 10 *acres shall be registered, nor shall a larger area than* 200 *acres be granted to any one lessee without the previous sanction of the Commissioner. In every case it shall be the duty of the tehsildar to satisfy himself that the applicant is possessed of sufficient means to cultivate the area applied for. Should the tehsildar be of opinion that a smaller area than that applied for should be granted, he will refer the point to the Deputy Commissioner for final orders.*

7. The tehsildar shall require the applicant to pay in a sum of three annas an acre on the area applied for to cover cost of survey and enquiry. No further sum shall be required *except the actual cost of the work described in Rule* 9, and no refund will be made.

8. The tehsildar shall then in person, or by an ameen, inspect the land and ascertain whether it is khas land and available under the above rules; and if it appear to be so, the ameen shall proceed to lay down the boundary and make a survey as follows.

9. The ameen shall fix the boundary, in accordance with the Rules 5 and 6, as indicated by the applicant, and shall then clear it from end to end, and afterwards survey it with compass and chain, placing mounds of earth or stone not less than waist-high at every angle and at every point where more than two lots or patches of waste or other properties meet. One mound shall be not less than six feet high, and shall be marked on the map as the base mark; two bearings of which, or bearing and distance of which from good points of reference, shall be recorded on the map.

10. The ameen shall prepare a map which shall show—

(*a*) All natural features of the country lying within or on the boundaries fixed, such as streams, or the edge of forests, and also public pathways.

(*b*) Such features of the country lying outside the boundary as may serve to identify the land and connect it with the revenue survey or with any other map made of other lands in the neighbourhood.

11. The map shall *ordinarily* be on the scale of 16 inches to the mile. If possible, the field-book shall be copied on the back of it If not, a copy of the field-book shall be attached to or accompany the map. In submitting his report, the ameen shall state whether he had a clear line for his compass from end to end of the boundary, and whether the mounds are erected as ordered.

12. The tehsildar shall then report the case to the Deputy Commissioner or Sub-Divisional Officer according to the tehsil in which the land lies, stating whether he is satisfied that the ameen's work has been properly done, and giving any further information which may be required.

13. The Deputy Commissioner or Sub-Divisional Officer aforesaid shall consider the report, and finally pass orders granting or refusing a lease.

14. The order on the case and on any objection decided on by the Deputy Commissioner or Sub-Divisional Officer shall be appealable to the Commissioner within one month.

15. On receipt of an order to grant a lease, the tehsildar shall deliver to the applicant a preliminary lease in the form annexed, signed by the Deputy Commissioner or Sub-Divisional Officer as aforesaid, together with a copy of the map, and shall place him in possession by planting a bamboo or in any other way locally acknowledged, and shall report delivery and registration of the tenant in a separate register of preliminary leaseholders.

16. The Deputy Commissioner may in special cases of leases of 200 acres or less, and in all cases of leases of greater area, alter the terms of the lease so as to allow a lessee to manage his land by an authorised agent. In such case the agent must reside on or near to the land, and be provided with full legal power to act on behalf of the principal in all matters arising out of the land.

16. The Deputy Commissioner may, in special cases of leases of 200 acres or less, and in all cases of greater area, alter the terms of the lease so as to allow a lessee to manage his land by an authorised agent. In such case the agent must reside on or near to the land, and be provided with full legal power to act on behalf of the principal in all matters arising out of the land.

17. If the lessee is at any time found by survey or otherwise to be in possession of land in excess of the acreage for which he has paid rent, he shall pay rent at the rates payable by him for the grant itself for such excess land, whether it be within or without the boundaries described in the lease or map, from one year after the date he received possession (preliminary or otherwise) of the grant, or any portion of it, unless it is established to the satisfaction of the Deputy Commissioner that no possession of the excess land was taken until after the grant of the renewed lease, in which case rent shall be payable from the date of the expiration of the preliminary lease. Provided that such unauthorised occupation of excess land and payment of rent for it shall give the trespasser no right to continued occupation, and the Deputy Commissioner shall be entitled, if he thinks fit to do so, to recover possession of the excess land.

18. If any transfer of an application for land is desired before the grant of the preliminary lease, and if such a transfer is allowed,* it must be registered within twenty-one days of the issue of the order allowing the transfer, and a registration fee of two annas an acre must be paid.

Draft form of preliminary lease of arable land in the Western Dooars.

1. A preliminary lease for five entire years of land in , granted by the of to of

Their area is more or less acres, and they are situated in pergunnah talook , in the tehsil of in the Western Dooars.

* No transfer will be allowed, for instance, when the proposed transferee already holds an arable lease grant, half of the area of which does not yet contain growing tea plants.

If the lessee is found by survey or otherwise to be in possession of land in excess of the acreage herein declared, he shall pay rent for such excess land within or without the boundaries above described from the date of occupation at the rates entered in clause 2. In case of dispute the date of occupation will be settled by the Deputy Commissioner, subject to an appeal, to be preferred within 30 days, to the Commissioner.

2. The rights conveyed by this lease are heritable *also transferable*, and provided (*a*) *that the entire grant and not a portion of it be transferred;* (*b*) *that the clearance conditions are duly observed by the transferor and transferee respectively;* (*c*) *that the transfer is registered in the Deputy Commissioner's Office within 21 days of the date thereof; and* (*d*) *that a registration fee of two annas per acre be paid to the Deputy Commissioner on the occasion of every such transfer. If any transfer of the rights conveyed by this lease is made otherwise than in accordance with the foregoing provisions, all rights in the land leased shall be liable to be forfeited to Government. After the expiry of this preliminary lease no right shall be claimed otherwise than as expressly provided for hereinafter.*

2. The rights conveyed by this lease are heritable and *also transferable*, provided (*a*) *that the entire grant and not a portion of it be transferred;* (*b*) *that the clearance conditions are duly observed by the transferor and transferee respectively;* (*c*) *that the transfer is registered in the Deputy Commissioner's Office within 21 days of the date thereof, or within three months of the final execution if the deed of transfer take place out of India; and* (*d*) *that a registration fee of two annas per acre be paid to the Deputy Commissioner on the occasion of every such transfer. If any transfer of the rights conveyed by this lease is made otherwise than in accordance with the foregoing provisions and the rules, all rights in the land leased shall be liable to be forfeited to Government.* If any transfer not registered within the prescribed time is allowed by the Deputy Commissioner, a fine for the delay in registration, not exceeding one anna for every acre for every month of such delay, or any lesser sum, shall be payable by the transferee at the discretion of the Deputy Commissioner. After the expiry of this preliminary lease, no right shall be claimed otherwise than as expressly provided for hereinafter.

The rent to be paid shall be as follows:—

Year of entry (*i.e.*, from actual date of entry to 31st March following)	*Nil.*

3rd and 4th years	... 6 „
5th year ...	.. 8 „

The rent shall bepaid to the tehsildar of in the following instalments:—

The rent shall be paid to the tehsildar of in the following instalments:—

3. The lessee shall himself reside on or near the lands covered by the lease. He shall keep all boundary lines or marks in good order and repair and clear off jungle, and shall, within one year from the date of this preliminary lease, make such continuous boundary mark as he shall be required to do by a written order. If he fail to do so, the Deputy Commissioner or Sub-Divisional Officer may cause the boundary to be made, and recover the cost thereof as an arrear of rent, or he may call on the lessee to make it within a specified time on pain of forfeiture of the lease.

3 The lessee shall himself reside on or near the lands covered by the lease. He shall keep all boundary lines or marks in good order and repair and clear off jungle, *to the satisfaction of the Deputy Commissioner*, and shall, within one year from the date of this preliminary lease, make such continuous boundary mark as he shall be required to do by a written order. If he fail to do so, the Deputy Commissioner or Sub-Divisional Officer may cause the boundary to be made, and recover the cost thereof as an arrear of rent, or he may call on the lessee to make it within a specified time on pain of forfeiture of the lease.

4. Any land covered by the lease which may at any time be required for a public purpose may be taken up by Government free of cost on a reduction being made in the rent payable under the lease proportionate to the area taken by Government. But the value of any improvements or property thereon shall be paid to the lessee, and shall be assessed under the provision of the law in force for the time being for the acquisition of land for public purposes.

5 All rights to minerals or quarries of all kinds are reserved to Government, together with such rights of way and other reasonable facilities as may be requisite for working, getting, and carrying away such minerals.

6. No right of fishery and no right to dam up or otherwise obstruct the passage of any stream is given by this lease. A public right-of-way over twenty yards on either bank of every stream, available at any time of the year for local boat traffic, is reserved. *Public access shall be allowed at all times to any springs of water on the lands leased.*

6. No right of fishery and no right to dam up or otherwise obstruct the passage of any streams is given by this lease. A public right-of-way over twenty yards on either bank of every stream, available at any time of the year for local boat traffic is reserved. *Public access shall be allowed at all times to any springs of water on the lands leased, whenever such access is, in the opinion of the tehsildar or the Deputy Commissioner, necessary for the convenient supply of good water to person residing in the vicinity.*

7. All sissoo, sâl, and chelownee trees of a girth of over three feet at a distance of three feet from the ground, and all such khair trees as may be fit to cut are to be paid for by the lessee at the rates at which they may be valued by the Forest Department. All other trees may be disposed of by the lessee. The four kinds of trees above specified shall be counted and paid for previous to possession being given.

8. The Deputy Commissioner may at any time, and shall *as soon as possible after the expiration of the lease*, enter on, inspect, or measure the area under cultivation, and the lessee may at any time demand that such measurement be made. Provided that the expenses of any such inspection or measurement demanded by the lessee shall be paid by him as rent due. If after such inspection by any officer deputed for the purpose it shall appear that one-half of the total area held under the lease is occupied by homesteads or is cultivated, or left fallow, according to good husbandry or otherwise fairly turned to account for agricultural purposes, the lessee shall be entitled to renewal of this lease for such further period as shall coincide with the termination of the settlement period then current, and thereafter to renewal for the period of each fresh settlement of the taluk, subject always to the following conditions:—

8. The Deputy Commissioner may at any time, and shall *as soon as possible after the expiration of the lease*, enter on, inspect, or measure the area under cultivation, and the lessee may at any time demand that such measurement be made. Provided that the *cost* of any such inspection or measurement *as may be made before the expiration of the lease on demand of* the lessee shall be paid by him as rent due. If after such inspection by any officer deputed for the purpose it shall appear that one-half of the total area held under the lease is occupied by homesteads or is cultivated, or left fallow, according to good husbandry or otherwise fairly turned to account for agricultural purposes, the lessee shall be entitled to renewal of this lease for such further period as shall coincide with the termination of the settlement period then current, and thereafter to renewal for the period of each fresh settlement of the taluk, subject always to the following conditions:—

(*a*) The rent to be paid shall be fixed by the Deputy Commissioner on the order of Government on each occasion of renewal, *but without the special order of Government shall not exceed double the rent previously paid.*

(*b*) The title conveyed by the renewed lease shall be heritable and transferable, provided that no transfer shall be made of less than the whole, and that no transfer shall be valid as against the Government, but shall, on the contrary, be equivalent to a surrender of the lease, unless notification of the transfer shall have been given by the transferee to the Deputy Commissioner at the time of transfer together with a fee of two annas per acre of the area leased.

(*c*) In all other respects the conditions of the renewed lease shall be the same as those of the preliminary lease

(*d*) *Should the cultivated, fallow, and other land otherwise fairly turned to account be found on inspection and measurement to be less than one-half of the total area held under the lease, the whole or such portion of the said area as the Deputy Commissioner may decide, shall be liable to be resumed.*

(*c*) *Should the cultivated, fallow, and other land otherwise fairly turned to account be found on inspection and measurement to be less than one-half of the total area held under the lease, the whole of the waste land, or such portion of it as the Deputy Commissioner may decide not exceeding half of the entire acreage of the jote, shall be liable to be resumed.*

If the Deputy Commissioner grants under such circumstances a renewed lease to include an area of waste land in excess of the area brought under cultivation during the currency of the preliminary lease, then such excess area of waste lands will be assessed at the rates prescribed for cultivated lands.

9. The rights and privileges conveyed by this lease, and by any renewed lease granted in accordance with its provisions, shall be liable to be forfeited on failure of the lessee to comply with any condition thereof.

10. If before the expiration of this preliminary lease, no application for a renewal of the lease shall have been made in accordance with the above provisions, the lessee may be allowed to hold as a tenant-at-will, but not otherwise, until other arrangements may have been made by the Deputy Commissioner.

11. The lessee may sublet any part of the land covered by this lease on such terms as he pleases, provided that he gives the same promise of renewal of the tenure to his sub-tenant on condition of bringing his land into cultivation as is given to himself by this lease. The rent to be paid on renewal shall be determined on the application of either party by the Deputy Commissioner, who has the power to fix equitable rates of rent as he has, under sections 76 to 79 of Act X of 1859, to fix terms of pottah.

12. No sub-tenant under the lessee shall sublet any part of his land on pain of forfeiture of his tenure; but this rule and the last shall not be held to prevent the employment of adhairs, projahs, and other labourers supplied with seed and paid by giving them half the crop. The Government reserve power to make rules to be observed by the lessee and his tenants for the purpose of carrying out the provisions of this and the last preceding clause, and the lessee agrees to abide by such rules when published for general observance, and to hold the land subject to such rules.

13. *Tea may not be cultivated on the area covered by this lease if that area exceeds* 200 *acres.*

14. *No clubbing or amalgamation of grants is allowed, and all land bearing tea will be forfeited to Government if more than one grant becomes the property of the same owner.*

11. The lessee may sublet any part of the land covered by this lease on such terms as he pleases, provided that he gives the same promise of renewal of the tenure to his sub-tenant on condition of bringing his land into cultivation as is given to himself by this lease. The rent to be paid on renewal shall *not be more than* 50 *per cent. in excess of the rent paid by the lessee to Government for the area leased.*

12. No sub-tenant under the lessee shall sublet any part of his land on pain of forfeiture of his tenure; but this rule and the last shall not be held to prevent the employment of adhairs, projahs, and other labourers supplied with seed and paid by giving them half the crop. *If a sub-tenant under the lessee sublets any of his land, no suit or proceeding for the recovery of rent in money or kind on his part shall lie in any court.* The Government reserve power to make rules to be observed by the lessee and his tenants for the purpose of carrying out the provisions of this and the last preceding clause; and the lessee agrees to abide by such rules when published for general observance, and to hold the land subject to such rules *on pain of forfeiture.*

14. *No clubbing or amalgamation of grant is allowed, and all land bearing tea will be forfeited to Government if more than one grant becomes the property of the same owner, except by inheritance.*

Terms and conditions of renewed leases of arable lands.

PART II.

1. Subject to any general or special orders of Government, the rent to be paid on the renewal of the lease shall be fixed by the Board of Revenue on the report of the Deputy Commissioner and Commissioner on each occasion of renewal, but shall not exceed the rates of rent per acre paid in the neighbourhood at the time* of renewal for the different classes of lands included in the lease.

* The rates per acre paid at present in the Western Dooars of ulpigoree are as follows:—

DESCRIPTION OF SOIL.	In Ambaree, Fallacottah, Chengmaree, Moraghat, and North Mynagoree.	In Lukheepore and West Madaree.	In East Madaree and Chukwakatee.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
Bastoo and bamboo .	2 0 0	1 12 0	1 8 0
Roopit	1 8 0	1 4 0	1 8 0
Farmghatta	1 2 0	0 12 0	0 9 0
Waste	0 3 0	0 3 0	0 3 0

2. The term of every renewed lease shall coincide with the unexpired period of the then current settlement in the pergunnah in which the lands are situated.

3. The title conveyed by the renewed lease shall be heritable and transferable, provided that the whole, and not a part, of the grant be transferred, and that no transfer shall be valid as against the Government, but shall, on the contrary, be equivalent to a surrender of the lease, unless notification of the transfer shall have been given and the transfer registered in the Deputy Commissioner's office within twenty-one days of the transfer, or within three months, if the deed of transfer be executed out of India; and that a registration fee of two annas per acre on the area transferred be paid to the Deputy Commissioner on the occasion of every such transfer.

4. Where half the area of the grant has not been brought under cultivation during the term of the preliminary lease, as required by that lease, the renewed lease shall ordinarily include an area of waste land equal to the extent of land brought under cultivation during the currency of the preliminary lease. It will be in the discretion of the Deputy Commissioner, subject to the supervision of the Commissioner, to grant or refuse renewal of the lease in such cases, and also to include, if necessary, a larger area of waste, so as to make the grant under the renewed lease equal to the whole area granted under the preliminary lease. In the exercise of this discretion, the Deputy Commissioner should be guided by the consideration whether the excess waste is likely to be separately taken up by other applicants or not. If it is likely to be so taken up, he should settle it separately; if it is likely to remain on the hands of Government, he should include it in the new lease.

5. When extra waste land is included in the lease under these orders, such portion of it as ought to have been brought under cultivation during the preliminary lease will be assessed at the rate prescribed for cultivated land, and not at the rate of waste land. Unless this condition is insisted upon, it is probable that lessees will neglect cultivation during the term of the preliminary lease, in the hope of getting a renewal of their tenure at lower rates.

6. The Deputy Commissioner may, in special cases of leases of 200 acres or less, and in all cases of leases of greater area, alter the terms of the lease so as to allow a lessee to manage his land by an authorised agent. In such cases the agent must reside on or near to the land, and be provided with full legal power to act on behalf of the principal in all matters arising out of the land.

7. In other respects the conditions of the renewed lease will be the same as those of clauses 3, 4, 5, 6, 9, 10, 11, 12, 13, and 14 of the preliminary lease.

Form of Renewed Lease of arable waste lands in the district of Jalpaiguri granted to of

1. The lands covered by this lease, the term of which is years, viz., from 18 to , coinciding with the period remaining of the current settlement in the pergunnah in which the lands lie, are situated within the boundaries shewn by

the red lines in map No. , dated attached to this lease, and may be described as being bounded as follows:—

North.—
East.—
South.
West.

Their area is more or less acres, and they are situated in pergunnah , talook in the tehsil of in the Western Dooars.

If the lessee is found by survey or otherwise to be in possession of land in excess of the acreage herein declared, he shall pay rent for such excess land within or without the boundaries above described from the date of occupation at the rates entered in clause 3.

He shall also be liable to eviction at the discretion of the Deputy Commissioner from any lands that he may have occupied outside the boundaries specified in the lease. In case of dispute the date of occupation shall be held to be the date of giving or taking possession under the preliminary lease, or where any subsequent survey has been held, the date of the last survey if the acquisition of such excess area be subsequent to such survey. All disputes to be decided on this basis by the Deputy Commissioner, subject to an appeal, to be preferred within 30 days, to the Commissioner.

2. The rights conveyed by this lease are heritable and also transferable, provided (*a*) that the entire grant, and not a portion of it, be transferred; (*b*) that the transfer is registered in the Deputy Commissioner's office within 21 days of the date thereof, or three months of the final execution, if the deed of transfer take place out of India; and (*c*) that a registration fee of 4 annas per acre be paid to the Deputy Commissioner on the occasion of every such transfer. If any transfer of the rights conveyed by this lease is made otherwise than in accordance with the foregoing provisions and the rules, all rights in the land leased shall be liable to be forfeited to Government. After the expiry of this lease, no right shall be claimed otherwise than as expressly provided for hereinafter.

3. The rent shall be as follows:—

			Rs.
Bastoo and bamboo	acres at	...	
Roopit	do.	...	
Faringhatta	do.	...	
Waste	do.	...	
	Total	...	

The rent shall be paid to the tehsildar of in the following instalments:—

4. The lessee shall himself reside on or near to the lands covered by this lease. He shall keep all boundary lines and marks in good order and repair and clear of jungle, to the satisfaction of the Deputy Commissioner. If he fails to do so, the Deputy Commissioner or the Sub-Divisional Officer may cause the boundary to be made or put in order, and may recover the cost thereof from the lessee or his representative under the Public Demands Recovery Act, or any provision of law for the time being in force for the recovery of arrears of Government revenue, or he may call on the lessee to put the boundary lines and marks in order by a specified date on pain of forfeiture of the lease

5. Any land covered by the lease which may at any time be required for a public purpose may be taken up by Government free of cost on a deduction being made in the rent payable under the lease proportionate to the area taken by Government. But the value of any improvements or property thereon shall be paid to the lessee, and shall be assessed under the provision of the law in force for the time being for the acquisition of the land for public purposes.

6. All rights to minerals or quarries of all kinds are reserved to Government, together with such rights-of-way and other reasonable facilities as may be requisite for working, getting out, and carrying away such minerals.

7. No right of fishery and no right to dam up or otherwise obstruct the passage of any streams is given by this lease. A public right-of-way over twenty yards on either bank of every stream, available at any time of the year for local boat traffic, is reserved Public access shall be allowed at all times to any springs of water on the lands leased, whenever such access is, in the opinion of the tehsildar or the Deputy Commissioner, necessary for the convenient supply of good water to persons residing in the vicinity.

8 This lease shall be renewable on a rent the rates of which, subject to any general or special orders of Government, shall be fixed by the Board of Revenue on the report of the Deputy Commissioner on each occasion of renewal, but shall not exceed the rates of rent per acre paid in the neighbourhood at the time of renewal for the different classes of lands covered by the lease. Provided that in no case shall the total rent payable under the renewed lease be less than eight annas an acre for the entire area leased.

9. The rights and privileges conveyed by this lease, and by any renewed lease granted in accordance with its provisions, shall be liable to be forfeited on failure of the lessee to comply with any condition thereof.

10. If before the expiration of this lease no application for a renewal of the lease shall have been made, the lessee may be allowed to hold on as a tenant-at-will, but not otherwise, until other arrangements may have been made by the Deputy Commissioner.

11. The lessee may sublet any part of the land covered by this lease on such terms as he pleases, provided that he gives the same promise of the renewal of the tenure to his sub-tenant as is given to himself by this lease. The rent to be paid on renewal shall not be more than 50 per cent. in excess of the rent paid by the lessee to Government for the area leased.

12. No sub-tenant under the lessee shall sublet any part of his land on pain of forfeiture of his tenure; but this rule and the last shall not be held to prevent the employment of adhairs, projahs and other labourers supplied with seed and paid by giving them half the crop. If a sub-tenant under the lessee sublets any of his land, no suit or proceeding for the recovery of rent in money or kind on his part shall lie in any court. The Government reserve power to make rules to be observed by the lessee and his tenants for the purpose of carrying out the provisions of this and the last preceding clause; and the lessee agrees to abide by such rules when published for general observance, and to hold the land subject to such rules, on pain of forfeiture.

13. Tea may not be cultivated on the area covered by this lease if that area exceeds 200 acres.

14. No clubbing or amalgamation of grants is allowed, and all land bearing tea will be forfeited to Government if more than one grant becomes the property of the same owner, except by inheritance.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the harbour.

III.—Immediately on arrival the Commander shall cause the letter R of the Commercial Signal Code to be hoisted, and shall keep the said flag flying during his stay in port, or until authorized by the Health Officer to haul it down. If communication with the shore is not desired, the vessel shall anchor at such place as may be pointed out by the Port authorities, having regard to the season of the year. If communication with the shore is desired, the Health Officer shall go alongside the vessel, and, after all necessary enquiries, shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival, or for the shorter period prescribed in Rule IV, and undergo disinfection, which should apply as well to crew, passengers, effects, and suspectible goods.

IV.—If the Health Officer of the Port has sufficient evidence that no cases of a suspicious nature have taken place on board during the voyage, and if the vessel is besides in good hygienic condition, the duration of the quarantine will be diminished according to the following scale:—

After	eight	days of	voyage	...	...	six days of quarantine.
Do.	nine	ditto		...	...	five ditto
Do.	ten	ditto		...	...	four ditto
Do.	eleven	ditto		...	...	three ditto
Do.	twelve	ditto		...	...	two do.
Do.	thirteen	ditto	and upwards		...	twenty-four hours of quarantine.

V.—If during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of cholera should occur on board, the said vessel shall remain in quarantine for a period of seven days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule III.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days. If a case of cholera occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

[*Government Gazette, 30th November* 1886.]

IX.—All vessels arriving at Aden and Perim, which may have communicated with vessels coming from Calcutta, shall be subjected to the same quarantine as vessels arriving at Aden and Perim from that Port.

X.—All vessels which have undergone quarantine in the manner above prescribed should have the fact clearly stated on their Bills of Health.

By order of His Excellency the Right Honourable the Governor-General in Council,

T. D. MACKENZIE,
Acting Secretary to Government.

And so on, Rs. 100 being added to the deposit for every bid additional, to the extent of Rs. 400.

in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

6.—The said Promissory Notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7.—The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M. if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8.—No tender of money, Bank of Bengal Receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9.—The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10.—Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests originally required to be included in each certificate or order.

11.—No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12.—The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand tender at the time a deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions.

13.—With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained; and the first *bonâ fide* bidder for a lot after it has been offered for sale in the mode here described shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14.—The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15.—In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16.—The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the Office of the Board of Revenue:—No. 1, certificate of the opium advertised for sale; No. 2, report of the examination of such opium

17.—The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazeepore Factory for the year 1885-86, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug when packed at the Patna and Ghazeepore Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18.—Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the Office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Board of Revenue, L. P.,
C. E. BUCKLAND, *Offg. Secretary.*

Orders and Notifications by the Government of India, &c.

[*Reprinted from the "Gazette of India."*]

The following orders, issued by the Government of India, in the Home Department, are republished for general information.

F. B. PEACOCK,
Chief Secy. to the Govt. of Bengal.

NOTIFICATIONS.—PUBLIC.

Calcutta, the 26th November, 1886.

No. 2038.—With reference to Home Department Resolutions, Nos. 26—953-63,* dated the 19th July 1883, and Nos. 31—1336-45, dated the 23rd August, 1884, it is hereby notified that the examination prescribed for the filling up of vacancies in the clerical establishments of the Secretariat Offices of the Government of India and the Departments directly attached thereto will be held at Calcutta in the Senate House of the Calcutta University, and at Allahabad and Lahore, at the places to be appointed by the Governments of the North-Western Provinces and Oudh, and the Punjab, respectively, on Monday the 17th January, 1887, and following days. The hours of examination will be from 10 A.M. to 1 P.M. and from 1-30 P.M. to 4-30 P.M. daily.

(* Paragraph 5.)

The probable number of vacancies to be competed for is 3 in the Upper Division of Clerkships and 9 in the Lower Division. Of the 3 vacancies to be competed for in the Upper Division 2 will be reserved for candidates who may succeed in passing at the examination to be held at Calcutta and one for the candidate who passes best at Allahabad or Lahore. Of the 9 vacancies to be competed for in the Lower Division, 6 will be reserved for candidates who may succeed in passing at the examination to be held at Calcutta, and 3 for those who pass the examinations to be held at Allahabad and Lahore.

Candidates should pay the prescribed fees of Rs. 10 and Rs. 20 for the Lower and Upper Division, respectively, into the nearest Government Treasury, and forward the Treasury Receipt to the Secretary to the Board of Examiners. Candidates paying their fees in Calcutta should pay them into the Bank of Bengal.

Applications for permission to appear at the examinations should, as directed in the Home Department Resolution, Nos. 26—953-63, dated 19th July, 1883, be made to the Secretary to the Board of Examiners, Calcutta, between the 1st and 15th days of December next (inclusive).

The attention of intending candidates is called to paragraphs 7* and 8 of the Resolution of the 19th July, 1883, prescribing the particulars and documents which should accompany the application for permission to appear at the examination.

* (1) Evidence that the candidate is not less than 18 and not more than 24 years of age.

(2) A certificate that the candidate is of good moral character from the head of the Institution in which he has last been educated, or (when a year or more has elapsed since his education terminated) from some respectable householder, to whom he is well known in private life, and who is himself personally known to the head of some Government office, this last fact being certified by the countersignature of the officer in question.

EXAMINATIONS.

The 25th November, 1886.

No. 69.—The following Regulations respecting the examination of candidates for the Civil Service of India, to be held in June 1887, are published for general information :—

EXAMINATIONS FOR THE CIVIL SERVICE OF INDIA.

REGULATIONS FOR THE OPEN COMPETITION OF JUNE 1887.

N.B.—The Regulations are liable to be altered in future years.

1. On the 1st June, 1887, and following days, an Examination, open to all qualified persons, will be held in London (*a*). Not fewer than persons will be selected, if so many shall be found duly qualified; *viz.*, for the Lower Provinces of Bengal (including Assam); for the Upper Provinces of Bengal (including the Punjab and Oudh); for Burma; for Madras; and for Bombay (*b*).

2. No person will be deemed qualified who shall not satisfy the Civil Service Commissioners :—

(i.) That he is a natural-born subject of Her Majesty.

(ii.) That his age will be above seventeen years and under nineteen years on the 1st January 1887. [*N.B.—In the case of Natives of India this must be certified by the Government of India, or of the Presidency or Province in which the Candidate may have resided.*]

(iii.) That he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him, for the Civil Service of India.

(iv.) That he is of good moral character.

3. Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the Candidate, on payment of the prescribed fee (*c*), will be admitted to the Examination. The Commissioners may however, in their discretion, at any time prior to the grant of the Certificate of Qualification hereinafter referred to, institute such further inquiries as they may deem necessary, and if the result of such inquiries, in the case of any Candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India; and if already selected will be removed from the position of a Probationer.

(*a*) An order for admission to the Examination will be sent to each Candidate on the 18th May.

(*b*) The numbers will be announced hereafter.

(*c*) The fee (£5) will be payable by means of a special stamp according to instructions which will be communicated to Candidates.

4. The Examination will take place only in the following branches of knowledge:—

	Marks.
English Composition	300
(a) History of England—including a period selected by the Candidate	300
(a) English Literature—including books selected by the Candidate	300
Greek	600
Latin	600
French	500
German	500
Italian	400
(b) Mathematics (pure and mixed)	1,000
Natural Science: that is, the Elements of any two of the following Sciences, viz.:— Chemistry, 500; Electricity and Magnetism, 300; Experimental Laws of Heat and Light, 300; Mechanical Philosophy with outlines of Astronomy, 300.	
Logic	300
Elements of Political Economy	300
(c) Sanskrit	500
(c) Arabic	500

Candidates are at liberty to name any or all of these branches of knowledge. No subjects are obligatory.

5. The merit of the persons examined will be estimated by marks; and the number set opposite to each branch in the preceding regulation denotes the greatest number of marks that can be obtained in respect of it.

6. The marks assigned to Candidates in each branch will be subject to such deduction as the Civil Service Commissioners may deem necessary (*d*), in order to secure that "a Candidate be allowed no credit at all for taking up a subject in which he is a mere smatterer."

7. The Examination will be conducted on paper and *viva voce*, as may be deemed necessary.

8. The marks obtained by each Candidate, in respect of each of the subjects in which he shall have been examined, will be added up, and the names of the several Candidates who shall have obtained, after the deduction above mentioned, a greater aggregate number of marks than any of the remaining Candidates, will be set forth in order of merit, and such Candidates shall be deemed to be Selected Candidates for the Civil Service of India, provided they appear to be in other respects duly qualified. Should any of the Selected Candidates become disqualified, the Secretary of State for India will determine whether the vacancy thus created shall be filled up or not. In the former case, the Candidate next in order of merit, and in other respects duly qualified, shall be deemed to be a Selected Candidate. A Selected Candidate declining to accept the appointment which may be offered to him will be disqualified for any subsequent competition.

9. Selected Candidates, before proceeding to India, will be on probation for two years, during which time they will be examined periodically, with a view of testing their progress in the following subjects (*e*):—

	Marks.
1. Law	1,250
2. Classical Languages of India—	
Sanskrit	500
Arabic	400
Persian	400
3. Vernacular Languages of India (each)	400
4. The History and Geography of India	350
5. Political Economy	350

In these Examinations, as in the Open Competition, the merit of the Candidates examined will be estimated by marks, and the number set opposite to each subject denotes the greatest number of marks that can be obtained in respect of it at any one Examination. The Examination will be conducted on paper and *viva voce*, as may be deemed necessary. The last of these Examinations will be held at the close of the second year of probation, and will be called the "Final Examination," at which it will be decided whether a Selected Candidate is qualified for the Civil Service of India. At this Examination Candidates will be permitted to take up any one of the following branches of Natural Science, *viz.*—Agricultural Chemistry, Botany, Geology, or Zoology for which 350 marks will be allowed.

10. Candidates will be tested during their probation as to their ability to perform journeys on horseback; and no Candidate will be deemed qualified for the

(*a*) A considerable portion of the marks for English History and Literature will be allotted to the work selected by the Candidate (See notice on page 704.) In awarding marks for this, regard will be had partly to the extent and importance of the periods or books selected, but chiefly to the thoroughness with which they have been studied.

(*b*) The Examination will range from Arithmetic, Algebra, and Elementary Geometry, up to the elements of the differential and integral calculus, including the lower portions of applied Mathematics.

(*c*) The standard of marking in Sanskrit and Arabic will be determined with reference to a high degree of proficiency, such as may be expected to be reached by a Native of good education.

(*d*) Marks assigned in English Composition and Mathematics will be subject to no deduction. Each science will, for the purpose of deduction, be treated as a separate subject.

(*e*) Full instructions as to the course of study to be pursued will be issued to the successful Candidates as soon as possible after the result of the Open Competition is declared.

Civil Service of India who fails to satisfy the Civil Service Commissioners of his competence in this respect.

11. Any Candidate who at any of the periodical Examinations shall appear to have wilfully neglected his studies or to be physically incapacitated for pursuing the prescribed course of training, will be liable to have his name removed from the list of Selected Candidates.

12. The Selected Candidates who, at the Final Examination, shall be found to have a competent knowledge of the subjects specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of nationality, age, health, character and ability to ride, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force, at the time, for that Service.

13. Persons desirous to be admitted as Candidates must apply on Forms,* which may be obtained from "The Secretary, Civil Service Commission, London, S. W.," at any time after the 1st December 1886. The Forms must be returned so as to be received at the Office of the Civil Service Commissioners on or before 31st March, 1887 (*a*).

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements :—

(*1*) *Selected Candidates will be permitted to choose, according to the order in which they stand in the list resulting from the Open Competition, so long as a choice remains, the Presidency (and in Bengal the Division of the Presidency) to which they shall be appointed ; but this choice will be subject to a different arrangement, should the Secretary of State, or the Government of India, deem it necessary* (*b*).

(*2*) *The Probationers, having passed the necessary Examinations, will be required to report their arrival in India within such period after the grant of their Certificate of Qualification as the Secretary of State may in each case direct.*

(*3*) *The Seniority in the Civil Service of India of the Selected Candidates shall be determined according to the order in which they stand on the list resulting from the Final Examination.*

(*4*) *An allowance amounting to £800 will be given to all Candidates who pass their probation at one of the Universities or Colleges which have been approved by the Secretary of State, viz., the Universities of Oxford, Cambridge, Dublin, Glasgow, Edinburgh, St. Andrew's and Aberdeen; University College, London; and King's College, London; provided such Candidates shall have passed the required Examinations to the satisfaction of the Civil Service Commissioners, and shall have complied with such rules as may be laid down for the guidance of Selected Candidates.*

Candidates are not permitted to migrate from the University originally chosen by them to another University without first applying to the India Office for the permission, and receiving the sanction, of the Secretary of State, who will not entertain such applications unless good and sufficient reasons are assigned.

(*5*) *Selected Candidates desiring to remain in this country an additional year after the completion of their two years' probation for the purpose of taking a degree at one of the Universities above-mentioned, should apply to the Secretary of State for India for permission to do so. Besides the allowances above mentioned, a bonus of £150 will, as a temporary and experimental measure, be paid to any Candidate who, having obtained permission to remain an additional year, passes an examination qualifying for a degree in Honours at Oxford or Cambridge, or, being a student of University College, London, passes with credit an Honour Examination of the University of London. This privilege will be hereafter extended to any other of the Universities above referred to, at which an academical distinction is obtainable which, in the opinion of the Secretary of State, corresponds to a degree in Honours at Oxford or Cambridge, and to obtain which the additional year's residence in this country is necessary.*

(*6*) *All Selected Candidates will be required, after having passed the first periodical Examination, and before receiving the first instalment of their allowance, to attend at the India Office for the purpose of entering into an agreement binding themselves, amongst other things, to refund in certain cases the amount of their allowance in the event of their failing to proceed to India. A surety will be required.*

(*7*) *After passing the Final Examination, each Candidate will be required to attend again at the India Office, with the view of entering into covenants, by which, amongst other things, they will bind themselves to agree to such Regulations for the provision of pensions for their families as may be approved by the Secretary of State for India in Council. The stamps payable on these covenants amount to £1.*

(*8*) *Candidates rejected at the Final Examination of 1889, will in no case be allowed to present themselves for re-examination.*

1887.

NOTICE RESPECTING THE EXAMINATION IN THE HISTORY OF ENGLAND, AND ENGLISH LITERATURE.

HISTORY OF ENGLAND.

For the guidance of Candidates who may have a difficulty in making their selections for special study under this head, the following list is given as indicating the character and amount of reading that would be regarded as satisfactory.

(*a*) These forms should be accompanied by evidence on the points mentioned in Regulation 2, and by a list of the subjects in which the Candidate desires to be examined. Evidence of health and character must bear date not earlier than 1st March, 1887. Applications for leave to alter or add to the list of subjects named will not be entertained unless received on or before the 4th of May.

(*b*) This choice must be exercised immediately after the result of the Open Competition is announced on such day as may be fixed by the Civil Service Commissioners.

* Copies of these Regulations and of the form of application may be obtained on application to the Secretary to the Government of India in the Home Department.

Any one of the following periods, to be studied generally in "Bright's History," or (for the two first periods) Green's "History of the English People"; and more particularly in portions, selected by the Candidate, of the Text-books named:

1. **A.D. 1066-1307.**—Stubbs' Select Charters; Stubbs' Constitutional History of England; Freeman's Norman Conquest, Vol. V.

2. **A.D. 1461-1588.**—Hallam's Constitutional History of England; Froude's History of England; Brewer's Henry VIII.

3. **A.D. 1603-1715.**—Hallam's Constitutional History of England; Macaulay's History of England; Gardiner's History of England; Wyon's Reign of Queen Anne.

4. **A.D. 1715-1805.**—Lord Stanhope's History; Sir T. E. May's Constitutional History; Seeley's Expansion of England; Massey's Reign of George III.

ENGLISH LITERATURE.

Under this head there will be (besides the general paper) a special paper on the following books:—

1. **Spenser.**—Faery Queen, Books I. and II.

2. **Shakespeare.**—Othello, Tempest.

3. **Bacon.**—Essays, XXVII.-LVIII., inclusive.

4. **Milton.**—Paradise Lost, Books I. and II.

5. **Macaulay.**—Biography of Johnson, Essay on Warren Hastings.

The oral examination in English Literature will have reference chiefly to such works, *not included in the foregoing list*, as the Candidate may offer for the purpose.

CIVIL SERVICE COMMISSION,
The 26th August, 1886.

EVIDENCE OF AGE TO BE REQUIRED FROM CANDIDATES FOR THE CIVIL SERVICE OF INDIA.

I. Every Candidate born in the United Kingdom should produce a Certificate from the Registrar-General of Births, Marriages, and Deaths, or from one of his provincial Officers. This Certificate may be obtained from the Registrar-General in London, Dublin or Edinburgh, or from the Superintendent Registrar of the District in which the birth took place.

II. A Candidate born of European parents in India may produce a Certificate of Baptism from the district in which he was baptised. When such certificates are not in the possession of the candidates an Extract from the Registers kept at the India Office will probably be obtainable.

III. A Candidate who is a Native of India must have his age certified by the Government of India, or of the Presidency or Province in which he may have resided.

Except as noted in paragraphs II. and III., every Candidate is expected to produce a Certificate of *Birth*. The Civil Service Commissioners will not in ordinary cases accept a Certificate of Baptism, or other testimony, unless they are first satisfied that a Certificate of Birth cannot be procured.

Official Certificates of *Birth* may generally be obtained as follows:—

(*a.*) *For persons born in England or Wales since 30th June 1837.*—From the Registrar General, Somerset House, London, or from the Superintendent Registrar of the district in which the birth took place.

(*b.*) *For persons born in Scotland since 31st December 1854.*—From the General Register Office, Edinburgh; or from the Registrar of the parish or district in which the birth took place.

(*c.*) *For persons born in Ireland since 31st December 1863.*—From the General Register Office, Dublin; or from the Superintendent Registrar of the district in which the birth took place.

(*d.*) *For persons of English, Scottish, or Irish parentage born on board British ships since the dates mentioned in (a), (b), and (c) respectively.*—From the General Register Office, London, Edinburgh, or Dublin, according to parentage.

(*e.*) *For persons born in India of European parents.*—From the India Office, London.

Any Candidate who cannot produce a Certificate of Birth from one of the authorities named should, if possible, procure a Certificate of Baptism, and should then apply to the Secretary, Civil Service Commission, for further instructions.

LAND SALE NOTICES.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Rungpore, will be put up to sale at the Rungpore Collectorate on Monday, the 13th December 1886, corresponding with 28th Agrahayan 1293 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

The estates to be sold to the highest bidder above the upset price. The purchasers of these estates will be considered as proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to him subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators, who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*.—If the purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount of bid to be immediately deposited. If the balance be not paid by the noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by the noon of the 1st (first) succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in case of original sale.

Hooghly Collectorate, the 11th November 1886.

G. TOYNBEE, Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the district of Mymensingh, will be put up to sale at the Mymensingh Collectorate on 12th January 1887, corresponding with 29th Poush 1293 B.S., Wednesday.

The purchase will be subject to the following conditions of sale.

Conditions of Sale.

1*st*.—The estates to be sold to the highest bidders above the upset price. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them, with revenue fixed in perpetuity at the amount of the present revenue.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd*.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issuing of advertisement as in the case of original sale:—

24-Pergunnahs Collectorate, the 22nd Nov. 1886. A. W. PAUL, Covd. Dy. Collr. in charge.

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estate situate in the district of 24-Pergunnahs will be put up to sale at the Alipore Collectorate on Monday, the 11th January 1887, corresponding with the 28th day of Poush 1292 B.S. (Bengali year).

The purchasers will be subject to the following conditions of sale.

Conditions of sale.

1*st*.—The estate to be sold to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

NOTICE.

IT is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,
Under-Secy. to the Govt. of Bengal.

The 24th November 1886.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

REGULATIONS.

MATRICULATION.

[Candidates for any degree in this University must have passed the MATRICULATION EXAMINATION. No exemption from this rule is allowed on account of degrees obtained or examinations passed at any other University.

[This examination is accepted (*a*) by the College of Surgeons, (*b*) by the Incorporated Law Society, in lieu of their Preliminary Examinations. It also exempts candidates for admission to the Royal Military College from the Preliminary Test, except in Geometrical Drawing. And it is among those examinations of which some one must be passed (1) by every medical student on commencing his professional studies; and (2) by every person entering upon Articles of Clerkship to a solicitor,—any such person who may have Matriculated in the Honours or in the First Division being entitled to exemption from one year's service.

[This and all other examinations of the University, together with the Prizes, Exhibitions, Scholarships, and Medals depending upon them, are open to women upon exactly the same conditions as to men.]

There shall be two examinations for MATRICULATION in each year; one commencing on the Second Monday in January, and the other on the Third Monday in June.[1]

No candidate shall be admitted to the MATRICULATION EXAMINATION unless he have produced a certificate showing that he has completed his sixteenth year.[2] This certificate shall be transmitted to the Registrar at least *one calendar month* before the commencement of the Examination.

A fee of two pounds shall be paid at Matriculation. No Candidate shall be admitted to the Examination unless he have previously paid this fee to the Registrar.[3] If after payment of his fee, a Candidate withdraws his name, or fails to present himself at the examination, or fails to pass it, the fee shall not be returned to him, but he shall be allowed to enter for any subsequent MATRICULATION EXAMINATION upon payment, at every such entry, of an additional fee of one pound, provided that he give notice to the Registrar at least *one calendar month* before the commencement of the Examination.

The Examination shall be conducted by means of printed papers; but the Examiners shall not be precluded from putting, for the purpose of ascertaining the competence of the Candidates to pass, *viva voce* questions to any Candidate in the subjects in which they are appointed to examine.

Candidates shall not be approved by the Examiners unless they have shown a competent knowledge in each of the following subjects, according to the details specified under the several heads:—

1. Latin;
2. Any two[4] of the following languages:—(*a*) Greek, (*b*) French, (*c*) German, and (*d*) either Sankrit or Arabic;[5]
3. The English Language, English History, and Modern Geography;
4. Mathematics;
5. Natural Philosophy;
6. Chemistry

The following are the particulars of the foregoing subjects of examination:—

LANGUAGES.

LATIN.

One Latin subject to be selected by the Senate one year and a half previously from the works of the undermentioned authors:[6]

Virgil	...	One Book of the Georgics, and One Book of the Æneid.
Horace	...	Two Books of the Odes.
Sallust	..	The Conspiracy of Catiline, or the War with Jugurtha.
Cæsar	...	One of the longer or two of the shorter Books of the Gallic War.
Livy	...	One Book
Cicero	...	De Senectute or De Amicitiâ, with one of the following orations:—Pro Lege Manilîâ, one of the four Catilinarian Orations Pro Archiâ, Pro M. Marcello.
Ovid	...	One Book of the Metamorphuses, and one Book of the Epistles, or Heroides, or Tristia or two Books of the Tristia.

---

[1] These Examinations may be held not only at the University of London, but also, under special arrangement (See Appendix I.), in other parts of the United Kingdom, or in the Colonies

[2] A Certificate from the Registrar-General in London or from the Superintendent Registrar of the District, or a certified copy of the Baptismal Register, is required *in every case in which it can possibly be obtained.* In other cases a Declaration of the Candidate's age, and that he is unable to procure his Certificate of Birth or Baptism, made before a Magistrate by his parent or guardian, or by himself if of full age, will be accepted.—Every such document will be returned to the Candidate on or before Registration (*See* Note 3).

[3] Fees must be paid when Candidates inscribe their names on the Register of the University, and should not be sent in advance. Information respecting the time and place of Registration will be sent to Candidates with the acknowledgment of their Certificates of Age or their Notices.

[4] No credit will be given for more than two of these Languages.

[5] Candidates desiring to be examined in either Sankrit or Arabic must give at least *two calendar months'* notice to the Registrar, and must mention the other optional Language which they select.

[6] The LATIN Subjects for 1887 and 1888 will be—

[6] The SANSKRIT subjects for 18-7 and 1888 will be—
For January 1887:—Hitopadesa, Book IV; Story of Nala, Lectures 1-10; Manu, Book II., 164 to the end.
For June 1887: Pañchatantra, Book II; Story of Nala, Lectures 11-16; Manu, Book III., 183 to the end
For January 1888:—Hitopadesa, Book II; Mahâbhârata, Story of Nala, adhy. 17-26; Manu, IV., 1—127.
For June 1888: Pañchatantra, Book III, Mahâbhârata, Story of Sâvitrî, Manu, IV., 128-260.

[7] The questions in Natural Philosophy will be of a strictly elementary character.

HYDROSTATICS, HYDRAULICS, AND PNEUMATICS.

Pressure of Liquids and Gases, its equal diffusion, and variation with the depth.

Specific Gravity, and modes of determining it.

The Barometer, the Siphon, the Common Pump and Forcing-Pump, and the Air-Pump.

OPTICS.

Laws of Reflexion and Refraction.

Formation of Images by Mirrors and Simple Lenses.

HEAT.

Its sources. Expansion. Thermometers—relations between different Scales in common use. Difference between Temperature and Quantity of heat. Specific and Latent heat. Calorimeters. Liquefaction. Ebullition. Evaporation. Conduction. Convection. Radiation.

CHEMISTRY.

Chemistry of the Non-metallic Elements; including their compounds as enumerated below—their chief physical and chemical characters—their preparation—and their characteristic tests.

Oxygen, Hydrogen, Carbon, Nitrogen. Chlorine, Bromine, Iodine, Fluorine. Sulphur, Phosphorus, Silicon.

Combining Proportions by weight and by volume. General nature of Acids, Bases, and Salts. Symbols and Nomenclature.

The Atmosphere—its constitution; effects of Animal and Vegetable life upon its composition.

Combustion. Structure and properties of Flame. Nature and composition of ordinary Fuel.

Water. Chemical peculiarities of Natural Waters, such as rain-water, river-water, spring-water, sea-water.

Carbonic Acid. Carbonic Oxide. Oxides and Acids of Nitrogen. Ammonia. Olefiant Gas, Marsh Gas, Sulphurous and Sulphuric Acids, Sulphuretted Hydrogen. Hydrochloric Acid. Phosphoric Acid and Phosphuretted Hydrogen. Silica.

The Examinations shall be conducted in the following order:—

MONDAY.

Afternoon, 2 *to* 4. Latin.
4 *to* 6. Latin Grammar and Composition.

TUESDAY.

Morning, 10 *to* 1. Greek, German, Sanskrit, or Arabic.
Afternoon, 3 *to* 6. French or German.

WEDNESDAY.

Morning, 10 *to* 1. Arithmetic and Algebra.
Afternoon, 3 *to* 6. Geometry.

THURSDAY.

Morning, 10 *to* 1. English Language.
Afternoon, 3 *to* 6. English History and Modern Geography.

FRIDAY.

Morning, 10 *to* 1. Natural Philosophy.
Afternoon, 2 *to* 5. Chemistry.

At Two o'clock on Monday in the week next but two after the Examination, the Examiners shall publish a List of the Candidates who have passed. And at Two o'clock on the Monday next following, the Examiners shall publish a List of the Candidates who have passed arranged in Three Divisions;—in the Honours Division in the order of proficiency;[1] in the First and Second Divisions in alphabetical order.

A Pass Certificate signed by the Registrar shall be delivered to each Candidate after the Report of the Examiners shall have been approved by the Senate.[2]

If, in the opinion of the Examiners, any Candidates in the Honours Division of not more than twenty years of age at the commencement of the Examination shall possess sufficient merit, the First among such Candidates shall receive an Exhibition of Thirty Pounds per annum for the next Two Years; the Second among such Candidates shall receive an Exhibition of Twenty Pounds per annum for the next Two Years; and the Third shall receive an Exhibition of Fifteen Pounds per annum for the next Two Years; such Exhibitions to be payable in quarterly instalments, provided that on receiving each instalment the Exhibitioner shall declare his intention of presenting himself either at the two Examinations for B.A., or at the two Examinations for B.Sc., or at the INTERMEDIATE EXAMINATION IN LAWS or at the PRELIMINARY SCIENTIFIC and INTERMEDIATE EXAMINATIONS IN MEDICINE, within Three Academical Years[3] from the time of his passing the MATRICULATION EXAMINATION.

---

[1] The places of Candidates in the Honours Division are determined by their respective degrees of proficiency in the subjects of the Examination taken collectively

[2] Certificates are generally ready for issue about a month after the publication of the Classified Pass-List of each Examination; and, in the absence of any request to the contrary, they will be posted to the addresses given by the Candidates on their Schedules of Entry.

[3] By the term "Academical Year" is ordinarily meant the period intervening between any Examination and an Examination of a higher grade in the following year; which period may be either *more* or *less* than a Calendar Year. Thus the interval between the *Intermediate* Examinations in *Arts*, *Science*, and Medicine and the *Degree* Examinations of the next year in those Faculties respectively, is about sixteen months; whilst the interval between the B.A. Examination and the M.A. Examination of the next year, or between the B.Sc. Examination and the D.Sc. Examination of the next year, is less than eight months. Neverth less, each of these intervals is counted as an "Academical Year."

Under the same circumstances, the Fourth among such Candidates shall receive a prize to the value of Ten Pounds in Books, Philosophical Instruments, or Money; and the Fifth and Sixth shall each receive a Prize to the value of Five Pounds in Books, Philosophical Instruments, or Money.

Any Candidate who may obtain a place in the Honours Division at the MATRICULATION EXAMINATION in January shall be admissible to the INTERMEDIATE EXAMINATION either in ARTS or in SCIENCE in the following July.

APPENDIX.

I.—PROVINCIAL EXAMINATIONS.

THESE Examinations are appointed by the Senate from time to time, upon the application of any City, Institution, or College desiring to be named as a local centre for one or more Examinations; and are carried on simultaneously with the Examinations in London, under the supervision of Sub-Examiners also appointed by the Senate.

Candidates wishing to be examined at any Provincial centre must give notice of entry (naming the centre they select, and inclosing their certificates) to the Registrar of the University of London, who will make all necessary arrangements.

A fee usually varying from 1£ to 2£ is charged by the local authorities, in addition to the University Fee.

Both fees are payable on Registration, which takes place at the Provincial centres at a time of which due notice will be sent to Candidates.

The answers of the Candidates at the Provincial Examinations are reviewed by the Examiners at the same time with the answers of the Candidates examined in London; and a list of the Candidates who have passed at each Provincial Examination is published, at the time fixed by the Regulations, at the place where such Examination has been held.

II.—SCHOLARSHIPS, &c.

Gilchrist Scholarships, Exhibitions, and Prizes.

1. BRITISH SCHOLARSHIPS, &c.

(a) *For Male Candidates.*

A Scholarship of the value of Fifty Pounds per annum, tenable for three years, is biennially offered to Candidates intending to pursue, at OWENS COLLEGE, MANCHESTER, their studies for graduation in one of the Faculties of the University of London; a single scholarship of fifty pounds per annum for three years being awarded to the highest of those Candidates at the June Matriculation Examination who shall have been previously approved by the Principal of Owens College, provided that he pass in the Honours Division, or, in case no candidate should so pass, two Scholarships, each of twenty-five pounds per annum, being awarded to the two Candidates as aforesaid who shall stand highest in the First Division. Particulars may be obtained on application to the Principal of Owens College, Manchester.

2. A Scholarship of Fifty Pounds per annum, tenable for three years, is annually awarded to that Candidate in the Honours Division at the June Matriculation Examination who shall stand highest of the Candidates previously approved by the Principal of UNIVERSITY COLLEGE, BRISTOL; and who intends to study at that College with a view to graduation in one of the Faculties of the University of London. (N.B.—This Scholarship is open to Women.) Further particulars may be obtained on application to the Principal of University College, Bristol.

(b) *For Female Candidates.*

1. Two Exhibitions, one of Thirty Pounds, the other of Twenty Pounds per annum, tenable for two years, are annually awarded at the *June* Matriculation Examination to the two Female Candidates of not more than twenty years of age at the commencement of the Examination, who pass highest in the Honours Division, to assist them in pursuing their studies at some Collegiate Institution approved by the Gilchrist Trustees.

2. Two Exhibitions, one of Forty Pounds, the other of Thirty Pounds per annum, tenable for two years, are annually awarded to the two Female Candidates who pass highest at the Intermediate Examination in Arts (provided that they obtain in the one case at least two-thirds, and in the other at least three-fifths, of the total number of marks), to assist them in pursuing their studies at some Collegiate Institution approved by the Gilchrist Trustees.

3. A Book Prize of the value of Ten Pounds is annually awarded to the Female Candidate who passes highest at the B.A. Examination, provided she obtain not less than two-thirds of the total number of marks

[*Note.*—The Gilchrist and other Scholarships announced in this Appendix are awarded by the respective Educational Bodies upon the result of the University Examinations; but the University has otherwise no control over, and is not responsible for, such award.]

III.—INSTRUCTIONS TO CANDIDATES FOR MATRICULATION.

All applications for admission to the Examination must be made *by letter only*. No special form of application is necessary. Care must be taken to give a correct postal address, and the Candidate's name *must be written in full*.

Every application, if made for the first time, must be supported by the requisite document giving proof of age. No Candidate, whatever his age, is admitted to the Examination on his first application without the production of such a document.

Candidates who have previously presented themselves at the Examination must state that fact upon again applying for admission, but need not produce their Certificates of age a second time.

Application should not be made earlier than eight weeks, and must not be made later than a month, before the commencement of the Examination.

The age of a Candidate with regard to entry is reckoned up to and inclusive of the first day of the several Examinations, that day being computed to fall as late as the Regulations will possibly allow. The two dates, in the case of the Matriculation Examinations, are January 14th and June 21st. Only those Candidates therefore who shall have *completed their sixteenth year* on or before either of those dates will be admissible to the January or the June Examination, as the case may be; and not those who shall complete such age after those dates.

Fees must be paid on Registration, and not before.

The full marks obtainable at the Matriculation Examination are 2,800. Of these 2,000 qualify for a Prize, 1,800 for Honours, and 1,400 for the First Division. There is no regulation fixing the number of marks required for a pass. No further details as to the marking at this or other Examinations can be furnished.

The Alphabetical Pass-List is sent, when ready, to every College or School from which any Candidate (whether successful or not) has immediately proceeded to the Matriculation Examination.

The Classified List is sent, when ready, to every College or School from which a *successful* Candidate has immediately proceeded. It is also widely circulated among the leading Newspapers of the United Kingdom.

Lists cannot be supplied to individual Candidates or their friends.

The Examination Papers of past Examinations are not published separately; but the Papers of the previous academical year are printed in the University Calendar of the current year, which is issued annually at the beginning of April, and is to be obtained (price 4*s.*) of the Publishers, Messrs. Taylor and Francis, Red Lion Court, Fleet Street, E.C.

THE following report on the working of the Fire-Brigade for the year 1885-86 is published for general information.

COLMAN MACAULAY,
Secretary to the Government of Bengal.

The 25th November 1886.

REPORT ON THE WORKING OF THE FIRE-BRIGADE IN THE MUNICIPALITIES OF CALCUTTA, THE SUBURBS, AND HOWRAH.

No. 5883, dated Calcutta, the 12th November 1886.

From—The HON'BLE H. L. HARRISON, Commissioner of Police, Calcutta,
To—The Secretary to the Government of Bengal, Municipal Dept

I HAVE the honour to submit the report regarding the working of the Fire-Brigade for the year 1885-86, as required by section 30, Act IV (B.C.) of 1883.

2. The Brigade was in attendance at 43 fires during the year—nine in the Town, seventeen in the Suburbs, sixteen in Howrah, and one in the jurisdiction of the 24-Pergunnahs. The loss of property was estimated at Rs. 1,54,094. In the Town there were two serious fires: one on board the ship *J. W. Parker*, on the 18th February 1886, in which the cargo of jute and shellac caught fire, and damage to the extent of Rs. 1,00,000 was sustained; the other on the 23rd March 1886 in the Jorabagan section, in which a range of godowns stacked with loose jute, worth Rs. 30,000, was destroyed. In the Suburbs the fires were mostly confined to thatched houses and straw-stacks, and were most prevalent in the months of April and May. No fire of any importance occurred during the year. The fires in Howrah were petty, the loss averaging about Rs. 61 per fire.

3. Only one fire was attended with loss of life. On board the ship *J. W. Parker*, the seaman who first discovered the fire in the forehold was suffocated by the smoke before he could reach the deck. Efforts were made by his shipmates to rescue him, but were unavailing.

4. The destruction of property was not equal to that sustained in former years.

5. Out of the 43 fires attended by the Fire-Brigade, it is noteworthy that only one occurred in a jute warehouse, one occurred in a godown stored with jute, and one in a ship laden with jute.

6. A memorandum of fires is enclosed.

7. I annex a statement showing the receipts and the expenditure in respect thereof.

8. Under section 23 of the Act, only three prosecutions were instituted during the year and convictions were obtained in each case; but only one fine has as yet been received from the Magistrate, which is shown under the head of fines.

CALCUTTA, *the 30th November* 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 26TH OF NOVEMBER 1886.

THE weather in the Province of Bengal, during the greater part of the past week, was largely influenced and modified by a cyclonic storm which began to form in the Bay of Bengal on the 16th near the Andamans and Diamond Island, and advanced across the Bay in a west-north-westerly direction to the west of the North Circars. This storm hence originated in the same part of the Bay as the cyclone which passed over Madras during the second week of the present month. The first indications of the commencement of stormy weather were shown by a slight increase of the velocity of the wind, and by the occurrence of distant thunder and lightning to the south, at Diamond Island on the 16th. The winds increased rapidly in force at that station until the morning of the 20th, when they were blowing at the rate of 32 miles per hour. During this period the weather almost certainly became more and more stormy, and squalls of wind and rain more frequent and severe. It is, however, doubtful whether there was a single centre of wind convergence, such as is characteristic of the more intense and dangerous cyclonic storms of the Bay, until the afternoon of the 20th or morning of the 21st. It is almost certain, judging from the land observations, that the storm did not commence its march across the Bay until the evening of the 20th or morning of the 21st. The centre was probably in about latitude 16°N and longitude 89°E on the 22nd at 10 A.M. The storm apparently increased in intensity during that day, and also, but to a less degree, in extent. The rate of motion was about 12 miles per hour, as the centre on the 23rd at 10 A.M. was probably in latitude 16½° N and longitude 84½°E. The logs of two steamers which passed through the cyclone on this day (the *Melpomene* and the *Nur Jehan*) have been received in the Meteorological Office. They show that the storm was of small extent, but that the gradients near the centre were very great, and the winds of hurricane force. The *Nur Jehan* passed through the central calm area The barometer on board that steamer fell very little until two hours before the centre passed over her, and in that short interval it fell very nearly an inch (from 29·98″ to 29·03″). The lowest reading of the barometer on board the *Nur Jehan*, corrected to the Calcutta standard, is 28·79″, so that at the centre the barometric height was 1·25″ lower than the normal barometric height of the period. The inner storm area, characterized by rapid fall of barometer in the direction of the centre, was hence almost certainly not more than 50 or 60 miles in diameter. These facts and inferences are fully confirmed by the observations taken on board the *Melpomene* The storm hence seems to have been of the same type as the remarkable False Point cyclone of September 1885, but of course much less intense. The storm produced a very heavy swell on the north-west coast for some time previously to its reaching the coast. On the other hand, the indications of the barometer at the coast stations were very slight until the inner storm area touched the coast, and up to that period the winds were also unusually light and variable. The centre struck the coast near Vizagapatam about midnight. Very violent winds prevailed for some hours in the west coast districts from Gopalpore to Coconada, and over the greater part of this area very heavy rain fell. The storm appears to have been almost entirely confined to the lower atmospheric strata, as it was not able to surmount the Eastern Ghats of the Northern Circars. The intense localized cyclonic disturbance hence broke up on the morning of the 24th, but gave rise to a slight disturbance of a diffused character in Orissa, South Behar and Chutia Nagpur on the 25th and 26th. The barometer over the province had risen steadily from the 18th to the morning of the 23rd by amounts which averaged ·2″ for the whole province, and was then upwards of a tenth of an inch above the normal. The return swing of the barometric movement (doubtless due in part to ascensional air movement) preceded by a few hours the arrival of the storm on the west coast. The slight indraught to the diffused disturbance increased the ascensional movement and supplied aqueous vapour. Cloud hence formed over the greater part of the province and fairly general rain fell in moderate amounts on the 25th and 26th in Chutia Nagpur and South Behar. Orissa received moderately heavy general rain on the 23rd as a direct result of the approach of the cyclone, and showers on the 24th and 25th. The latter half of the week, that is from the 23rd, was hence characterized by the suspension of the ordinary cold-weather conditions over the whole of the province. The air was much moister, the temperature, more especially at night, was very considerably above the average, winds were abnormal in direction, and moderately heavy rain fell at a very unusual time of the year in South Behar and Chutia Nagpur.

It has been already noted that the barometer rose steadily in all parts of the province until the morning of the 23rd. The rise was greatest in Behar, averaging ·23″, and least in East Bengal (·18″), The barometer fell until the 25th in Behar, and the 26th in South Bengal. The movements of the barometer during this interval were very irregular in South Behar and Chutia Nagpur. The fall from the 23rd to the 25th or 26th slightly exceeded ·1″ at one or two stations. The mean pressure of the week is in excess for all divisions except Orissa. The excess averages ·06″ for North Behar, ·03″ for East Bengal and Chutia Nagpur, and ·02″ for South Behar and South-West Bengal.

The temperature of the air during the first three days of the week was approximately normal. The approach of the storm to the coast was followed by a rapid rise of temperature in the coast districts of Orissa and Bengal on the 23rd, which extended to the interior on the 24th. This was chiefly shewn in the night temperature, which increased from 5° to

10° over the central and western districts of the province. The following data for eight representative stations show the variation of the mean maximum day and minimum night temperatures from the normal in various parts of the province :—

The mean temperature of the province for the week was 3½° above the normal mean The excess slightly exceeded 4° in South Behar and South-West Bengal.

The normal rainfall of the week is practically nil in all parts of the province except Orissa and East Bengal, the averages for which are one-tenth and two-tenths of an inch respectively. Orissa received an average fall during the week of 1·22 inches, Chutia Nagpur, six-tenths of an inch, and South Behar one-quarter of an inch. The largest amounts were recorded in the Pooree, Cuttack, and Hazaribagh districts, where the average fall of the week varied from one inch to one and a half inches. A few light showers were received in the Maldah, Dinagepore, and Rungpore districts on the 26th. No rain fell in South-West and East Bengal, North Behar, and the greater part of North Bengal, during the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 26th of November 1886 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 56, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

THE returns from the principal Municipalities in Bengal for the week ending 6th November 1886, disclose the following results :—

1. That births and deaths were registered in these Municipalities in the proportions per 1,000 of population of 23·7 and 41·1 per 1,000, respectively, as opposed to 23·2 and 42·3 per 1,000, respectively, in the preceding week ending 30th October, indicating a diminution in the number of deaths registered.

2. That these events were returned in the highest proportions by the following Municipalities :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Comillah	57·8	Serampore	72·6
Monghyr	47·0	Gya	69·7
Serampore	35·4	Puri	60·8

Injury	·4	·5
Other causes	10·3	9·6

showing mainly that, in comparison with the preceding week, there was a sensible abatement of mortality from cholera with a small increase in that from the maladies grouped under the head of "Other causes."

4. That referring to the death-causes above indicated, while no death was reported to have occurred from small-pox, and the casualties from injury were not noticeably large anywhere, the rest of them proved most fatal to life in the following Municipalities :—

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorised form of age classification.

INCREASE.

	Tons.
Mustard and rape seed	29
This increase is due to high rate.	
Railway plant and rolling-stock	42
This increase is due to more railway materials carried during the month.	
Salt	22
This increase is due to urgent demand; the salt is generally carried by the river.	

DECREASE.

	Tons
Coal	74
This decrease is due to previous stock not being exhausted.	
Cotton piece-goods	105
This decrease is due to the plying of a steamer between Howrah and Azimganj, which carries the piece-goods for Berhampur and Khagra, and which is more convenient to the merchants.	
Grains	315
This decrease is due to abnormal grain traffic last year on account of distress prevailing in the district.	
Sugar	16
This decrease is due to previous stock not being exhausted.	
All other merchandise	109
This decrease is due to some of the staples included under this head last year, but shown separately this year.
